

CLEANSPACE HOLDINGS ANNOUNCEMENT

New Product Launch: European certification achieved for CleanSpace 'AGILE' – a world first “loose-fitting” PAPR with patented AirSensit[®] technology.

11 June 2026. CleanSpace Holdings Limited (ASX: CSX) is pleased to announce the launch of its new advanced respiratory protection device, **CleanSpace AGILE**, the world's first loose-fitting Powered Air Purifying respirator (**PAPR**) powered with patented AirSensit[®] technology, designed for use in demanding industrial environments. CleanSpace AGILE is now available through the Company's network of authorised distribution partners across the UK and European region.

Key Points

- **New Product** - CleanSpace AGILE is a patented, loose-fitting half facepiece PAPR delivering 99.97% filtration efficiency, designed for high-dust industrial workplace environments with superior comfort and lightweight design.
- **European Regulatory Milestone** - Achievement of EN 12941 (TH2) certification for a loose-fitting PAPR, following a rigorous approval process. Regulatory approval opens new and significant opportunities for further revenue growth in the Company's largest and most established market and validates CleanSpace AGILE's technical credentials.
- **Product Milestone** - Represents the culmination of nearly two years of focused R&D driven by the need to meet increasingly rigorous regulatory requirements in developed PAPR markets while directly addressing the protection needs of workers with facial hair.
- **Further Certification Imminent** - Approval for the Australian and New Zealand market is on track and expected within the coming months, materially broadening the Company's addressable market in this key region.
- **Large & Growing Market** - The Company targets a significant global opportunity across construction, mining, quarrying and broader industrial sectors, driven by tightening safety regulations and a growing focus on worker health. It is underpinned by proven R&D capabilities and a portfolio of patented technologies. CleanSpace AGILE enhances the Company's ability to penetrate new and existing industrial markets.

Product Overview

The CleanSpace AGILE PAPR has been developed to meet the needs of industries operating in high dust environments. Drawing from CleanSpace's patented technologies, AGILE is a compelling option for workers who require a loose-fitting PAPR without compromising comfort and freedom of movement.

Key features of the product include:

- Designed for all faces, including bearded, the Half Facepiece is comfortable and loose-fitting
- Advanced filtration technology provides 99.97% filtration efficiency
- Enhanced user comfort and ergonomics — lightweight unit (<425g), no belts or hoses
- Easy to put on and take off, and compatible with other PPE

These features deliver benefits to workers and organisations, including:

- Improved worker safety and compliance outcomes to support respiratory safety programs
- Increased productivity through enhanced usability
- Enhanced worker adoption due to comfortable design
- Certification and Regulatory Approval

The CleanSpace AGILE PAPR device has successfully achieved **EN 12941 (TH2) certification for a loose-fitting PAPR**, enabling entry into the European market, currently CleanSpace's largest global market by revenue.

The Company notes that the certification process is both lengthy and rigorous, requiring extensive testing and validation to meet stringent regulatory standards. Achieving this certification represents a pivotal milestone, opening the door to new markets while strengthening the Company's position as a scalable alternative to traditional industrial respiratory protection brands within an increasingly rigorous regulatory environment.

Certification for the Australian market is progressing as planned, with approval expected in coming months.

Market Opportunity

The Company believes CleanSpace AGILE is well positioned to address a significant market opportunity across the UK and Europe for industries dealing with particulate hazards, such as:

- Construction and Quarrying
- Mining and resource operations
- Industrial and manufacturing sectors
- Other environments with high levels of airborne particulates

These segments represent a large and growing market driven by increasing regulatory requirements and heightened focus on worker health and safety.

For personal use only

Innovation and R&D Capability

The development of the AGILE PAPR is a testament to CleanSpace's strong research and development capabilities and is the culmination of nearly two years of intensive work by CleanSpace's engineering and product development teams. The Company continues to invest in innovation to deliver differentiated solutions that meet evolving customer needs and regulatory requirements.

The Way Forward

With European certification secured and Australian approval anticipated, CleanSpace Holdings Limited is focused on commercialisation of AGILE and expanding its presence in key global markets.

Authorised for release by the CleanSpace Holdings Limited Board of Directors

ABOUT CLEANSPACE

CleanSpace is a Sydney-based designer and manufacturer of respiratory protection equipment for industrial and healthcare solutions, founded by a team of biomedical engineers with experience in respiratory medical devices. CleanSpace is passionate about continually improving health outcomes, safety and standards of care for people who need it most.

In the last 20 years, technology has driven unprecedented advances in protective equipment and transformed people's health. We have brought this to personal respiratory protection. The Company continues to invest in research and development programs resulting in differentiated design and approved products that provide compelling employer and user benefits. CleanSpace Respirators are a true game changer. Higher protection for frontline workers means better health outcomes for millions of people, now and into the future.
