LETTER FROM THE FORRESTANIA CHAIR

Dear Zenith Shareholder,

An Outstanding Opportunity for Zenith Shareholders

On behalf of the Board of Forrestania Resources Limited (**Forrestania**), I am pleased to present the all-scrip Offer to merge Zenith Minerals Limited (**Zenith**) with Forrestania. This transaction will allow you to become a shareholder in a combined larger and strategically positioned gold development company with exposure to a diversified portfolio of projects across some of Western Australia's most prospective gold belts.

Under the Offer, you will receive:

1 new Forrestania Share for every 4.3 Zenith Shares you own.

Based on a Forrestania share price of \$0.567 (being the 10-day VWAP of Forrestania shares prior to the announcement of the Offer), this equates to an implied value of approximately \$0.1319 per Zenith Share, valuing Zenith at approximately \$79.14 million on an undiluted basis. Zenith's 10-day VWAP over the same period was \$0.0827.

This Offer is made directly to you and is subject to a number of conditions, including a minimum acceptance condition of 50.1% of Zenith's issued shares on a fully diluted basis.

As at the date of this Bidder's Statement, Forrestania has a relevant interest in approximately 9.72% of Zenith's issued share capital. Importantly, Zenith's Board has unanimously recommended that Zenith shareholders **accept** the Offer, reflecting the Board's belief that the transaction delivers a compelling opportunity for Zenith shareholders to participate in the future growth and value creation potential of the combined group, in the absence of a Superior Proposal.

The combination will bring together attractive project portfolios across the Southern Cross, Forrestania and Eastern Goldfields regions, creating a larger and more strategically positioned company with exposure to multiple gold projects and exploration opportunities. Importantly, the transaction consolidates a number of highly prospective tenement positions and provides the combined group with an enhanced opportunity to unlock value through resource growth and future development activities. We believe the combined portfolio will be stronger than either company could achieve independently.

What You Gain by **Accepting** the Offer

By accepting the Offer, you will become a shareholder in a larger and more diversified gold exploration and development company. The combined group is expected to benefit from:

- **Regional Scale** – A consolidated portfolio of gold projects across some of Western Australia's most prospective mineral provinces.
- **Accelerated Development** – The opportunity to realise value from Zenith's Dulcie Project sooner than may otherwise be achievable on a standalone basis through access to Forrestania's financial, infrastructure and operational resources.
- **Processing Infrastructure** – Forrestania's recent acquisition of the Lake Johnston Project, including the processing plant and associated infrastructure, provides a potential future processing solution for economically viable gold-bearing ore from the Dulcie Project and other assets within the combined portfolio.
- **Increased Resource Scale** – Exposure to a growing portfolio of gold resources and exploration projects assembled through Forrestania's disciplined acquisition and exploration strategy.
- **Stronger Funding Capacity** – Improved access to capital and a strengthened corporate platform to support exploration, resource growth and project development across the combined asset base.
- **Corporate and Operational Synergies** – Rationalisation of duplicate overheads, coordinated exploration programs, shared technical expertise and improved capital allocation across a larger project portfolio.

- **Continued Upside Exposure** – Ongoing participation in the future success and value creation potential of both Forrestania's existing assets and Zenith's projects through your ownership of Forrestania shares.

Additional Reasons to **Accept**

- The Offer enables Zenith shareholders to become shareholders in Forrestania, a company that has undergone significant strategic transformation and portfolio growth over the past 12 months.
- Forrestania has established a clear strategy focused on building a substantial Western Australian gold company through targeted acquisitions, resource growth and project development.
- Subject to satisfying the relevant requirements, Zenith shareholders may be eligible for CGT scrip-for-scrip rollover relief.
- No brokerage fees are payable by Zenith shareholders in accepting the Offer.

The proposed combination of Forrestania and Zenith represents an exciting opportunity to create a larger, stronger and more strategically positioned Western Australian gold company. Together, we believe the combined group will be better equipped to discover, develop and ultimately monetise its growing portfolio of gold assets.

Next Steps

Details of the Offer, including all terms and conditions, are set out in the enclosed Bidder's Statement. I encourage you to read the Bidder's Statement in full and consider the Offer carefully.

The Offer is scheduled to close at 5:00pm (AWST) on 17 July 2026, unless extended or withdrawn, and I encourage you to **accept** as soon as possible to take advantage of the benefits offered by this transaction.

To **accept** the Offer, simply follow the instructions contained in the Acceptance Form and Bidder's Statement.

If you have any questions regarding the Offer or require further information, please contact please call our share registry (Automic) on the dedicated line for the Offer on **1300 113 489** (within Australia) and **+61 2 8072 1488** (outside Australia) between 6:30AM to 5:00PM (AWST) Monday to Friday (excluding public holidays) or via email at corporate.actions@automicgroup.com.au.

Thank you for your consideration and support. We are excited by the opportunity to combine Forrestania and Zenith and believe this transaction represents a significant step toward creating a leading Western Australian gold exploration and development company capable of delivering substantial long-term value for all shareholders.

Yours sincerely,

David Geraghty

1. REASONS WHY YOU SHOULD ACCEPT THE OFFER

1.1 Reasons Why You Should ACCEPT the Offer

Forrestania believes you should **ACCEPT** the Offer for the following reasons:

1.	The Offer has received unanimous recommendation from the Zenith Directors, in the absence of a Superior Proposal. ¹
2.	The price offered by Forrestania for your Zenith Shares is significantly higher than the recent trading price of Zenith's Shares. The last date that Zenith Shares traded at the implied Offer price (based on a 10-day VWAP of Forrestania and Zenith Shares was early October 2025, notwithstanding the recent strong market for gold-focussed companies.
3.	The strategic combination of Zenith's assets with Forrestania's surrounding projects and infrastructure has the potential to create greater value for Zenith Shareholders than any other alternatives presently available.
4.	Forrestania has a significant asset portfolio with a JORC Mineral Resource Estimate of over 1Moz. These assets include projects that surround Zenith's Dulcie Project in Western Australia. Assuming 100% acceptance, Zenith Shareholders who accept the Offer will become part of a larger West Australian exploration and development company, with a portfolio spanning the Southern Cross, Forrestania, and Eastern Goldfields belts.
5.	You will have exposure to the exploration potential that exists across Forrestania's assets that has the potential to increase Forrestania's Mineral Resource inventory.
6.	Forrestania's recent acquisition of the Lake Johnston Project, including the processing plant and associated infrastructure, provides a potential future processing solution for economically viable gold-bearing ore from the Dulcie Project and other assets within the combined portfolio.
7.	You will be provided with the opportunity to realise benefit from Zenith's Dulcie Project sooner than if Zenith sought to develop the Dulcie Project itself, given the scale of Forrestania's infrastructure assets and the resources available to Forrestania in comparison to Zenith.
8.	Forrestania has a demonstrated track record of identifying and executing strategic transactions to create value for its Shareholders. By becoming shareholders of Forrestania, Zenith Shareholders may have the opportunity to benefit from future strategic transactions that Forrestania executes.
9.	Forrestania is a well capitalised company that is moving toward becoming a stand-alone gold producer and is led by a management team with substantial project development expertise. You will become a shareholder in Forrestania, and have the opportunity to benefit from strategic benefits, diversity and operational synergies in the Combined Group if the Offer is successful.
10.	You will gain full exposure to the Forrestania Board and management team that has a depth of technical experience and operational track record.
11.	If you do not accept the Offer, you may be subject to the risks and uncertainties of being a minority securityholder in Zenith.
12.	You may have potential access to CGT scrip for scrip rollover relief.
13.	You may not incur brokerage and will not incur any stamp duty in accepting the Offer.

The above is only a headline summary of some of the reasons why you should accept the Offer. Each of these reasons is explained in more detail below.

¹ Refer to Section 6.7 of this Bidder's Statement for disclosure of the interests of each of the Zenith Directors.

If you wish to accept the Offer, you must submit your acceptance online or return the signed Acceptance Form in accordance with the directions on the Acceptance Form by **5:00pm (AWST) on 17 July 2026**, unless extended in accordance with the Corporations Act.

1.2 Detailed Reasons Why You Should ACCEPT The Offer

(a) **The Offer has received unanimous recommendation from the Zenith Directors, in the absence of a Superior Proposal.**

The Zenith Directors have unanimously recommended that Zenith Shareholders accept the Offer in the absence of a Superior Proposal. Furthermore, the Zenith Directors intend to accept the Offer for their Zenith Shares in the absence of a Superior Proposal.

As at the date of this Bidder's Statement, Forrestania is not aware of any Superior Proposal having been received by Zenith and Zenith has not made Forrestania aware of any party having an intention to make such a proposal.

Refer to Section 6.7 of this Bidder's Statement for disclosure of the interests of each of the Zenith Directors in Zenith.

(b) **The price offered by Forrestania for your Zenith Shares is significantly higher than the recent trading price of Zenith's Shares. The last date that Zenith Shares traded at the implied Offer price (based on a 10-day VWAP of Forrestania and Zenith Shares was early October 2025, notwithstanding the recent strong market for gold-focussed companies.**

Forrestania's offer for your Zenith Shares represents a significant increase to the prevailing trading price of Zenith Shares on ASX and its historical volume weighted trading prices over the last 5-day to 90-day trading periods. The last time that Zenith's Shares traded at the implied offer price of \$0.1319 (calculated using Forrestania's 10-day VWAP of \$0.567 as at 5 June 2026 and a 4.3 Offer ratio) both Forrestania and Zenith Shares was early October 2025, notwithstanding the strong market for gold-focussed companies during that period.

(c) **Forrestania has a significant asset portfolio with a JORC compliant Mineral Resource Estimate of over 1Moz. These assets include projects that surround Zenith's Dulcie Project in Western Australia. Assuming 100% acceptance, Zenith Shareholders who accept the Offer will become part of a larger West Australian exploration and development company, with a portfolio spanning the Southern Cross, Forrestania, and Eastern Goldfields belts.**

The merger of Zenith's Western Australian assets into Forrestania aligns with a strategic combination to create an expanded gold exploration and development portfolio around the southern region of Western Australia, close to

Forrestania's existing milling infrastructure (Lake Johnston) and other opportunities within the region.

Figure 1. Combined Forrestania and Zenith tenure

- (d) **You will have exposure to the exploration potential that exists across Forrestania's assets that have the potential to increase Forrestania's Mineral Resource inventory.**

In the Southern Cross district, the Company is advancing a strategy to define significant gold resources that can support long-term development opportunities. The Forrestania Project, from which the Company takes its name, lies within a world-class mineral province adjacent to the historic Bounty gold mine (~1Moz historic production) and in proximity to major mining operations, underscoring the region's exceptional prospectivity.

