11 June 2026

ASX Announcement

Investor presentation

MELBOURNE Australia, 11 June 2026: Australian antiviral drug development company, Island Pharmaceuticals Ltd (**ASX: ILA**; **Island** or **the Company**) is pleased to provide the following presentation which will be used at the Gold Coast Investment Showcase from 11 June to 12 June 2026, and during the Company's investor webinar, scheduled for 11:00am AEST (9:00am AWST) on Friday, 12 June.

The presentation highlights the Company's growing momentum across regulatory, clinical and manufacturing initiatives, including progression under the US FDA Animal Rule pathway, execution of an expanded CRADA with USAMRIID, commencement of GMP manufacturing and the upcoming dose optimisation study.

Together, these initiatives are expected to further de-risk the Galidesivir program while supporting multiple potential value drivers, including a Tropical Disease Priority Review Voucher and future government procurement opportunities.

The presentation also discusses the increasing global focus on biodefence preparedness, the limitations of existing filovirus countermeasures and Galidesivir's potential role as a broad-spectrum antiviral capable of addressing multiple high-consequence viral threats.

Webinar details:

Island will host an investor webinar at 11:00am AEST (9:00am AWST) on Friday, 12 June 2026. During the webinar, CEO and Managing Director, Dr David Foster and Non-Executive Chairman, Mr Jason Carroll will provide a broader insight into the expanded CRADA with USAMRIID and provide an update on its broader biodefence engagement and other near-term opportunities associated with Ebola and Sudan virus.

Link: https://us02web.zoom.us/webinar/register/WN_rcig93lHSUCU2qyG507lww
Date and time: 11:00am AEST (9:00am AWST) on Friday, 12 June CY26

A recording of the webinar will be made available following the broadcast.

- Ends -

Approved for release to the ASX by:

David Foster (CEO and Managing Director)

About Island Pharmaceuticals

Island (ASX: ILA) is focused on areas of unmet need for drugs that can address urgent viral diseases, public health or biosecurity threats. The Company is executing a dual development strategy for its assets, ISLA-101 and Galidesivir.

ISLA-101 has a well-established safety profile, being repurposed for the prevention and treatment of dengue fever and other mosquito (or vector) borne diseases. Galidesivir is a clinical-stage antiviral molecule with a broad spectrum of activity in over 20 RNA viruses, including high-priority threats such as Ebola, Marburg, MERS, Zika and Yellow fever – viruses with significant unmet medical needs and that may contribute to national security threats.

Island encourages all current investors to go paperless by registering their details with the Company's share registry, Automic Registry Services, whose contact info is housed on the Shareholder Services page of the Company's website.

Visit www.islandpharmaceuticals.com for more on Island.

ISLAND PHARMACEUTICALS

COMBATTING URGENT VIRAL DISEASE THREATS

Advancing Galidesivir as a multivirus countermeasure under the FDA Animal Rule

Dr David Foster, CEO & Managing Director | Mr Jason Carroll, Non-Executive Chairman

June 2026

ASX: ILA

Disclaimer

Important Information
This disclaimer applies to this presentation and the information contained in it (**Presentation**). By reading this disclaimer you agree to be bound by it. The Presentation has been prepared by Island Pharmaceuticals Limited and all related bodies corporate (**Company**).

Confidential information
The Presentation is confidential and is intended only for the person to whom it was first given. By receiving the Presentation, you agree to keep it confidential, not to disclose it to any other person and not to copy, use, publish, record or reproduce it, in whole or in part, without the prior written consent of the Company, which may be withheld in its absolute discretion.

