1Q26 Performance update

QBE reiterates outlook and provides an update on recent trading conditions. We are pleased with performance through the start of 2026, underpinned by targeted premium growth alongside resilient underwriting and investment management. We expect mid-single-digit GWP growth with a Group combined operating ratio of ~92.5% in FY26 and remain confident in sustaining strong performance over the medium-term.

Premium growth

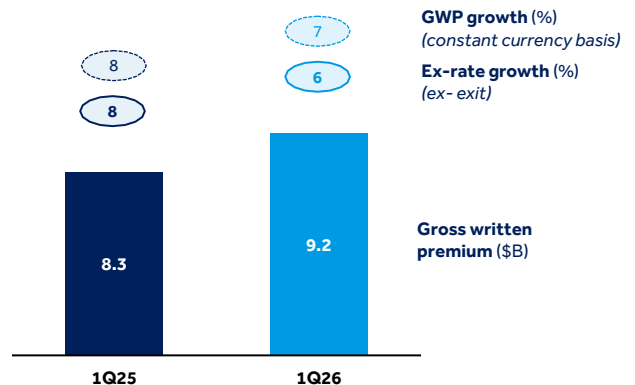

Gross written premium growth in 1Q26 was 11% compared to the prior corresponding period, or 7% on a constant currency basis.

Ex-rate growth of 6% was underpinned by momentum in North America Crop, and several portfolios within International. Excluding Crop and exited lines, ex-rate growth of 2% included a disproportionate impact from reduced volume in select portfolios including Accident and Health, which have a renewal bias toward the first quarter.

Market conditions remain broadly supportive, with favourable rate adequacy across our well diversified global portfolio. Group premium rate increases of ~2% in 1Q26 were in line with expectations, as our teams continue to execute well against our portfolio objectives in what remain dynamic markets.

Competitive pressures remain most notable within commercial property and Lloyd's. Excluding these segments, Group rate increases remain consistent with 2025 levels at ~4%.

Strong GWP growth continues

Ex-rate growth of 6%

Underwriting performance

In the four months to April 2026, the net cost of catastrophe claims totalled approximately \$300 million, relative to QBE's first-half catastrophe allowance of \$517 million. Recent natural catastrophe activity was driven by multiple events in Australia, alongside a series of storms in the Northern Hemisphere.

Direct underwriting impacts associated with the conflict in the Middle East have not been material to date (net claims estimated at ~\$60 million) and are included within catastrophe costs for the four months to April 2026. Exposure to conflict in the region is generally limited, and our teams will remain closely connected and seek to mitigate risks as the situation continues to develop.

Investment performance

Resilient investment performance has continued through the start of 2026. Returns in 1Q26 were underpinned by supportive core fixed income yields, though tempered by initial weakness in markets surrounding the commencement of conflict in the Middle East. Markets have subsequently staged a meaningful recovery through April, resulting in investment income in the four months to April of ~\$500 million. The core fixed income yield increased modestly to 4.1% at 1Q26 from 3.7% at FY25.

Total investment FUM for 1Q26 was \$36.1 billion, increasing from \$35.8 billion at FY25, with risk assets accounting for 15% of the portfolio. During the first quarter, the net impact from asset liability management activities was neutral.