- (e) **Forrestania's recent acquisition of the Lake Johnston Project, including the processing plant and associated infrastructure, provides a potential future processing solution for economically viable gold-bearing ore from the Dulcie Project and other assets within the combined portfolio.**

On 13 February 2026, Forrestania announced that it had completed its acquisition of the Lake Johnston Project from Poseidon Nickel Pty Limited, a subsidiary of Horizon Minerals Limited (now Maritana Minerals Limited (ASX: MRT)). The Lake Johnston Project includes a processing plant that is currently being refurbished and recommissioned to process gold bearing ore by Forrestania, with an expected throughput capacity of approximately 3.2Mtpa. This will provide Forrestania with processing capacity for its gold resources, including any gold resources that are in economic quantities from the Dulcie Project. Zenith does not currently own or control any processing infrastructure that has been designated for the treatment of ore from the Dulcie Project should ongoing exploration and development work justify a mining operation, limiting its future development options.

- (f) **You will be provided with the opportunity to realise benefit from Zenith's Dulcie Project sooner than if Zenith sought to develop the Dulcie Project itself, given the scale of Forrestania's operations and the resources available to Forrestania in comparison to Zenith.**

Forrestania management have a clearly articulated strategy to grow a substantial gold business via consolidation and exploration which has resulted in

several recent significant project acquisitions, including importantly, the Lake Johnston mill which it is currently refurbishing and recommissioning into a gold processing mill. These projects are segmented into six operating hubs within the Westonia, Southern Cross, Mt Dimer, Forrestania, Coolgardie and Eastern Goldfields regions. The Dulcie Project sits within these existing hubs with access to Forrestania's Lake Johnston mill.

Zenith's asset base, when combined with that of Forrestania, strengthens the strategic position and tenure within the Western Australian gold belt.

- (g) **Forrestania has a demonstrated track record of identifying and executing strategic transactions to create value for its Shareholders. By becoming shareholders of Forrestania, Zenith Shareholders may have the opportunity to benefit from and future strategic transactions that Forrestania executes.**

As at 31 May 2026, Forrestania held \$17 million in cash and nil debt.

Since July 2025, Forrestania has executed a number of significant transactions, including the takeover of Kula Gold Limited, the acquisition of the Lake Johnston Project and capital raisings in excess of \$47 million, bringing significant investors onto the Forrestania share register and providing evidence of the support for its strategic objective to grow its portfolio as described herein.

- (h) **Forrestania is a well capitalised company that is moving toward becoming a stand-alone gold producer and is led by a management team with substantial project development expertise. You will become a securityholder in Forrestania, and have the opportunity to benefit from strategic benefits, diversity and operational synergies in the Combined Group if the Offer is successful.**

Forrestania's larger operational scale, established infrastructure at Lake Johnston, and greater access to technical and financial resources are expected to provide the opportunity to realise value from Zenith's Dulcie Project sooner than may otherwise be achievable on a standalone basis through access to Forrestania's financial, infrastructure and operational resources. By leveraging Forrestania's capabilities, the combined entity can fast-track project advancement, optimise capital deployment, and enhance the potential for near-term value creation from this strategically located gold asset.

- (i) **You will gain full exposure to the Forrestania Board and management team that has a depth of technical experience and operational track record.**

Forrestania's existing Board and technical teams bring a proven track record for advancing exploration tenure and project development, delivering on project milestones and the provision of excellent technical, commercial, managerial and administrative expertise.

Refer to Section 4.7 of this Bidder's Statement for further information.

- (j) **There is a risk that you will be part of the minority if you do not accept the Offer.**

As set out in Section 12.10, the completion of the Offer is subject to a limited number of Conditions.

Given the limited conditionality of the Offer there is a strong possibility that Forrestania will succeed in reaching the Minimum Acceptance Condition, by acquiring a Relevant Interest in at least 50.1% of the issued share capital of Zenith.

If Forrestania does not acquire a Relevant Interest in at least 50.1% of the Zenith Shares it may choose to waive the condition at its discretion.

If Forrestania acquires more than 50.1% but less than 90% of the Zenith Shares, Forrestania will hold a controlling interest in Zenith. The remaining Zenith Shareholders will be in a minority position in a company with a large controlling shareholder whose objectives for the company may differ from their own.

Zenith may require additional funding in the future to support exploration activities, project advancement and ongoing corporate costs. If some or all of this funding requirement is sought in the form of an equity raising and Zenith

Shareholders do not accept the Offer, Zenith Shareholders would likely need to contribute to this equity raise (commensurate with their existing shareholding) to avoid dilution of their respective shareholdings.

In addition, Zenith Shareholders could encounter a lower level of liquidity in Zenith Shares than exists today, which may impact the ability of Zenith Shareholders to sell their Zenith Shares without having an adverse impact on the share price received in the sale of those Zenith Shares in future.

(k) **Potential access to CGT scrip for scrip rollover relief.**

Zenith Securityholders holding their Zenith Shares on capital account may have access to scrip for scrip rollover relief, in which case they are entitled to disregard any capital gain as a result of accepting the Offer.

Should the Offer be successful and result in Forrestania becoming the holder of 80% or more of the voting shares in Zenith as at the close of the Offer Period, Zenith Shareholders who would otherwise make a capital gain from the disposal of their Zenith Shares pursuant to the Offer may be able to choose to obtain full scrip for scrip rollover relief.

If scrip for scrip rollover relief is available and is chosen by Zenith Shareholders, who would otherwise have made a capital gain on the disposal of their Zenith Shares under the Offer, all of the capital gain from the disposal may be disregarded.

However, Zenith Securityholders may be subject to capital gains tax as a result of a later taxable event (such as a disposal) happening to the Forrestania Shares received as consideration under the Offer.

Refer to Section 9 of this Bidder's Statement for further information.

(l) **You may not incur brokerage or stamp duty in accepting the Offer.**

If you accept the Offer, you will not incur brokerage on the transfer of your Zenith Shares to Forrestania pursuant to the Offer.

If you sell your Zenith Shares rather than disposing of them via the Offer, you may incur brokerage charges (and, potentially, GST on those charges). You will not be required to pay any stamp duty on the disposal of your Zenith Shares under the Offer or on the acquisition of Forrestania Shares under the Offer.

Full details on how to accept the Offer is set out in Section 12.4.

Section 12.6

4.2 Forrestania's key objectives

Forrestania has undertaken a targeted and strategic expansion program over the past 12 months within its established gold belt in Western Australia. The acquisitions are of tenure all located within Forrestania's operating hubs and are prospective for gold, consistent with the Company's longstanding focus on gold exploration and development. The objective of this program is to strengthen Forrestania's Resource base by securing additional gold ounces, whether classified as existing JORC Resources or as exploration targets with potential to be upgraded to JORC standard through further exploration success.

Forrestania remains committed to assessing and undertaking strategic acquisitions of either additional gold-bearing tenure or gold mining infrastructure around its operating hubs in Western Australia, including infrastructure that is or may become available for sale.

Since the beginning of 2026, Forrestania has been extremely active and has completed the following material acquisitions:

Forrestania's Westonia Gold Project hosts the Burracoppin Gold Deposit (MRE 58,700oz Au @ 0.90g/t Au).

Separate to Forrestania's Burracoppin deposit, the Company is exploring within the Southern Cross region which span across 200km of the prolific Southern Cross greenstone belt. Much of Forrestania's tenure in this region is adjacent or proximate to Zenith Minerals' tenements and much of FRS's land package also abuts tenements controlled by Golden Horse Minerals Ltd (ASX: GHM).

The Forrestania board considers that the Westonia region could become Western Australia's next district-scale gold camp and the consolidation of the region provides exciting potential to build a bankable, long-life gold producing project.

4.5.4 Mt Dimer Hub

The Mt Dimer hub hosts the Johnson Range Project, located approximately 170km north of Southern Cross in Western Australia and 6km northwest of the Ramelius Resources Ltd owned historical Evanston Mine. The Johnson Range Project consists of a MRE totalling 130,730oz @ 1.99 g/t Au.

The Forrestania Board is pleased with recent extensive drilling at the Johnson Range project and is continuing to pursue expansion of the MRE through continued exploration and resource development programs.

4.5.5 Eastern Goldfields and Coolgardie Hubs

Within the Eastern Goldfields hub, Forrestania recently completed the acquisition of the Karonie Gold Project from Goldtribe Corporation Pty Ltd, a subsidiary of Alchemy Resources Limited (ASX: ALY). The Karonie Gold Project comprises a MRE of 185,700oz @ 0.90 g/t Au)

Forrestania's Coolgardie Hub hosts the Ada Ann Gold Deposit which is located immediately north of the town of Coolgardie (MRE 18,160oz @ 2.76g/t Au). This project

covers some 90km² and hosts several historical mines including Ada Ann and the Christmas Gift mine.

The Tycho Deposit is part of the MacPhersons Reward Project, located 2.5km south of the MacPhersons Reward Pit which was recently mined by Beacon Minerals Ltd (ASX: BCN). Previous works on the deposit is limited to pre-clearing and drilling only, with no mining historically occurring. Tycho contains a MRE of 45,500oz @ 0.98 g/t Au.

Forrestania reasonably considers that there is exploration upside within the Eastern Goldfields and Coolgardie hubs with extensive exploration programs underway.

(c) **Management Commentary on Historical Results**

(i) **Assets**

Exploration tenements are carried at cost, less accumulated impairment losses and at HY 31 December 2025 stand at \$86,978,314 (30 June 2025: \$6,373,934 and 30 June 2024: \$5,670,200).

Compared to previous years, during the half year ended 31 December 2025, Forrestania undertook significant acquisition activities, including the acquisition of Kula Gold Limited, North Iron Cap Pty Ltd and IMD Gold Pty Ltd.

Exploration and evaluation expenditure incurred is accumulated in respect of each identifiable area of interest. These costs are only carried forward to the extent that they are expected to be recouped through the successful development and/or sale of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves.

Accumulated costs in relation to an abandoned area are written off in full against profit or loss in the year in which the decision to abandon the area is made.

A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest.

Other Assets include the recognition of initial consideration paid to Horizon Minerals Limited in relation to the acquisition of the Lake Johnston Project.

(ii) **Liabilities**

As at 31 December 2025, the Group recognised deferred consideration of \$39,540,492 in relation to the acquisition of Kula Gold Limited, with the deferred consideration representing the fair value of Forrestania shares as at 31 December 2025 to be issued under the takeover offer in exchange for Kula shares accepted prior to reporting date but not yet settled.