Not an offer or financial product advice
The Presentation does not constitute an offer, invitation, solicitation or recommendation with respect to the purchase or sale of security in the Company nor does it constitute financial product advice. The Presentation is not a prospectus, product disclosure statement, pathfinder for the purposes of section 734(9) of the *Corporations Act 2001* (Cth) or other offer document under Australian or New Zealand law or under any other law. The Presentation has not banyeen filed, registered or approved by regulatory authorities in any jurisdiction.
The Presentation is not intended to be relied upon as advice or a recommendation to investors and does not take into account the investment objectives, financial situation, taxation situation or needs of any particular investor. An investor must not act on the basis of any matter contained in the Presentation but must make its own assessment of the Company and conduct its own investigations and analysis. Investors should assess their own individual financial circumstances and consider talking to a financial adviser, professional adviser or consultant before making any investment decision.

Information purposes only
The Presentation is for information purposes only. It provides an overview of the Company but may not contain all information necessary to make an investment decision. The Presentation is of a general nature and does not purport to be complete or verified by the Company or any other person. The Company does not have any responsibility or obligation to inform you of any matter arising or coming to their notice, after the date of the Presentation, which may affect any matter referred to in the Presentation. The information in the Presentation is subject to change without notice.

No guarantee, representation or warranty
While reasonable care has been taken in relation to the preparation of the Presentation, none of the Company or their respective directors, officers, employees, contractors, agents, or advisers nor any other person (**Limited Party**) guarantees or makes any representations or warranties, express or implied, as to or takes responsibility for, the accuracy, reliability, completeness or fairness of the information, opinions, forecasts, reports, estimates and conclusions contained in the Presentation. No Limited Party represents or warrants that the Presentation is complete or that it contains all information about the Company that a prospective investor or purchaser may require.
To the maximum extent permitted by law, each Limited Party expressly disclaims any and all liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of or reliance on information contained in the Presentation including representations or warranties or in relation to the accuracy or completeness of the information, statements, opinions, forecasts, reports or other matters, express or implied, contained in, arising out or derived from, or for omissions from the Presentation including, without limitation, any financial information, any estimates or projections and any other financial information derived therefrom.

Forward-looking statements
The Presentation includes forward-looking statements and comments about future events, including the Company's expectations about the performance of its businesses. Forward-looking words such as "expect", "should", "could", "may", "predict", "plan", "will", "believe", "forecast", "estimate", "target" or other similar expressions are intended to identify forward-looking statements. Such statements involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company and which may cause actual results, performance or achievements to differ materially from those expressed or implied by such statements. Forward-looking statements are provided as a general guide only, and should not be relied on as an indication or guarantee of future performance. Given these uncertainties, recipients are cautioned to not place undue reliance on any forward-looking statement. Subject to any continuing obligations under applicable law, the Company disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statements in the Presentation to reflect any change in expectations in relation to any forward-looking statements or any change in events, conditions or circumstances on which any such statement is based.
No Limited Party or any other person makes any representation, or gives any assurance or guarantee that the occurrence of the events expressed or implied in any forward-looking statements in the Presentation will occur.

Past performance
Past performance is not indicative of future performance and no guarantee of future returns is implied or given.

Representations, warranties and acknowledgement
This document is provided to you in consideration of you making the statements set out below. By accepting this document, you:
- represent and warrant that you are a person to whom an offer of securities can be made without a disclosure document:
- in Australia, because of subsections 708(8), (10) or (11) of the Corporations Act; or
- in New Zealand, because you (i) are an investment business within the meaning of clause 37 of Schedule 1 of the Financial Markets Conduct Act 2013 (the FMC Act), (ii) meet the investment activity criteria specified in clause 38 of Schedule 1 of the FMC Act, (iii) are large within the meaning of clause 39 of Schedule 1 of the FMC Act, (iv) are a government agency within the meaning of clause 40 of Schedule 1 of the FMC Act or (v) are an eligible investor within the meaning of clause 41 of Schedule 1 of the FMC Act;
- You are either (a) not a "U.S. person" as that term is defined in Regulation S under the Securities Act, are not in the United States, and are not acting for the account or benefit of a U.S. person, or (b) a "qualified institutional buyer" as that term is defined in Rule 144A under the Securities Act;
- represent and warrant that you will act on the basis of your own investigations and analysis and place no reliance on this Presentation;
- acknowledge that this Presentation does not purport to contain all of the information that you may require for the purpose of making an investment in the Company, is not a prospectus and does not contain the same degree or standard of information as a prospectus, and has not been checked, verified or assessed for accuracy or completeness by external advisers, intermediaries or independent experts, nor by any party who has distributed those documents on behalf of the Company.
- no representation or warranty (express or implied) is made by the Company as to the accuracy, completeness, likelihood of achievement or reasonableness of any projections and forward looking statements in this presentation, nor of the assumptions on which the projections and forward looking statements are based, and projections and forward looking statements are not guarantees of future performance but are by their nature subject to significant uncertainties and contingencies. There can be no assurance or guarantee that such projections and forward looking statements will be realised; and
- acknowledge that the Company, and its related bodies corporate rely on you complying with this disclaimer and on the truth and accuracy of the representations and warranties given by you.

