Notes to the Condensed Interim Consolidated Financial Statements

(Unaudited)

For the three months ended March 31, 2026 and 2025

1. NATURE OF OPERATIONS

Novo Resources Corp. (individually, or collectively with its subsidiaries, as applicable, the "Company" or "Novo") is registered as a foreign company with the Australian Securities & Investments Commission on January 13, 2023. The Company's common shares trade on the Toronto Stock Exchange (the "TSX") under the ticker symbol "NVO" and on the OTCQB market in the United States under the symbol "NSRPF". From September 11, 2023 CDI's are traded in Australia on the Australian Securities Exchange (the "ASX") under the ticker symbol "NVO".

The Company is engaged primarily in the business of evaluating, acquiring, exploring, and developing natural resource properties with a focus on gold and copper. The Company's Canadian registered office is located at Suite 2900, 595 Burrard Street, Vancouver, British Columbia, V7X 1J5, Canada. The Company's Australian registered office and operational office and corporate staff are located at Level 3, 46 Ventnor Avenue, West Perth, Western Australia, 6005, Australia.

2. BASIS OF PREPARATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"). The accounting policies adopted are consistent with those disclosed in the Company's most recent annual consolidated financial statements. These condensed interim consolidated financial statements do not include all of the information and note disclosures required by International Financial Reporting Standards ("IFRS") for annual financial statements and therefore should be read in conjunction with the Company's annual consolidated financial statements for the year ended December 31, 2024.

Basis of presentation

These condensed interim consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments that have been measured at fair value. These condensed interim consolidated financial statements are presented in Canadian dollars, and all values are rounded to the nearest thousand dollars (\$'000) unless otherwise stated. Share quantities are not rounded.

The preparation of the condensed interim consolidated financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. The areas involving a higher degree of judgement or complexity or where assumptions and estimates are significant to the financial statements are disclosed below within this note.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized during the period in which the estimate is revised if the revision affects only that period, or during the period of the revision and further periods if the review affects both current and future periods. The accounting policies adopted are consistent with prior years.

(Unaudited)

For the three months ended March 31, 2026 and 2025

Australian dollars are referred to as "AUD", and United States dollars are referred to as "USD", in these condensed interim consolidated financial statements.

The functional currency of each of the Company's subsidiaries has been determined to be the local currency of their home jurisdictions. Each component's functional currency is the currency of the primary economic environment in which the component operates. Novo Resources Corp's functional currency is Canadian dollar, and the condensed interim consolidated financial statements are presented in Canadian dollars. On consolidation, the assets and liabilities of foreign operations are translated into Canadian dollars at the rate of exchange prevailing at the reporting date and their condensed interim consolidated statements of profit and loss and other comprehensive income ("OCI") are translated at the average exchange rates for the reporting period. The exchange differences arising on consolidation are recognized in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is reclassified to profit or loss.

Transactions in foreign currencies are initially recorded by each entity using the respective functional currency spot rates at the date the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Differences arising on settlement or translation of monetary items are recognized in profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e. translation differences on items whose fair value gain or loss is recognized in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

Basis of consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its subsidiaries listed below. Control is established by having power over the acquiree, exposure or rights to variable returns from its involvement with the acquiree, and the ability to use its power over the acquiree to affect the amount of the acquiror's returns. Subsidiaries are fully consolidated from the date on which control is acquired by the Company. Inter-company transactions and balances are eliminated upon consolidation. They are de-consolidated from the date that control by the Company ceases.

Going concern

These condensed interim consolidated financial statements have been prepared on a going concern basis, which contemplates continuity of business activities and the realization of assets and settlement of liabilities in the normal course of business.

For the three months ended March 31, 2026, the Company reported a net loss of \$685,000 (March 31, 2025: \$1,625,000) and had operating net cash outflows of \$391,000 (March 31, 2025: \$1,665,000). The Company had cash on hand and short-term investments \$10,603,000 at March 31, 2026.

The Directors, in their consideration of the appropriateness of the going concern basis for the preparation of the condensed interim consolidated financial statements have prepared a cash flow forecast demonstrating that the Company will have access to sufficient funds to meet its commitments and working capital requirements for the 12-month period from the date of signing these condensed interim consolidated financial statements.

This cash flow forecast has been prepared on the following basis:

- Operating costs and exploration expenditures sufficient to meet the Company's minimum contractual requirements are maintained;
- Discretionary expenditure is controlled in line with the Company's prudent working capital management strategy and;
- Additional liquidity is able to be generated as required from the disposal of certain of the Company's assets.