The Company has not carried any other long-term liabilities, including borrowings or finance leases, during the past three financial years.

(iii) **Results**

The consolidated entity's loss after tax attributable to shareholders of Forrester Resources Limited for the half year ending 31 December 2025 was \$9,141,790 (30 June 2025 loss: \$1,419,856 and 30 June 2024 loss: \$5,931,979). No dividends have been paid or declared by Forrester Resources Limited during the period ended 31 December 2025, 30 June 2025 and 30 June 2024.

The net assets of the consolidated entity at 31 December 2026 were \$63,706,250 (30 June 2024: \$7,019,765 and 30 June 2024: \$6,110,585) of which \$6,747,533 (30 June 2025: \$920,386 and 30 June 2024: \$459,039) represents cash and cash equivalents.

4.9 Material changes in Forrester's financial net asset position since last published accounts

Since its last published accounts on 31 December 2025, Forrester completed a capital raising in January 2026, realising gross proceeds of \$37 million.

Forrester completed a strategic 19.9% cornerstone investment in OzAurum (ASX: OZM) for \$4.1 million during the 2026 calendar year. The investment supports OzAurum's advancement of heap leach development activities at its James Stage 1 Open Pit within the Mulgabbie North Project.

Forrester has also completed the following acquisitions:

- (a) Completion of the Kula Gold Limited takeover, with the acquisition providing a portfolio of growth assets, comprising complementary projects strategically located near established processing infrastructure.
- (b) Execution and completion of the Aurumin Mt Palmer Pty Ltd, Aurumin Johnson Range Pty Ltd and Aurumin Mt Dimer Pty Ltd entities from Newcam Minerals Pty Ltd, consolidating tenure within the Mt Palmer and Mt Dimer project areas.
- (c) Acquisition of the Macphersons Reward Pty Ltd from Beacon Minerals Limited (ASX: BCN). The MacPhersons' tenement package includes several Mining Leases and includes approved and operating mining operations, located within Forrester's existing Coolgardie Hub.
- (d) Completed the purchase of tenure around the Jaurdi Hills region in Coolgardie, expanding the Company's Bonnie Vale project area of interest.
- (e) Completion of Gibraltar tenement acquisition within the Coolgardie region, with the tenement package including several Mining Leases and an approved and operating vat leaching circuit.
- (f) Acquired Mantis Resources Pty Ltd, securing exploration licences E63/2256, E63/2244 and application E63/2411 proximal to Lake Johnston.

4.10 Future potential Forrester acquisitions

Forrester has been aggressive in its acquisition of strategic opportunities within the regions of its project hubs outlined above. As outlined in this Section 4, Forrester has entered into and/or completed a number of acquisitions of mineral tenure and mining infrastructure within the last 12 months.

Forrester will continue to assess opportunities as they arise that may include the acquisition of additional mineral tenure, either by acquiring the tenements directly off the holders, or acquiring the companies holding that tenure, and/or mining infrastructure owned by other third parties if and as those opportunities arise and where it is deemed by the Board that it makes strategic sense for Forrester to do so to achieve its stated objectives.

4.11 Disclosures regarding the Hyden project

As announced to ASX on 12 May 2026, Forrester has exercised its option to acquire 100% of the shares in Hyden Resources Pty Ltd (HRPL). HRPL is the sole shareholder of Hyden Project Holdings Pty Ltd (HPH), with HPH being the registered holder of approximately eight

mineral leases in the Southern Cross region area, including Mining Lease 77/1310, which hosts the Lady Ada and Lady Magdalene deposits.

As disclosed by the Company to ASX, HPH is the subject of two legal disputes with Classic Minerals Limited. Classic Minerals is an ASX-listed company that was suspended from trading in October 2024 for failing to comply with ASX reporting requirements and has remained suspended from trading since that date.

Classic Minerals Limited claims that it is entitled to the tenements held by HPH. On 7 May 2026, the Western Australian Supreme Court dismissed an application brought by Classic Minerals Limited for summary judgement in that matter.

Separately, Classic Minerals Limited seeks to claim an 80% interest in gold rights on M77/1310 under a mineral rights arrangement that HPH asserts expired in March 2025 on its terms.

The Company will continue to defend and exercise its rights in relation to these matters and provide updates to the market as appropriate.

6. PROFILE OF ZENITH

6.1 Disclaimer

This overview of Zenith and all financial information concerning Zenith contained in this Bidder's Statement has been prepared by Forrestania using publicly available information on Zenith.

The information in this Bidder's Statement concerning Zenith has not been independently verified by Forrestania. Accordingly, Forrestania does not, subject to any applicable laws, to the extent appropriate make any representation or warranty, express or implied, as to the accuracy or completeness of this information. The information on Zenith set out in this Bidder's Statement is a summary only and not considered to be comprehensive.

6.2 Overview of Zenith

Zenith Minerals Limited (ASX: ZNC) is an Australian minerals exploration and development company incorporated in 2006 and listed on the ASX in May 2007 (initially as Zinc Co Australia Limited).

Zenith is focused on advancing high-quality gold, lithium and base metal assets within established Australian mining jurisdictions. Zenith has undergone a significant transformation in recent years, highlighted by the establishment of the Consolidated Dulcie Gold Project as a district-scale gold development opportunity and the continued advancement of its broader portfolio of gold, lithium and base metal assets.

Zenith's strategy is focused on growing and advancing high-quality resource assets while assessing strategic opportunities to maximise shareholder value.

6.3 Zenith Projects

6.3.1 Consolidated Dulcie Gold Project – Western Australia (100% owned)

Zenith has announced to ASX on 7 May 2026 that the Consolidated Dulcie Gold Project (also referred to as the Dulcie Project) has a JORC Inferred Mineral Resource of 21.3Mt @ 1g/t Au for 675,000 ounces, first reported on 19 February 2026.

The Dulcie Project has granted mining leases, shallow open-pit style mineralisation and excellent existing infrastructure, including sealed road access, proximity to regional processing infrastructure including Marvel Loch, Edna May and Forrestania's Lake Johnston mill. It comprises the Dulcie, Dulcie North and Dulcie Far North deposits across a consolidated ~6km mineralised corridor on granted Mining Leases. The Consolidated Dulcie Gold Project benefits from shallow mineralisation, established infrastructure, sealed road access and proximity to multiple operating processing facilities, including Marvel Loch and Edna May. Recent consolidation of key tenure within the corridor has strengthened Zenith's control over the mineralised system and provides a clear pathway for further resource growth and development studies.

6.3.2 Red Mountain Gold Project – Queensland (100% owned)

The Red Mountain Gold Project, is located in Queensland's Auburn Arch region. Exploration has identified a large-scale intrusion-related gold system with mineralisation defined from surface to depths exceeding 700 metres.

Recent drilling has confirmed broad zones of mineralisation, internal higher-grade intervals and strong geological continuity, with the system remaining open at depth and along strike. Red Mountain represents a significant discovery opportunity and forms an important component of Zenith's growth strategy.

6.3.3 Rio Lithium Project (Split Rock) – Western Australia (100% owned) – Lithium

The Split Rocks Project is located in the Southern Cross region within the Forrestania Greenstone Belt, situated between Perth and Kalgoorlie. The project covers approximately 369 km² and contains more than 80 identified lithium targets. It is strategically located near major lithium operations including Mt Holland, Mt Marion and Bald Hill. Mineralisation remains open along strike and at depth, providing potential for future resource growth and optionality to improving lithium market conditions.

6.3.4 Waratah Well – Western Australia (100%) owned – Lithium

Waratah Well is a 100%-owned lithium project located in Western Australia's Murchison region. The Waratah Well Lithium Project targets lithium-caesium-tantalum (LCT) pegmatites and has returned significant lithium intercepts from previous drilling, including high-grade petalite-rich mineralisation. Waratah Well provides Zenith with additional exposure to future lithium exploration and development opportunities.

6.3.5 Cowarra Gold Project – New South Wales (26.65%) – Gold

Zenith holds an indirect interest in the Cowarra Gold Project through its shareholding in Oxley Resources. Cowarra is located within the Lachlan Orogen of New South Wales and contains multiple gold prospects associated with extensive mineralised structures. Historical mining and exploration results demonstrate the prospectivity of the district, with ongoing work focused on resource evaluation and strategic review opportunities.

6.3.6 Earraheedy Zinc Project – Western Australia (25%) – Zinc-Lead-Silver

Zenith holds a 25% free-carried interest through to Bankable Feasibility Study (BFS) in the Earraheedy Joint Venture with Rumble Resources Limited (ASX: RTR) (**Joint Venture**). The Joint Venture hosts a large-scale Inferred Mineral Resource of 94Mt at 3.1% Zn+Pb and 4.1 g/t Ag (100% basis), first reported by Zenith on 19 April 2023.

The Earraheedy Zinc Project is one of Australia's largest undeveloped zinc-lead-silver projects and provides Zenith with leveraged exposure to a significant base metal development opportunity without requiring ongoing funding contributions through the BFS stage.

6.3.7 Bradda Head Lithium (Minority shareholding) – North America – Lithium

Zenith holds a minority interest in Bradda Head Lithium Ltd (AIM: BHL / CSE: BHL), a North America-focused lithium development company with projects in Arizona and Nevada, USA.

Key resource highlights at Bradda Head's flagship Basin East Project in Arizona include:

- Measured Mineral Resource: 20 Mt at 929 ppm Li (99,000 t LCE)
- Indicated Mineral Resource: 122 Mt at 860 ppm Li
- Inferred Mineral Resource: 499 Mt at 810 ppm Li (2.81 Mt LCE)

Bradda Head's San Domingo Pegmatite Project is also advancing with permit approvals granted for 37 drill sites targeting high-grade spodumene mineralisation. Additional targets under evaluation include Ruby Soho, Midnight Owl, Jumbo, and White Ridge.

In relation to other Zenith Options, Zenith must use all reasonable endeavours to have those Zenith Options cancelled by entering into option cancellation deeds and seeking any waivers from ASX to enable those options to be cancelled under the Listing Rules.

7. RATIONALE FOR THE OFFER AND INTENTIONS OF FORRESTANIA

7.1 Forrestania's relationship with Zenith

The Offer represents a unique opportunity to consolidate highly prospective gold assets within the Southern Cross-Forrestania region. The image below shows the proximity of the Forrestania and Zenith gold assets in Western Australia and their location to other gold projects and gold mills in the region. The enlarged landholding provides further strength in an established gold district, enhances exploration and development optionality, and supports the Company's strategy of building a significant Western Australian gold platform.

Figure 4. A description of Forrestania's tenure as it relates to Zenith's tenure.