ISLAND PHARMACEUTICALS (ASX: ILA)

TWO PROGRAMS TARGETING INFECTIOUS DISEASES

- Two, well advanced clinical stage programs
- Major market potential via both programs
- Both assets have Priority Review Voucher potential
- Phase 2a/b PROTECT clinical trial in dengue complete
- FDA Animal Rule pathway actively advancing through new USAMRIID CRADA
- Multiple near term clinical trial, operational and regulatory catalysts

Company Overview

4 Per holding per Substantial interest notice lodged with ASX on 3 June 2025

Company Overview

- **Two clinical stage assets Galidesivir and ISLA101 - both with Priority Review Voucher potential based on approval**

- **Galidesivir**
  - Small molecule with broad antiviral activity against numerous high-priority threats
  - Robust development history with over US$70m in funding to-date from US government
  - Opportunity to leverage FDA's Animal Rule to fast-track approval in Marburg

- **ISLA101:**
  - Pre-clinical work at Monash University highlighted antiviral promise
  - 40+ Phase I, II and III human trials in cancer and respiratory diseases, and deemed safe by regulators
  - Small molecule with activity against all 4 dengue serotypes and other mosquito borne viruses
  - Successfully completed Phase 2a/b clinical trial in dengue infected subjects

- **Robust balance sheet allows for execution of program development**

The Filovirus Threat Landscape

AN URGENT AND GROWING GLOBAL SECURITY CHALLENGE

Extremely high fatality rates: Marburg up to 88%, Ebola up to 90%, Sudan up to 47%, Bundibugyo ~30%

Limited countermeasures: No approved therapeutics or vaccines for Marburg or Bundibugyo

BSL-4 pathogens: Require maximum containment; limited global capacity

Bioterror relevance: Historical weaponisation research; persistent intelligence concern

Current situation: Ongoing Bundibugyo outbreak with no available medical countermeasures

The US lacks a broad-acting antiviral capable of addressing multiple filovirus threats

The Preparedness Gap

THERE ARE NO FILOVIRUS THERAPEUTICS CAPABLE OF CROSS-STRAIN PROTECTION

- Existing Ebola countermeasures are strain-specific (Zaire only)
- No approved therapeutics for Marburg, Bundibugyo or Sudan virus
- Outbreaks increasingly involve rare or divergent strains
- Stockpile lacks a broad-acting antiviral with Animal Rule feasibility

GALIDESIVIR DIRECTLY ADDRESSES THIS GAP

Why Galidesivir?