Based on this cash flow forecast which, the Company's directors believe is reasonably achievable, the directors are satisfied that the Company will have access to sufficient cash to continue as a going concern. If the Company is not able to achieve the assumptions included in the cash flow forecast, it may need to rely on alternative options to secure additional funding, which may include the raising of capital.

Refer to Note 7 for fair value movements on listed and unlisted marketable securities at FVTOCI.

Level 1 - **Listed marketable securities** at FVTOCI are valued using quoted prices in an active market.

Level 3 - **Unlisted marketable securities** at FVTOCI that cannot be measured based on quoted prices in active markets.

SCM valuation - where available and indicative of current value, the Company measures unlisted investments using the latest financing price from recent observable arm's-length transactions.

E3D valuation - in circumstance where recent observable financing transactions are not available, the Company evaluates various valuation methodologies. For the current period, management determined the most prudent approach based on information available and current trading conditions is the modified net asset value approach.

For the three months ended March 31, 2026 and 2025

For the year ended December 31, 2025, the Company assessed its exploration and evaluation assets in accordance with IFRS 6 – Exploration for and Evaluation of Mineral Resources, identifying an impairment indicator across several tenements due to lower potential for profitable extraction. An independent valuation was subsequently undertaken using the Geoscientific/Kilburn methodology, which determines recoverable value based on tenement exploration potential. This valuation was corroborated by comparable transaction analysis and application of the Prospectivity Enhancement Multiplier (PEM) method. Following this assessment, the Company recognised an impairment charge of \$6,683,000.

With the acquisition of Millennium Minerals Pty Ltd (“Millennium”) in 2020 which was accounted for as an asset acquisition, Novo agreed to pay IMC Resources Gold Holdings Pte Ltd, Heritas Capital Management (Australia) Pty Ltd, and IMC Resources Ltd (collectively, “IMC”) deferred consideration of A\$20,000,000 (\$17,830,000).

On December 19, 2023, the Company renegotiated the terms of the deferred consideration agreement with IMC whereby the remaining balance of A\$15,600,000 (\$14,960,000) owing is to be repaid by December 2026 with a mechanism for reductions for early repayment. The balance owing has initially been measured at its fair value; the effective interest rate calculated is approximately 11.25% per annum.

The Company repaid A\$3,000,000 (\$2,625,000) on December 23, 2024 and A\$2,648,000 (\$2,513,000) on February 28, 2026, leaving A\$10,000,000 (\$9,590,000) to be paid. The undiscounted amount owing as at March 31, 2026 is A\$9,384,000 (\$9,000,000).

13. FINANCIAL RISK MANAGEMENT

a) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash and short-term investments. The Company limits its exposure to credit loss by placing its cash and short-term investments with high credit quality financial institutions, however these amounts are subject to credit risk. The Company does not invest in asset-backed deposits or investments and does not expect any credit losses. The Company's maximum exposure to credit risk for cash and short-term investments is their carrying amount as per the statement of financial position.

b) Foreign exchange rate risk

The Company operates internationally and is exposed to foreign exchange risk, primarily United States and Australian dollars. Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities denominated in a currency that is not the functional currency of the relevant company and is considered immaterial. The Company has not entered into any derivative instruments to manage foreign exchange fluctuations.

c) Liquidity Risk

Liquidity risk is the risk that the Company cannot meet its obligations as they fall due. Liquidity risk is managed by ensuring sufficient financial resources are available to meet obligations associated with financial liabilities. The Company's cash and cash equivalents are invested in business accounts and term deposits which are available on demand. The Company manages liquidity risk by preparing and maintaining cash forecasts, which illustrate cash spent to date and cash needs over the short-term. The Company has a practice of paying its outstanding payables within 30 days. The table below summarizes the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

As at March 31, 2026	Within 1 year \$'000	Within 1-2 years \$'000	Within 2-3 years \$'000	Total \$'000
Trade and other payables	965	-	-	965

e) Price Risk

The Company is exposed to price risk with respect to its marketable securities. At March 31, 2026, a 5% movement in the market value of marketable securities would have resulted in a movement of \$1,022,000 in net equity (December 31, 2025: \$1,040,000). For the period ended March 31, 2026, the Company did not enter or hold any commodity derivatives (year ended December 31, 2025: \$nil).

f) Interest Rate Risk

Interest rate risk is the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has interest-bearing assets in relation to cash at bank and term deposits carried at floating interest rates with reference to the market. The exposure to interest rates for the Company is considered minimal.