7.2 Intentions on conclusion of the Offer

The intentions of Forrestania in relation to Zenith are set out in this Section of the Bidder's Statement. Those intentions have been formed on the basis of facts and information concerning Zenith, and the general business environment, which are known at the time of preparing this Bidder's Statement. Final decisions will only be reached by Forrestania in light of material information and circumstances at the relevant time. Accordingly, the statements set out in this section are statements of current intention only and may vary as new information becomes available or circumstances change.

7.3 Disclaimer Regarding Forward-Looking Statements

This Bidder's Statement includes forward-looking statements that have been based on Forrestania's current expectations and predictions about future events including Forrestania's intentions (which include those set out in this Section 7). These forward-looking statements are, however, subject to inherent risks, uncertainties and assumptions that could cause actual results, performance or achievements of Forrestania, Zenith and the Combined Group to differ materially from the expectations and predictions, express or implied, in such forward-looking statements. These factors include, among other things, those risks identified in this Bidder's Statement (including those set out in Section 10).

None of Forrestania, its officers, the persons named in this Bidder's Statement with their consent or the persons involved in the preparation of this Bidder's Statement makes any representation or warranty (express or implied) as to the accuracy or likelihood of any forward-looking statements. You are cautioned not to place reliance on these statements

in the event that the outcome is not achieved. These statements reflect views and reasonable opinions as at the date of this Bidder's Statement.

7.4 Rationale for the Offer

Forrestania believes that there are a number of key strategic and financial benefits that will arise from the successful acquisition of Zenith by Forrestania. These include:

- (a) The strategic consolidation of a portfolio of gold projects across some of Western Australia's most prospective mineral provinces;
- (b) The opportunity to realise value from Zenith's Dulcie Project sooner than may otherwise be achievable on a standalone basis through access to Forrestania's financial, infrastructure and operational resources;
- (c) Through Forrestania's recent acquisition of the Lake Johnston Project, including the processing plant and associated infrastructure, the potential future processing solution for economically viable gold-bearing ore from the Dulcie Project and other assets within the combined portfolio will be established;
- (d) the potential to utilise Forrestania's demonstrated capacity to access equity market funding to advance the development of the consolidated group's assets;
- (e) the alignment of the interests of the two shareholder groups into a like-minded, single group of securityholders;
- (f) the rationalisation of corporate overheads and duplicated roles, with the ability to consolidate operational, technical and financial resources.

7.5 Forrestania's intentions regarding Zenith as a wholly controlled entity

This Section 7.5 describes Forrestania's intentions if Forrestania becomes entitled to proceed to compulsory acquisition of the outstanding Zenith Shares and Zenith Options under Part 6A.1 of the Corporations Act, and (if the relevant thresholds are met) to compulsorily acquire Zenith's remaining convertible securities under Part 6A.2 of the Corporations Act. Forrestania intends (based on the information currently available to it) to implement the strategy for the Combined Group set out below.

- (a) **Delisting of Zenith**

As soon as practicable after Forrestania has acquired a relevant interest in at least 75.01% of all Zenith Shares (on a fully diluted basis), Forrestania will instruct Zenith to submit a request for removal from the Official List of ASX.
- (b) **Strategic review**

Subject to what is disclosed elsewhere in this Section 7, Forrestania intends to review Zenith's asset portfolio and activities, evaluating prospects, strategic relevance, funding requirements, financial performance and potential synergies between the companies. This may lead to amendments and modifications, with the review providing a platform for Forrestania to identify and growth strategy for the benefit of all shareholders.
- (c) **Corporate matters**

Forrestania intends to:

 - (i) if entitled to do so, proceed with the compulsory acquisition of any Zenith Shares not acquired under the Offer which it is entitled to compulsorily acquire in accordance with Part 6A.1 of the Corporations Act; and
 - (ii) Forrestania will extend the Offer to optionholders who exercise their Zenith Options into Zenith Shares during the Offer period. Zenith optionholders who do not exercise their Zenith Options into Zenith Shares during the Offer Period shall not receive any consideration or value for their Zenith Options and the Zenith Options shall be returned to option holders and lapse accordingly.

- (iii) amend Zenith's constitution to reflect Zenith's status as a wholly owned subsidiary of Forrestania and seek to convert Zenith from a public company to a proprietary company.

(d) **Composition of the Zenith Board**

Forrestania intends to replace all of the members of the board of directors of Zenith with a board structure and directors appropriate for a wholly owned subsidiary.

In accordance with the Bid Implementation Agreement, as soon as practicable after Forrestania has a Relevant Interest in more than 50.1% (on a fully diluted basis) of the Zenith Shares and the Offer becomes or is declared unconditional, Zenith must take all actions necessary to ensure the resignation and appointment of directors of Zenith such that the directors of Zenith are directors nominated by Forrestania in writing. In addition, it is Forrestania's current intention, in the event that the Offer is successful, to seek to reflect in the organisation structure of the Combined Group, Zenith personnel whose skills are highly regarded and who have extensive knowledge of Zenith's assets.

(e) **Other Zenith assets**

Forrestania acknowledges that Zenith holds additional assets outside of the Dulcie Project, both in Western Australia and Queensland. Forrestania intends to continue to assess those projects to ascertain the best way to achieve value for all Shareholders from those assets. A proper assessment of those assets can only be undertaken once the merger or acquisition of Zenith is complete. Until that time, Forrestania cannot commit

(f) **Corporate office and employees**

Subject to Forrestania's review, Forrestania intends to continue to conduct Zenith's business operations. Forrestania will, however, consider centralising the corporate head office of Zenith by incorporating those functions performed by it into the administrative structure of Forrestania. It is proposed that functions such as company secretarial, financial management and accounting will be centralised. It is intended that the centralised corporate office will be in Perth, Western Australia.

As a result of the implementation of Forrestania's intentions, some of Zenith's employees may undertake functions that will be centralised in the Combined Group. Some job losses may occur as a result, however, the incident, extent and timing of such job losses cannot be predicted in advance.

(g) **Accounting policy**

Forrestania intends to conduct a review of Zenith's accounting policies. It is expected that this review will result in the adoption of Forrestania accounting policies.

7.6 Forrestania's Intentions Regarding Zenith as a Part Owned Entity

Forrestania reserves the right to declare the Offer free from the 50.1% Minimum Acceptance Condition (or any other Condition). However, Forrestania has not decided whether it will free the Offer from any of the Conditions.

This Section 7.6 describes Forrestania's intentions if, on completion of the Offer, Forrestania holds a sufficient number of Zenith Shares to exercise control over the management and operations of Zenith, but is not entitled to compulsorily acquire all outstanding Zenith Shares.

Forrestania may continue acquiring Zenith Shares in reliance on the '3% creep' exception in item 9 of section 611 of the Corporations Act following completion of the Offer.

Zenith Shareholders should be aware that, in this circumstance, the liquidity of Zenith Shares may be materially decreased.

It is possible that, even if Forrestania is not entitled to proceed to compulsory acquisition of the outstanding Zenith Shares under Part 6A.1 of the Corporations Act, it may subsequently

become entitled to exercise rights of general compulsory acquisition under Part 6A.2 of the Corporations Act. If so, it intends to exercise those rights.

(a) **General**

Forrestania will implement the intentions described in Section 7.5 above to the extent that it is economically feasible and subject to the requirements of the Corporations Act and any other applicable laws or regulations. These intentions specifically include those in respect of any review of operations, corporate matters, corporate office and employees and general business integration.

(b) **Composition of the Zenith Board**

Upon completion of Forrestania's proposed acquisition of Zenith, it is proposed that the Zenith board shall comprise of directors nominated by Forrestania.

(c) **Elimination of duplication**

To the extent that activities and functions, including management, presently carried out by Forrestania and Zenith will be duplicated, such duplication will be eliminated where it is economically efficient to do so.

(d) **Remaining Zenith Securityholders**

If Forrestania acquires less than 90% but more than 50.1% of the Zenith Shares on issue, then Zenith Securityholders should be aware that if they do not accept the Offer they may become a "locked-in" minority after the end of the Offer Period (i.e. if Forrestania holds a majority of Zenith Shares but is not entitled to compulsorily acquire the remaining Zenith Shares).

(e) **Dividends and Funding**

Zenith does not currently pay dividends. The payment of dividends by Zenith is at the discretion of the Zenith Board, the majority of which will comprise Forrestania's nominees. Forrestania has not formed an intention about retaining or varying the current dividend policy of Zenith (through its nominees on the board of Zenith) and will do so when the strategic review in Section 7.5(a) is completed.

(f) **Limitations in Giving Effect to Intentions**

There may be limitations to Forrestania's intentions as outlined in this Section 7.6 due to the legal obligations of the Zenith Directors to have regard to the best interests of Zenith and its shareholders, the requirements of the Corporations Act, the ASX Listing Rules relating to transactions between related parties and all other applicable laws. Forrestania may require legal and/or financial advice before deciding what action to take in connection with the intentions outlined in this Section 7.6.

7.7 Other Intentions

Other than as set out in this Section 7, it is the present intention of Forrestania:

- (a) to continue to hold the key assets of Zenith and not to redeploy its fixed assets;
- (b) substantially continue to conduct the businesses of Zenith in its current manner, including but not limited to undertaking exploration to expand the resource development at the Dulcie Project, in conjunction with other strategic assets within the Zenith portfolio and
- (c) subject to Forrestania's review of operations, not make any major changes to the business or assets of Zenith and not to redeploy any of the fixed assets of Zenith.

8. EFFECT OF THE OFFER ON FORRESTANIA AND PROFILE OF THE COMBINED GROUP

8.1 Approach

This Section 8 provides an overview of Forrestania and its subsidiaries following the acquisition by Forrestania of all, or a portion of the Zenith Shares (and securities convertible into Zenith Shares) on issue, in various scenarios following the Offer, and the effect of the Offer on Forrestania and Zenith if the Offer is successful.

If Forrestania does not acquire at least 90% of the Zenith Shares during the Offer Period, and therefore does not become entitled to compulsorily acquire the remainder of the Zenith Shares (and securities convertible into Zenith Shares), some of the benefits that would otherwise accrue to Forrestania if Zenith were to become a wholly-owned subsidiary of Forrestania may not be fully realised.

8.2 Disclaimer Regarding Zenith and the Combined Group Information

In preparing the information relating to Zenith and the Combined Group contained in this Bidder's Statement, Forrestania has relied on publicly available information relating to Zenith which has not been independently verified by Forrestania or its Directors. Risks may exist in relation to Zenith (which may affect the Combined Group) of which Forrestania is unaware. If any material risks are known to the directors of Zenith, they must be disclosed in the Target's Statement to be issued by Zenith.