A BROAD-ACTING ANTIVIRAL WITH STRONG FILOVIRUS EFFICACY AND A CLEAR FDA PATHWAY

- Demonstrated multi-filovirus activity (Marburg, Ebola, Sudan)
- Strong in vivo efficacy with delayed dosing
- FDA confirmed Animal Rule pathway is appropriate

- IV and IM formulations with favorable safety profile
- Manufacturing route improved with 2–3X yield increase
- Developed with NIAID and BARDA support (>US$70M historically)

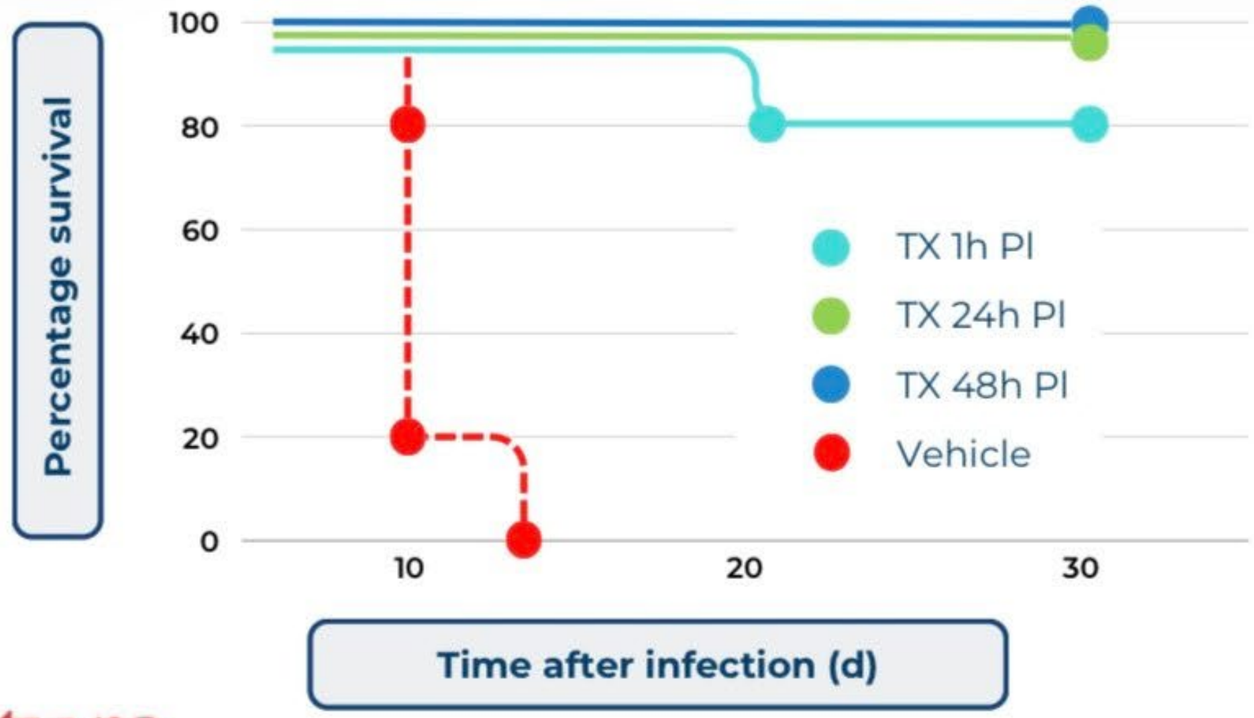
GALIDESIVIR IS ONE OF THE FEW ANTIVIRAL CANDIDATES WITH CREDIBLE PAN-FILOVIRUS POTENTIAL

Galidesivir Competitive Advantage

FEATURE	GALIDESIVIR	OBELDESIVIR	REMDESIVIR	MAFTIVIMAB	MBP134	CHADOX-BDBV	RVSV-BDBV-GP	MRNA-LNP BDBV
BROADEST SPECTRUM ANTIVIRAL ACTIVITY (FILOVIRUSES AND OTHER FAMILIES)	✓	✗	✗	✗	✗	✗	✗	✗
PEP AND TX FLEXIBILITY (IM/IV)	✓	✗	✗	✗	✗	✗	✗	✗
ROOM TEMP STABLE	✓	✓	✗	✗	✗	✗	✗	✗
SMALL MOLECULE	✓	✓	✓	✗	✗	✗	✗	✗
PHASE 1 HUMAN SAFETY DATA	✓	✓	✓	✓	✓	✓	✓	✓

