ASX Release

American Electric Power awards power generation facility engineering services contract

Worley Limited (ASX: WOR) (“Worley”) has been awarded an engineering services contract by American Electric Power (AEP) to provide engineering, detailed design and procurement support services for Stages 3-4 of the Northeastern U5/6 Simple Cycle Gas Turbine project. The project site is at Public Service Company of Oklahoma’s Northeastern Generation Facility in Oklahoma, United States.

The scope includes the engineering and detailed design phase for a new natural gas-fired power generation facility. The site will have two gas turbines with a combined capacity of approximately 450 megawatts. The project will be delivered under Worley’s existing Master Services Agreement with AEP.

The work will be led from Worley’s Reading, Pennsylvania office in the United States, supported by the Global Integrated Delivery (GID) team, with additional support from Worley’s Louisiana and Houston offices.

“Worley is pleased to deliver this important project for AEP, building on our track record supporting customers in power generation. We’ve delivered over 400 gas turbine projects globally, with power-related projects a strategic focus as we expand into more complex critical infrastructure,” said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O’Leary, Group Company Secretary.