Accordingly, subject to any applicable laws, Forrestania makes no representations or warranties (express or implied) as to the accuracy and completeness of such information.

8.3 Profile of the Combined Group

If the Offer is successful, Zenith Securityholders will receive Forrestania Shares in exchange for their Zenith Shares. If Forrestania is successful in obtaining effective control of Zenith, all of the Forrestania Securityholders (including Zenith Shareholders who have received Forrestania Shares pursuant to the Offer) will be Securityholders in the Combined Group.

Forrestania believes that there are a number of key strategic and financial benefits that will arise from the successful acquisition of Zenith by Forrestania. These include:

- (a) rationalisation of future decision-making processes in relation to the Combined Group and its prospective assets;
- (b) growth of a strategic tenure holding and access to gold milling infrastructure within the region of the Combined Group's key Western Australian gold hubs;
- (c) the potential improvement of the efficiency and timeliness in the development of the Dulcie Project to maximise shareholder value by accelerating development;
- (d) the alignment of the interests of the two shareholder groups into a like-minded, single group of securityholders; and
- (e) the reduction of corporate overheads and duplicated roles.

8.4 Effect of Completion of the Offer on Forrestania's Capital Structure

There are a range of factors that may impact the number of Forrestania Securities that will be on issue following completion of the Offer, including the number of acceptances of the Offer, the number of unlisted securities exercised during the Offer Period (if any), and the number of Forrestania Shares and Forrestania Options otherwise issued by Forrestania during the Offer Period (if any).

Assuming that:

- (a) the Offer is accepted in respect of all Zenith Shares on issue as that the date of this Bidder's Statement; and
- (b) no Forrestania Shares are issued prior to the Consideration being provided to all Zenith Shareholders who have accepted the Offer,

approximately 151,225,081 new Forrestania Shares will be issued to Zenith Shareholders, resulting in the number of Forrestania Shares on issue increasing to approximately 1,484,757,321 on an undiluted basis and 1,598,983,148 on a fully diluted basis.

On completion of the Offer, Zenith Shareholders will hold approximately 10.2% of the total issued capital in Forrestania on an undiluted basis and approximately 9.5% on a fully diluted basis.

A summary of the capital structure of the Combined Group on completion of the Offer based on the assumptions set out above, is set out in the table below.

TOTAL FORRESTANIA SECURITIES	NUMBER
Forrestania Shares	1,333,532,240
Forrestania Listed Options ¹	6,566,702
Forrestania Unlisted Options ¹	87,184,125
Forrestania Performance Rights ¹	20,475,000
Forrestania Consideration Shares ²	151,225,081
Total undiluted	1,484,757,321
Total diluted	1,598,983,148

Notes:

1. Refer to Section 5.1 for further information. These Listed Options expire before the Closing Date of the Offer.
2. Excluding 58,314,005 Zenith Shares that are held by Forrestania as at the date of this Bidder's Statement and assuming that Forrestania acquires 100% of the Zenith Shares on issue that it does not already own.

The Offer extends to any person who becomes registered as a holder of Zenith Shares during the period from the Register Date until the end of the Offer Period, due to the conversion of Zenith Options that are on issue at the Register Date.

Forrestania notes, as outlined in Section 5.3 above, that it has entered into agreements that will require it to issue additional Forrestania Shares either for the purpose of paying consideration for assets that Forrestania has previously announced to ASX or to part pay contractors who have elected to receive Forrestania Shares as part payment for services provided to the Company. In addition, Forrestania notes that it continues to be active in assessing additional acquisitions within the regions of its project hubs, including additional mineral tenure or processing infrastructure. It is likely that any agreements entered into by Forrestania would require the issue of additional Forrestania Shares either as part consideration for those acquisitions or to raise capital for the funds to pay for those acquisitions. Any issue of additional Shares would dilute the interest of Zenith Shareholders in Forrestania if these transactions occurred.

8.5 Corporate Structure of the Combined Group

If the Offer is successful and Forrestania acquires 100% of the Zenith Shares on issue, the corporate structure of the Combined Group will include Zenith as an additional entity as shown in the table at Section 4.6.

8.6 Basis for Preparation of the Pro Forma Financial Information

The pro forma balance sheet as at 31 December 2025 set out below (**Pro Forma Balance Sheet**) has been prepared for illustrative purposes only and on the assumption that the acquisition of the ownership interest in Zenith occurred on one day, that is, there are no staged acquisitions.

The Pro Forma Balance Sheet has been prepared assuming two scenarios, being that Forrestania acquires 100% of Zenith and that Forrestania acquires 50.1% of Zenith.

The Pro Forma Balance Sheet has been prepared in accordance with the measurement and recognition principles of International Financial Reporting Standards.

The Pro Forma Balance Sheet has not been audited and may be subject to changes arising from an audit process if an audit was performed on them. The auditor's reviewed balance sheet of Zenith as at 31 December 2025 and auditor reviewed consolidated balance sheet of Forrestania as at 31 December 2025 are also presented below.

The Pro Forma Balance Sheet is indicative only. Forrestania has drawn its own conclusions based on the known facts and other publicly available information.

This Section should be read in conjunction with the underlying financial information from which it was extracted, and the accounting policies of Forrestania and Zenith as disclosed in their most recent financial reports.

1. Reflects the identifiable assets, liabilities and goodwill arising from corporate and asset acquisitions completed by the Company after 31 December 2025 (including those announced but not yet completed). For the purposes of this pro-forma balance sheet, the net assets acquired and any associated goodwill have been presented as a single line item, as a full purchase price allocation has not yet been finalised. No assessment of impairment of goodwill has been undertaken at the date of this Bidder's Statement, and the amounts shown are subject to further review and allocation as part of the formal post-acquisition accounting process. No transaction costs (including but not limited to advisory, legal, duties) have been included in the pro-forma.
2. Represents the cash cost of listed shares acquired after 30 June 2025, net of any cash proceeds from disposals. The balance has not been adjusted to reflect the fair value of the shares held as at the date of this Bidder's Statement.
3. The Pro Forma Combined Group Cash & Cash Equivalents balance includes Forrestania's as at 31 May 2026 plus Zenith's as at 31 December 2025.
4. Except for the accumulated loss balance in Forrestania to agree the Cash & Cash Equivalents balance, no adjustment has been made for corporate and operating costs incurred after 31 December 2025 as these are not considered material to the understanding of the pro-form financial position.
5. Share capital has been adjusted to reflect option exercises, placements and acquisition consideration shares issued after 31 December 2025 as noted in Section 4.9.

2. Represents the cash cost of listed shares acquired after 30 June 2025, net of any cash proceeds from disposals. The balance has not been adjusted to reflect the fair value of the shares held as at the date of this Bidder's Statement.
3. The Pro Forma Combined Group Cash & Cash Equivalents balance includes Forrestania's as at 31 May 2026 plus Zenith's as at 31 December 2025.
4. Except for the accumulated loss balance in Forrestania to agree the Cash & Cash Equivalents balance, no adjustment has been made for corporate and operating costs incurred after 31 December 2025 as these are not considered material to the understanding of the pro-form financial position.
5. Share capital has been adjusted to reflect option exercises, placements and acquisition consideration shares issued after 31 December 2025 as noted in Section 4.9.
6. Non-controlling interest has been recognised in the 50.1% acquisition scenario to reflect the 49.9% of the acquiree's net assets not owned by the Company. For the purposes of this pro-forma presentation, the non-controlling interest has been measured based on the acquiree's net assets as disclosed in its 31 December 2025 financial statements, without adjustment for fair value on acquisition or subsequent movements. Final measurement of non-controlling interest will be determined upon completion of acquisition accounting in accordance with AASB.

8.7

Outlook for the Combined Group

This Bidder's Statement does not include any financial forecasts or projections for revenue or profit in relation to Forrestania, Zenith or the Combined Group.

Forrestania has given careful consideration as to whether there is a reasonable basis to produce reliable and meaningful forecast financial information for the Combined Group. The Forrestania Directors have concluded that as at the date of this Bidder's Statement, it would be misleading to provide forecast financial information for the Combined Group.

9. AUSTRALIAN TAX CONSIDERATIONS

9.1 Overview

The following is a general summary of the Australian income tax, GST and duty considerations for Zenith Shareholders who accept the Offer. The Australian taxation consequences for Zenith Shareholders will depend on their individual circumstances. Shareholders should make their own enquiries and seek independent professional advice on their individual circumstances.

This summary is based upon the provisions of the *Income Tax Assessment Act 1936 (Cth)*, the *Income Tax Assessment Act 1997 (Cth)* (ITAA 1997) and the *Taxation Administration Act 1953 (Cth)* (TAA), and other applicable tax laws and practice in effect as at the date of this Bidder's Statement. It is not intended to be an authoritative or complete statement or analysis of the tax laws applicable to the particular circumstances of every Zenith Shareholder. It is recommended Zenith Shareholders should seek independent professional advice regarding the taxation consequences of disposing of their Zenith Shares in the light of their own particular circumstances.

This summary is not applicable to all Zenith Shareholders. It is relevant to Zenith Shareholders who are individuals, companies (other than life insurance companies), trusts and complying superannuation funds that hold their Zenith Shares on capital account for Australian tax purposes. This summary does not apply to Zenith Shareholders who:

- (a) hold their Zenith Shares on revenue account (such as share trading entities or entities who acquired their Zenith Shares for the purposes of resale at a profit) or as trading stock;
- (b) hold their Zenith Shares under an employee share scheme offered by Zenith where those Zenith Shares remain subject to deferred taxation under Division 83A of the ITAA 1997;
- (c) may be subject to special tax rules, such as partnerships, tax exempt organisations, entities subject to the investment manager regime under subdivision 842-I of the ITAA 1997 in relation to their Zenith Shares, insurance companies, dealers in securities or shareholders who change their tax residency while holding their Zenith Shares;
- (d) have a functional currency for Australian tax purposes other than an Australian functional currency; or
- (e) are subject to the taxation of financial arrangements rules in Division 230 of the ITAA 1997 in relation to gains and losses on their Zenith Shares.

Shareholders who are not resident in Australia for tax purposes should also take into account the tax consequences under the laws of their country of residence, as well as under Australian law, of the disposal of Zenith Shares under the Offer.

9.2 Australian Tax Resident Shareholders

This Section 9 applies to Zenith Shareholders who accept the Offer and are residents of Australia for Australian income tax purposes that hold their Zenith Shares on capital account.

