Earthworks and civil construction to commence at Collie Micronising Facility

International Graphite Limited (ASX: IG6, FWB: H99) has received a Building Permit from the Shire of Collie allowing earthworks and civil construction to commence at the Collie Micronising Facility.

The Building Permit marks the achievement of the second of six milestones in the \$4.5 million grant from the Western Australian Government's Collie Industrial Transition Fund, enabling drawdown of the next tranche of grant funds.

Left: Geotechnical drilling on site.

Right: Exterior design schematic of the new facility.

The Company's builder, Prosser Built, has confirmed the Final Tender Price for construction of the production building that will house the micronising plant and equipment. The price is within 0.1% of the budget price prepared for the 2025 FEED study.

The project is on schedule to achieve mechanical completion in Q2 2027 within the capital cost estimate of \$8.0 million.

As Collie has progressed toward production, customer engagement has expanded with strong interest from Australian and north Asian customers and trading groups seeking new supply sources for graphite products.

The Collie Micronising Facility will be Australia's first commercial graphite micronising operation and its development has been instrumental in being able to fast-track progress at the IG6-Alkeemia Joint Venture in Porto Marghera¹.

This announcement has been authorised for release by the Board of International Graphite Limited.

About IG6

International Graphite Limited (ASX: IG6, FWB: H99) is building high-performance graphite processing capacity in two world class jurisdictions, Western Australia and Europe. The facilities target total production of approximately 20,000t/y. The Company's processing-first strategy targets near-term revenue from high-value industrial graphite products through a low capital intensity, fast-to-market model built on proven technologies and market-leading partnerships. The Company's inhouse team and industry partners bring more than 150 years of frontline graphite industry experience from mining to product sales. IG6 also owns a significant mineral resource at Springdale, in Western Australia, providing long-term feedstock optionality. www.internationalgraphite.com.au

Forward-Looking Statements

Certain statements in this announcement relate to the future, including forward-looking statements relating to the Company and its business. Forward-looking statements include, but are not limited to, statements concerning International Graphite Limited planned exploration program(s) and other statements that are not historical facts. When used in this document, the words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should", and similar expressions are forward looking statements.

These forward-looking statements involve known and unknown risks, uncertainties, assumptions, and other important factors that could cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such statements. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement and deviations are both normal and to be expected. Neither the Company, its officers nor any other person gives any representation, assurance or guarantee that the events or other matters expressed or implied in any forward-looking statements will actually occur. You are cautioned not to place undue reliance on those statements.
