WAM Income Maximiser Lead Portfolio Manager Matthew Haupt said: “While current market volatility can be unsettling, it is creating significant opportunities for the investment portfolio. The investment team has the flexibility to be as proactive or defensive as conditions demand and can adjust the investment portfolio opportunistically to drive returns and income for shareholders.

“Recent economic indicators suggest interest rates may be nearing their peak for this cycle, with the potential for rate cuts later in the year. These conditions should deliver gains across our debt holdings and create opportunities within equities, as changing interest rate expectations influence where investors allocate capital,” Mr Haupt added.

WAM Income Maximiser Chairman Geoff Wilson AO said: “Since inception, WAM Income Maximiser has delivered strong investment portfolio outperformance with less volatility[#] than equity markets. WAM Income Maximiser is doing exactly what it was designed to do: deliver growing monthly fully franked income and capital growth for shareholders. In an uncertain market, that combination is extremely valuable.”

WAM Income Maximiser utilises an actively managed, multi-asset strategy designed to deliver sustainable income, reduced volatility and capital growth for shareholders. The investment portfolio is managed by Lead Portfolio Manager Matthew Haupt, who has more than 20 years' experience across fixed income, equities and multi-asset investing and Portfolio Strategist Damien Boey who also has over 20 years' macroeconomic and investment experience and began his career as an economist at the Reserve Bank of Australia.