(a) Capital Gains Tax Event

By accepting the Offer, Zenith Shareholders will dispose of their Zenith Shares to Forrestania in exchange for the Consideration Shares, comprising Forrestania Shares. The disposal of the Zenith Shares to Forrestania will give rise to a CGT event A1. The time of the CGT event should be the date the Zenith Shares are disposed of, which will be the date that Zenith Shareholders enter into a contract with Forrestania.

If a Zenith Shareholder does not accept the Offer and their Zenith Shares are compulsorily acquired in accordance with Part 9A.1 of the Corporations Act, the date of disposal for CGT purposes will be the date when Forrestania becomes the owner of the Zenith Shares.

The cost base of a Zenith Share will generally be equal to the cost of acquiring the Zenith Share, plus any incidental costs of acquisition and disposal (such as brokerage fees and legal costs). The reduced cost base of a Zenith Share is determined in a manner similar to the cost base although some differences in the calculation of the reduced cost base may exist depending on the Zenith Shareholder's particular individual circumstances. The cost base and reduced cost base of each Zenith Share will depend on the individual circumstances of each Zenith Shareholder.

In the absence of CGT roll-over relief, the following tax consequences are expected to arise for Zenith Shareholders accepting the Offer:

- (i) a capital gain will be made to the extent the capital proceeds received by Zenith Shareholders from the disposal of their Zenith Shares (being the market value of the Forrestania Shares) exceed the cost base of those Zenith Shares; or
- (ii) a capital loss will be made to the extent the capital proceeds received by Zenith Shareholders from the disposal of their Zenith Shares are less than the reduced cost base of those shares.

(b) **CGT Scrip for Scrip Roll-over Relief**

Zenith Shareholders who make a capital gain from the disposal of their Zenith Shares may be eligible to choose CGT scrip for scrip roll-over relief (provided certain conditions are met). CGT scrip for scrip roll-over relief enables Zenith Shareholders to disregard the capital gain they make from the disposal of their Zenith Shares under the Offer.

Broadly, for roll-over relief to be available, Forrestania must become the owner of 80% or more of the Zenith Shares under the Offer and Zenith Shareholders must make a capital gain on the disposal of their Zenith Shares. If a capital loss arises, no CGT scrip for scrip roll-over relief is available.

Zenith Shareholders do not need to inform the ATO, or document their choice to claim CGT scrip for scrip roll-over relief in any particular way, other than to complete their income tax return in a manner consistent with their choice.

(c) **Consequences of Choosing CGT Scrip for Scrip Roll-over Relief**

If a Zenith Shareholder chooses to obtain CGT scrip for scrip roll-over relief, the capital gain arising on the disposal of their Zenith Shares under the Offer should be disregarded.

Further, the first element of the cost base for the Forrestania Shares received is determined by attributing to the Forrestania Shares, on a reasonable basis, the existing cost base of the Zenith Shares exchanged under the Offer. The first element of the reduced cost base is determined similarly.

Finally, for the purposes of determining future eligibility for the CGT Discount, the acquisition date of the Forrestania Shares is taken to be the date on which the Zenith Shareholder originally acquired their Zenith Shares.

(d) **Consequences if CGT Scrip for Scrip Roll-over Relief is not available or is not chosen**

If a Zenith Shareholder does not qualify for CGT scrip for scrip roll-over relief or does not choose to obtain CGT scrip for scrip roll-over relief, the general CGT treatment outlined above at Section 9.2(a) will apply.

(e) **Capital Proceeds**

The capital proceeds on the disposal of the Zenith Shares should be equal to the market value of the Consideration Shares received by Zenith Shareholders, at the time of the disposal (or change of ownership where there is no disposal contract).

(f) **CGT Discount**

The CGT Discount may apply to Zenith Shareholders that are individuals, complying superannuation funds or trusts, who have held, or are taken to have held, their Zenith Shares for at least 12 months (not including the date of acquisition or the date of disposal) at the time of the disposal of their Zenith Shares. Where the relevant conditions are satisfied, the CGT Discount is:

- (i) one-half if the Zenith Shareholder is an individual or trustee; meaning only 50% of the capital gain will be included in assessable income; and
- (ii) one-third if the Zenith Shareholder is a trustee of a complying superannuation entity; meaning only two-thirds of the capital gain will be included in assessable income.

The CGT Discount is not available to Zenith Shareholders that are companies.

If a Zenith Shareholder makes a discount capital gain, any carried forward capital losses will be applied to reduce the undiscounted capital gain before either the one-half or one-third discount is applied. The resulting amount is then included in the Zenith Shareholder's net capital gain for the income year and included in assessable income.

The CGT Discount rules relating to trusts are complex. Accordingly, it is recommended trustees seek their own independent advice on how the CGT Discount applies to them and the trust's beneficiaries.

9.3 Non-Australian resident Shareholders

A Zenith Shareholder who is not a resident of Australia for taxation purposes (a Foreign Resident Shareholder), or who is the trustee of a foreign trust for CGT purposes, and who has not used their Zenith Shares at any time in carrying on a business through a permanent establishment in Australia, should generally not make a taxable capital gain on the disposal of Zenith Shares under the Offer unless the Zenith Shares are 'indirect Australian real property interests'. In broad terms, the Zenith Shares will be indirect Australian real property interests if:

- (a) the Zenith Shareholder, together with its associates, held an interest of 10% or more in Zenith at the time of disposal or for a 12 month period within the 24 months preceding the disposal (a 'non-portfolio interest test'); and
- (b) more than 50% of the market value of Zenith's assets is attributable to direct or indirect interests in 'taxable Australian real property' (as defined in the tax law) (the 'principal asset test').

A Foreign Resident Shareholder who has previously been an Australian tax resident and chose to disregard a capital gain or loss in respect of their Shares from CGT event I1 on ceasing to be an Australian tax resident may be subject to Australian CGT consequences on disposal of their Shares.

Foreign Resident Shareholders should seek their own independent tax advice as to the tax implications of the Offer, including tax implications in their country of residence.

9.4 Foreign resident capital gains withholding ('FRCGW')

The FRCGW provisions place obligations on the purchaser of inter alia, non-portfolio (10% or greater) shareholdings in a company whose principal assets are taxable Australian property (which includes Australian mining assets) but only where the market value of that shareholding is \$750,000 or more. Whilst referred to as applying to acquisitions from 'foreign residents' the obligations need to be considered for both resident and foreign resident shareholders in Zenith.

The obligation to withhold 12.5% of the purchase price and remit that amount to the ATO is obviated where the shareholder provides either a Clearance Certificate from the Commissioner of Taxation (which attests to their Australian tax residency) or a Vendor Declaration (which declares that their Zenith Shares are not an 'indirect Australian real property interest').

Where Forrestania considers it may have obligations under the FRCGW regime it will contact the Zenith shareholder to provide them with an opportunity to seek a Clearance Certificate or make a Vendor Declaration if they are entitled to do so.

9.5 GST

No GST should be payable by Zenith Shareholders on the acquisition of their Zenith Shares by Forrestania under the Offer, or on the receipt of Forrestania Shares as consideration for acceptance of the Offer. Zenith Shareholders who are registered for GST may not be entitled to input taxed credits (or only entitled to reduced input taxed credits) for any GST incurred on costs associated with the disposal of their Zenith Shares.

9.6 Duty

No Australian duty should be payable by Zenith Shareholders on the acquisition of their Zenith Shares by Forrestania under the Offer, or on the receipt of Forrestania Shares as consideration for acceptance of the Offer.

10. RISK FACTORS

10.1 Overview

The business activities of Forrestania are subject to various risks that may impact the future performance of Forrestania. Some of these risks can be mitigated using safeguards and appropriate systems and controls, but some are outside the control of Forrestania and cannot be mitigated.

If the Offer becomes unconditional, Zenith Shareholders who accept the Offer will become Forrestania Securityholders. In those circumstances, Zenith Shareholders will:

- (a) continue to be exposed to the risks associated to the investment in Zenith as a result of their indirect interest in Zenith through Forrestania;
- (b) be exposed to the risks which are specific to an investment in Forrestania; and
- (c) be exposed to additional risks relating to the Offer and the Combined Group.

The principal risk factors are explained below. These risks are not intended to be an exhaustive list of the risk factors to which Forrestania are exposed.

Zenith Shareholders should read the Bidder's Statement carefully and consult their professional advisers before deciding whether to accept the Offer. This Section 10 has been prepared without taking into account the individual financial objectives, financial situation and particular needs of Zenith Shareholders.

An investment in Forrestania carries no guarantee with respect to the payment of dividends, return of capital or price at which shares will trade and should be considered speculative.

10.2 Risks Relating to the Offer

RISK CATEGORY	RISK
Conditions of the Offer	As described in Section 12.10, the Offer is subject to a number of Conditions. Subject to any statutory withdrawal rights that may be available, Zenith Shareholders who accept the Offer whilst they remain conditional will no longer be able to sell any of their Shares in Zenith or withdraw their acceptance of the Offer. For those Zenith Shareholders who accept the Offer, and the Conditions remain unsatisfied at the end of the Offer Period and are not otherwise waived by Forrestania, there is no obligation on Forrestania to issue Forrestania Shares to you as consideration for your Zenith Shares. In those circumstances, any acceptances of the Offer will be void and you would then be free to deal with your Zenith Shares as you wish.
Transaction Completion risk	Forrestania seeks to acquire 100% of the issued capital of Zenith by way of the Offer. The Offer is subject to Conditions, including a Minimum Acceptance Condition, which may be waived at Forrestania's discretion. If any of the Conditions are not satisfied or waived, or any of the counterparties do not comply with their obligations, Completion may be deferred or not occur.
Transaction Due Diligence Risk	Forrestania and its advisers have performed certain pre-acquisition due diligence on Zenith. While Forrestania has obtained certain warranties from Zenith under the Bid Implementation Agreement with respect to information provided by Zenith, there is a risk that the due diligence conducted has not identified issues that would have been material to the decision by Forrestania to fully acquire Zenith. A material adverse issue which was not identified prior to Forrestania's acquisition of Zenith could have an adverse impact on the financial performance or operations of the relevant businesses and may have a material adverse effect on Forrestania.

RISK CATEGORY	RISK
Limited withdrawal rights	As described in Section 12.8 and 12.15, Zenith Shareholders may only withdraw their acceptance of the Offer in limited circumstances. Otherwise, Zenith Shareholders will be unable to withdraw their acceptances, even if the value of the Forrestania Shares to be issued to Zenith Shareholders as consideration varies from the date of their acceptance.
Issue of Forrestania Shares as consideration	Zenith Shareholders are being offered Forrestania Shares as consideration under the Offer. As a result, the value of the consideration will fluctuate depending upon the market value of Forrestania Shares at any given time. Accordingly, the market value of the Forrestania Shares at the time you receive them may vary significantly from their market value on the date of your acceptance of the Offer. In addition, the Sale Nominee (and/or a nominee of the Sale Nominee) will be issued Forrestania Shares attributable to certain Ineligible Foreign Securityholders and will sell them on market. It is possible that such sales may exert downward pressure on the Combined Group's share price during the applicable period. In any event, there is no guarantee regarding the prices that will be realised by the Sale Nominee or the future market price of the Forrestania Shares. Future market prices may be either above or below current or historical market prices.
Sale of Forrestania Securities	Under the Offer, Forrestania will issue a significant number of new Forrestania Shares. Some holders of Forrestania Securities may not intend to continue to hold their Forrestania Securities and may wish to sell them. There is a risk that this may adversely impact the price of, and demand for, Forrestania Securities.
Acquisition of Less than 90% of Zenith Shares	There are some risks associated with the Offer for Zenith Shareholders who do not accept the Offer and remain Zenith Shareholders. If, in connection with or following the Offer, Forrestania acquires between 90% and 100% of the Zenith Shares, Forrestania may be entitled to compulsorily acquire the remaining Zenith Shares. If Forrestania does not acquire a Relevant Interest of at least 50.1% of the Zenith Shares, it may choose to waive the 50.1% condition of the Offer. If Forrestania acquires more than 50.1% but less than 90% of the Zenith Shares, Forrestania will hold a controlling interest in Zenith. The remaining Zenith Shareholders will be in a minority position in a company with a large controlling shareholder whose objectives for Forrestania may differ from their own. They could also encounter a lower level of liquidity in Zenith Shares than exists today, which could result in a lower price for those Zenith Shares should they wish to sell them in future.
Merger Integration	The integration of Forrestania and Zenith may take longer than expected and the anticipated efficiencies and cost savings may be less than estimated.
Rollover Relief	Broadly, for capital gains tax rollover relief to be available, Forrestania must become the owner of 80% or more of the Zenith Share under the Offer and Zenith Shareholders must make a capital gain on the disposal of their Zenith Share. If a capital loss arises, no CGT scrip for scrip roll-over relief is available. If Forrestania achieves a Relevant Interest in more than 90% of all Zenith Shares, they can proceed to compulsorily acquire any minority holdings of Zenith Shares. If Forrestania acquires a Relevant Interest in at least 90% of Zenith Shares, then the 80% voting threshold will be met. In this regard, Forrestania will not do anything which may have the effect of denying CGT relief for Zenith Shareholders who accept the Offer made to them.

RISK CATEGORY	RISK
	In circumstances where Forrestania and Zenith still want the Offer to proceed and Forrestania does not have a Relevant Interest in at least 80% of Zenith, then it is not certain whether scrip for scrip CGT rollover relief will be available to Zenith Shareholders as it will depend upon the ultimate Relevant Interest that Forrestania acquires in Zenith under the Offer. Zenith Shareholders should refer to Section 9 for further details regarding the availability of scrip for scrip CGT rollover relief.
Change in risk and investment profile	If the Offer is completed, Zenith Shareholders will be exposed to risk factors relating to Forrestania and to certain other risks relating to the Combined Group and the integration of Forrestania and Zenith. While the operations of Forrestania and Zenith are similar in a number of ways, there may be further risks relating to the operation of a broader suite of assets both in nature, geographic scope, environmental risks, human resources and native title risks.

10.3 Specific Risks Relating to Forrestania (and the Combined Group)

RISK CATEGORY	RISK
Mining and Exploration	The mineral exploration licences comprising the Existing Projects and Zenith Projects (together, the Combined Group's Projects) are at various stages of exploration, and potential investors should understand that mineral exploration, development and production are high-risk undertakings. There can be no assurance that future exploration of these licences, or any other mineral licences that may be acquired in the future, will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited. The future exploration activities of the Combined Group may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process, changing government regulations and many other factors beyond the control of the Combined Group. The success of the Combined Group will also depend, inter alia, upon its ability to maintain title to the mineral exploration licences comprising the Combined Group's Projects, obtaining all required approvals for their contemplated activities, successful exploration and/or acquisition of reserves, successful design, construction, commissioning and operating of mining and processing facilities, successful development and production in accordance with forecasts and successful management of the operations. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the Combined Group's Projects, a reduction in the cash reserves of the Combined Group and possible relinquishment of one or more of the mineral exploration licences. The Combined Group's exploration activities to date are not advanced to a stage where reliable reserve or resource estimates can be made. Reserve and resource estimates, if made in the future, are judgments based on drilling results, past experience with mining properties, knowledge, experience, industry practice and many other factors. Estimates which are valid when made may change substantially when new information becomes available. Ore

	estimation is an interpretive process based on available data and interpretations and, thus, estimations may prove inaccurate. The actual quality and characteristics of ore deposits cannot be known until mining takes place and will almost always differ from the assumptions used to develop reserves. Further, reserves are valued based on future costs and future prices and, consequently, the actual reserves and resources may differ from those estimated, which may result in either a positive or negative effect. No assurance can be given that commercial tonnages, grades or recovery will be achieved or realised. Commodity price fluctuations, increased production costs, or reduced recovery rates, may render possible reserves containing relatively lower grades uneconomic and may result in a restatement of such reserves. Moreover, short-term operating factors relating to possible reserves, such as sequential development of ore bodies and processing of new or different ore types or grades, may cause mining operations to be unprofitable in any particular accounting period. There is a risk that unforeseen geological and geotechnical difficulties may be encountered if and when developing and mining reserves. In this event, a loss of revenue may be caused due to the lower than expected production and/or higher than anticipated operation and maintenance costs and/or on-going unplanned capital expenditure in order to meet production targets.
Incomplete acquisitions	Set out in Section 4.4 of this Bidder's Statement is an outline of acquisition agreements that Forrestania has entered into which have not yet completed as at the date of this Bidder's Statement. There remains a risk, pursuant to the terms of those outstanding agreements, that some or all of those agreements will not complete. Where an agreement does not complete, and subject to the circumstances that cause completion not to occur, Forrestania would not have access to the assets the subject of that agreement and could potentially be liable for a failure of completion. As at the date of this Bidder's Statement, Forrestania is not aware of any specific reason as to why any of those agreements listed in Section 4.4 would not complete and will continue to comply with its continuous disclosure obligations in relation to those transactions.
Hyden Dispute Risk	As disclosed in Section 4.11, the Company, through its wholly owned subsidiary, Hyden Project Holdings Pty Ltd, is in dispute with Classic Minerals Limited (Classic) in relation to the rights to the tenements and/or 80% of the gold rights on the Company's Hyden Project, which includes the Lady Ada and Lady Magdalene deposits. Although Forrestania continues to assert it has valid title to both the tenements and all gold rights on the Hyden Project, there remains a risk that Forrestania may suffer an adverse result in these matters. Forrestania intends to continue to seek all available remedies to ensure it retains all rights to both the tenements and all gold rights on the Hyden Project.
Dilution risk	The interest of Zenith Shareholders in Forrestania following completion of the Offer would be diluted by any new Forrestania Shares that Forrestania issues either during the Offer Period or after the Offer is completed. Forrestania has previously announced that it has entered into agreements that will require it to issue Forrestania Shares as part of those agreements. In addition, Forrestania continues to assess additional opportunities to acquire new tenure or infrastructure in the areas of its Western Australian hubs. It is likely that if Forrestania is successful in making future acquisitions, it will issue additional Forrestania Shares either as consideration for any acquisitions or to raise new capital to pay for those new acquisitions. Depending on the size or scale of those acquisitions, the dilution could be significant.

Dependence on licences, permits and approvals	The Combined Group's projects require governmental licences, permits, authorisations, concessions and other approvals in connection with their activities in Western Australia, including in relation to laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, surface rights, environmental protection, safety and other matters (Operating Authorisations). Obtaining and complying with the necessary Operating Authorisations or governmental regulations can be complex, costly and time-consuming and is not assured. The duration, cost and success of applications for Operating Authorisations are contingent on many factors, including those outside the control of the Combined Group. Delay in obtaining or renewing, or failure to obtain or renew, a material and necessary permit could mean that the Combined Group may be delayed or, in a worst case scenario, unable to proceed with the development or continued operation of a mine or project. The Operating Authorisations that the Combined Group need may not be issued, maintained or renewed either in a timely fashion or at all, which may constrain the ability of the Combined Group to conduct its mining operations, which in turn may impact the Combined Group's operations, financial performance and financial position. No assurance can be given that new laws or regulations will not be enacted or that existing laws and regulations will not be applied in a manner which could limit or curtail the Combined Group's activities and ultimate development or operation of the Combined Group's assets. Any inability to conduct the Combined Group's mining operations pursuant to the applicable Operating Authorisations would materially reduce the Combined Group's production and cash flow.
Operating risk	The Combined Group's business operations are subject to risks and hazards inherent in the mineral exploration and development industry. The exploration for and the development of Mineral Resources involves significant risks, including failure to locate or identify commercially viable mineral deposits, environmental and safety hazards, operational and technical difficulties encountered in drilling and exploration, industrial accidents, equipment failure, import/customs delays, shortage or delays in installing and commissioning plant and equipment, unanticipated metallurgical problems which may affect eventual extraction costs, seismic activity, unusual or unexpected rock formations, flooding, fires, or other natural disasters, outbreaks, continuations or escalations of disease (including pandemics), interruption to, or the increase in costs of, services (such as water, fuel or transport), sabotage, labour shortages, community, government or other interference and interruption due to inclement or hazardous weather conditions. These risks could result in damage to, or destruction of, mineral properties, production and power facilities, dams, or other properties, and could cause personal injury or death, environmental damage, pollution, delays in mining, increased production costs, monetary losses and possible legal liability. In particular, mining operations involve the use of heavy machinery, which involves inherent risks that cannot be completely eliminated through preventative efforts. These risks and hazards could also result in damage to or destruction of property, plant and equipment, personal injury, environmental damage, business interruption, monetary losses and possible legal liability. Forrestania may become subject to liability for accidents, pollution or other hazards against which it cannot insure or against which it may elect not to insure because of premium costs or for other reasons, or in amounts which exceed policy limits. No assurances can be given that Forrestania will achieve commercial viability through exploration success and exploitation of its projects and, until Forrestania is able to realise value from its projects, it is likely to incur ongoing operational losses.

	Costs of production may be affected by a variety of factors, including changing waste-to-ore ratios, adverse weather conditions, geotechnical issues, unforeseen difficulties associated with power supply, water supply and infrastructure, ore grade, metallurgy, labour costs, changes to applicable laws and regulations, general inflationary pressures and currency exchange rates. If faced by the Combined Group, these circumstances could result in the Combined Group not realising its operational or development plans, or in such plans costing more than expected, or taking longer to realise than expected. Any of these outcomes could have an adverse effect on the Combined Group's financial and operational performance.
Additional requirements for Capital	The Combined Group's operations and expansion plans may also result in increases in expected capital expenditure commitments. The Combined Group may require additional funding to continue or expand its business and may require additional capital in the future to, among other things, develop its projects or build additional processing capacity, and no assurance can be given that such external capital will be available at all or available on terms acceptable to the Combined Group. In addition, should the Combined Group consider that its exploration results justify commencement of production on any of the Combined Group's Projects, additional funding will be required to implement the Combined Group's development plans, the quantum of which remain unknown at the date of this Bidder's Statement. These costs could reasonably include refurbishment of the Lake Johnston mill, mining costs and other costs associated with a transition from exploration activities to mining activities. Following completion of the Offer, the Combined Group may seek to raise further funds through equity or debt financing, joint ventures, licensing arrangements, or other means. In the event that the Combined Group is unable or not permitted to obtain adequate external financing on acceptable terms, or at all, to satisfy its operating, development and expansion plans, the Combined Group's business and results of operations may be materially and adversely affected. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing may not be favourable to the Combined Group and might involve substantial dilution to Forrestania Shareholders. If additional funds are raised through the issue of equity securities, the capital raising may be dilutive to shareholders (if the Combined Group determines that a pro rata entitlement offer is not the most appropriate method of equity fundraising or shareholders elect not to participate in such entitlement offers). While the Combined Group will be subject to the constraints of the ASX Listing Rules regarding the percentage of capital that it is able to issue within a 12-month period (other than where exceptions under the Listing Rules apply), the Combined Group's Shareholders at the time may be diluted as a result of such capital raisings.
Results of Studies	Subject to the results of future exploration and testing programs, the Combined Group may progressively undertake a number of studies in respect to the Combined Group's current or new projects. These studies may include scoping, pre-feasibility and bankable feasibility studies. These studies will be completed within certain parameters designed to determine the economic feasibility of the Combined Group's current or new projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Combined Group's current or new projects or the results of other studies undertaken by the Combined Group (e.g. the results of a feasibility study may materially differ to the results of a scoping study). Further, even if a study determines the economics of the Combined Group's current or new projects, there can be no guarantee that the

current or new projects will be successfully brought into production as assumed or within the estimated parameters in the feasibility study once production commences including but not limited to operation costs, mineral recoveries and commodity prices. In addition, the ability of the Combined Group to complete a study may be dependent on the Combined Group's ability to raise further funds to complete the study if required.

10.4

Industry specific risks relating to the Combined Group

RISK CATEGORY	RISK
Native Title and Aboriginal Heritage	In relation to tenements which the Combined Group has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Combined Group to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected. There is a substantial level of regulation and restriction on the ability of exploration and mining companies to have access to land in Australia. Negotiations with both native title holders and landowners / occupiers are generally required before gaining access to land for exploration and mining activities. Inability or delays in gaining such access may adversely impact the Combined Group's ability to undertake its proposed activities. The Combined Group may need to enter into compensation and access agreements before gaining access to land. It is also possible that, in relation to tenements which the Combined Group has an interest in or will in the future acquire such an interest, there may be areas over which legitimate rights of traditional owners or surface rights holders exist. In this case, the ability of the Combined Group to gain access to tenements (through obtaining consent of any relevant traditional owner, body or landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected. The Combined Group's mineral titles may also be subject to access by third parties including, but not limited to, the areas traditional owners. This access could potentially impact the Combined Group's activities and may involve payment of compensation to parties whose existing access to the land may be affected by the Combined Group's activities. There may be areas or objects of Aboriginal heritage within the areas covered by those access agreements. If Aboriginal heritage sites or objects exist, Forresteria may need to enter into further agreements with the traditional owners of the sites. The ability of Forresteria to implement its work programme may be adversely affected in both time and cost. The Directors of the Combined Group will closely monitor the potential effect of native title claims or Aboriginal heritage matters involving tenements in which the Combined Group has or may have an interest.
Exploration Costs	The exploration costs of the Combined Group are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainty, and accordingly, the actual costs may materially differ from the estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely impact the Combined Group's viability.

RISK CATEGORY	RISK
Mine Development	The ability of the Combined Group to achieve exploration and production targets, or meet operating and capital expenditure estimates, on a timely and accurate basis cannot be assured. Possible future development of mining operations at the Combined Group's is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services. If the Combined Group commences production on one of its current or new projects, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Combined Group. No assurance can be given that Combined Group will achieve commercial viability through the development of its projects. The risks associated with the development of a mine will be considered in full should the Combined Group's Projects reach that stage and will be managed with ongoing consideration of stakeholder interests.
Environmental	The operations and proposed activities of the Combined Group are subject to Australian regulations concerning the environment. As with most exploration projects and mining operations, the Combined Group's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Combined Group intends to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws. Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Combined Group's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Combined Group for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations. The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Combined Group's operations more expensive. Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes or mining activities.
Climate Risk	There are a number of climate-related factors that may affect the operations and proposed activities of the Combined Group. The climate change risks particularly attributable to Combined Group include: the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. Combined Group may be impacted by changes to local or international compliance

RISK CATEGORY	RISK
	regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Combined Group and its profitability. While the Combined Group will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Combined Group will not be impacted by these occurrences; and climate change may cause certain physical and environmental risks that cannot be predicted by the Combined Group, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Combined Group operates.
Regulatory Compliance	The Combined Group's operating activities are subject to extensive laws and regulations relating to numerous matters including resource licence consent, environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. As set out in Section 10.3 above, the Combined Group requires permits from regulatory authorities to authorise Forrestania's operations. These permits relate to exploration, development, production and rehabilitation activities. While Forrestania believes that it is in substantial compliance with all material current laws and regulations, agreements or changes in their enforcement or regulatory interpretation could result in changes in legal requirements or in the terms of existing permits and agreements applicable to Forrestania or its properties, which could have a material adverse impact on Forrestania's current operations or planned development projects. Obtaining necessary permits can be a time-consuming process and there is a risk that the Combined Group will not obtain these permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Combined Group from proceeding with the development of a project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Combined Group's activities or forfeiture of one or more of the Combined Group's Projects.
Metallurgy	Metal or mineral recoveries are dependent upon the metallurgical process, and by its nature processing contains elements of significant risk such as: (a) identifying a metallurgical process through test work to produce a saleable metal or concentrate; (b) developing an economic process route to produce a metal or concentrate; and (c) changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the project. No assurance can be given that any particular level of recovery from mineral resources or reserves will in fact be realised or that a mineral resource will ever qualify as commercially viable which can be legally and economically exploited.

10.5 General Risks Relating to the Combined Group

RISK CATEGORY	RISK
Reliance on Key Personnel	Forrestania currently has a small executive team, The Combined Group will be dependent on the experience, skills and knowledge of its key personnel in Australia to successfully manage its business. The loss of any of the Combined Group's key personnel, the inability to recruit necessary staff as needed or the increased cost to recruit or retain the necessary staff, may cause a disruption to the Combined Group and adversely impact the Combined Group's operations, financial performance and financial position.
Economic	General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Combined Group, as well as on its ability to fund its operations. If activities cannot be funded, there is a risk that the tenements comprising the Combined Group's Projects may have to be surrendered or not renewed. General economic conditions may also affect the value of the Combined Group and its valuation regardless of its actual performance.
Competition Risk	The industry in which the Combined Group will be involved is subject to domestic and global competition. Although the Combined Group will undertake all reasonable due diligence in its business decisions and operations, the Combined Group will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Combined Group's projects and business.
Market Conditions	Share market conditions may affect the value of the Combined Group's Shares regardless of the Combined Group's operating performance. Share market conditions are affected by many factors such as: (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. The market price of Shares can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Combined Group nor the Directors warrant the future performance of the Combined Group or any return on an investment in the Combined Group.
Commodity Price Volatility and Exchange Rate Risks	The Combined Group's operating results, economic and financial prospects and other factors will affect the trading price of the Shares. In addition, the price of Shares is subject to varied and often unpredictable influences on the market for equities, including, but not limited to, general economic conditions including the performance of the Australian dollar on world markets, inflation rates, foreign exchange rates and interest rates, variations in the general market for listed stocks in general, changes to government policy, legislation or regulation, industrial disputes, general operational and business risks and hedging or arbitrage trading activity that may develop involving the Shares.

RISK CATEGORY	RISK
	In particular, the share prices for many companies have been and may in the future be highly volatile, which in many cases may reflect a diverse range of non-company specific influences such as global hostilities and tensions relating to certain unstable regions of the world, acts of terrorism and the general state of the global economy. No assurances can be made that Forrestania's market performance will not be adversely affected by any such market fluctuations or factors. The Combined Group's Australian projects are prospective, inter alia, for precious and base metals. The market price of these commodities fluctuate and are affected by numerous factors beyond the control of the Combined Group. These factors include current and expected future supply and demand, forward selling by producers, production cost levels in major metal producing centers as well as macroeconomic conditions such as inflation and interest rates. Fluctuations in commodity prices may impact on the commercial attractiveness or viability of the Combined Group's projects. Furthermore, the international prices of most commodities are denominated in United States dollars and the Combined Group's cost base will be in a combination of Australian dollars and United States dollars. Consequently, changes in these exchange rates may impact on the expenditure of the Combined Group and the Combined Group's purchasing capacity.
Insurance	Forrestania intends to insure its operations in accordance with industry practice. However, in certain circumstances Forrestania's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of Forrestania. Insurance of all risks associated with Forrestania's business may not always be available and where available the costs can be prohibitive.
Force Majeure	The Combined Group's Projects now or in the future may be adversely affected by risks outside the control of the Combined Group including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.
Taxation	The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Combined Group are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally. To the maximum extent permitted by law, the Combined Group, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Bidder's Statement.
Litigation Risks	The Combined Group will be exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Combined Group may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Combined Group's operations, reputation,

RISK CATEGORY	RISK
	financial performance and financial position. Forrestania is not currently engaged in any litigation.
No Profit to Date	Forrestania has incurred losses since its inception. It is therefore not possible to evaluate its prospects based on past performance. Since the Combined Group intends to continue investing in its exploration programs the Directors anticipate making further losses in the foreseeable future. While the Forrestania Directors have confidence in the future potential of the Combined Group, there can be no certainty that the Combined Group will achieve or sustain profitability or positive cash flow from its operating activities.