MARBURG NHP SURVIVAL

94% survival in Marburg NHP Model with treatment initiated up to 48 hours post infection



- 6/6 animals survived when dosed 48 hours post infection
- 6/6 animals survived when dosed 24 hours post infection
- 5/6 animals survived when dosed 1 hour post infection

0/6 untreated animals survived as part of the control group

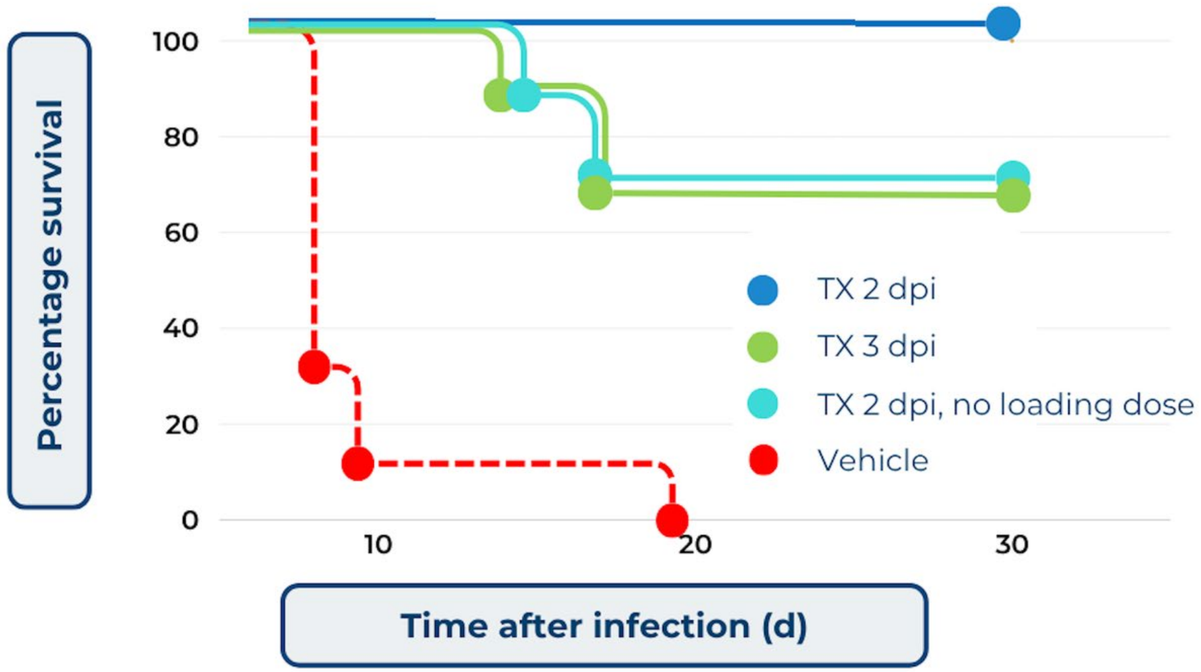
nature

This level of efficacy, with a clinically meaningful therapeutic window, is rare in filovirus models and directly supports IAR rule advancement

EBOLA NHP SURVIVAL

Robust efficacy in Ebola NHP model with delayed dosing

Survival of rhesus non-human primates challenged with Ebola virus following intramuscular administration of 100 mg/kg BID loading dose followed by 25 mg/kg BID for 10 days.



- 100% survival when treatment commenced 2 days post infection
- 67% survival when treatment commenced 3 days post infection
- 67% survival when treatment commenced 2 days post Infection with no loading dose

0% survival in untreated controls

Warren, T. K. et al. Efficacy of Galidesivir Against Ebola Virus Disease in Rhesus Monkeys. Poster Presentation ID Week 2017

Together with Marburg data, this positions Galidesivir as a multi-filovirus antiviral candidate

FDA alignment significantly de-risks regulatory pathway

Island has the potential to become to first Australian company to gain drug approval via the FDA's Animal Rule

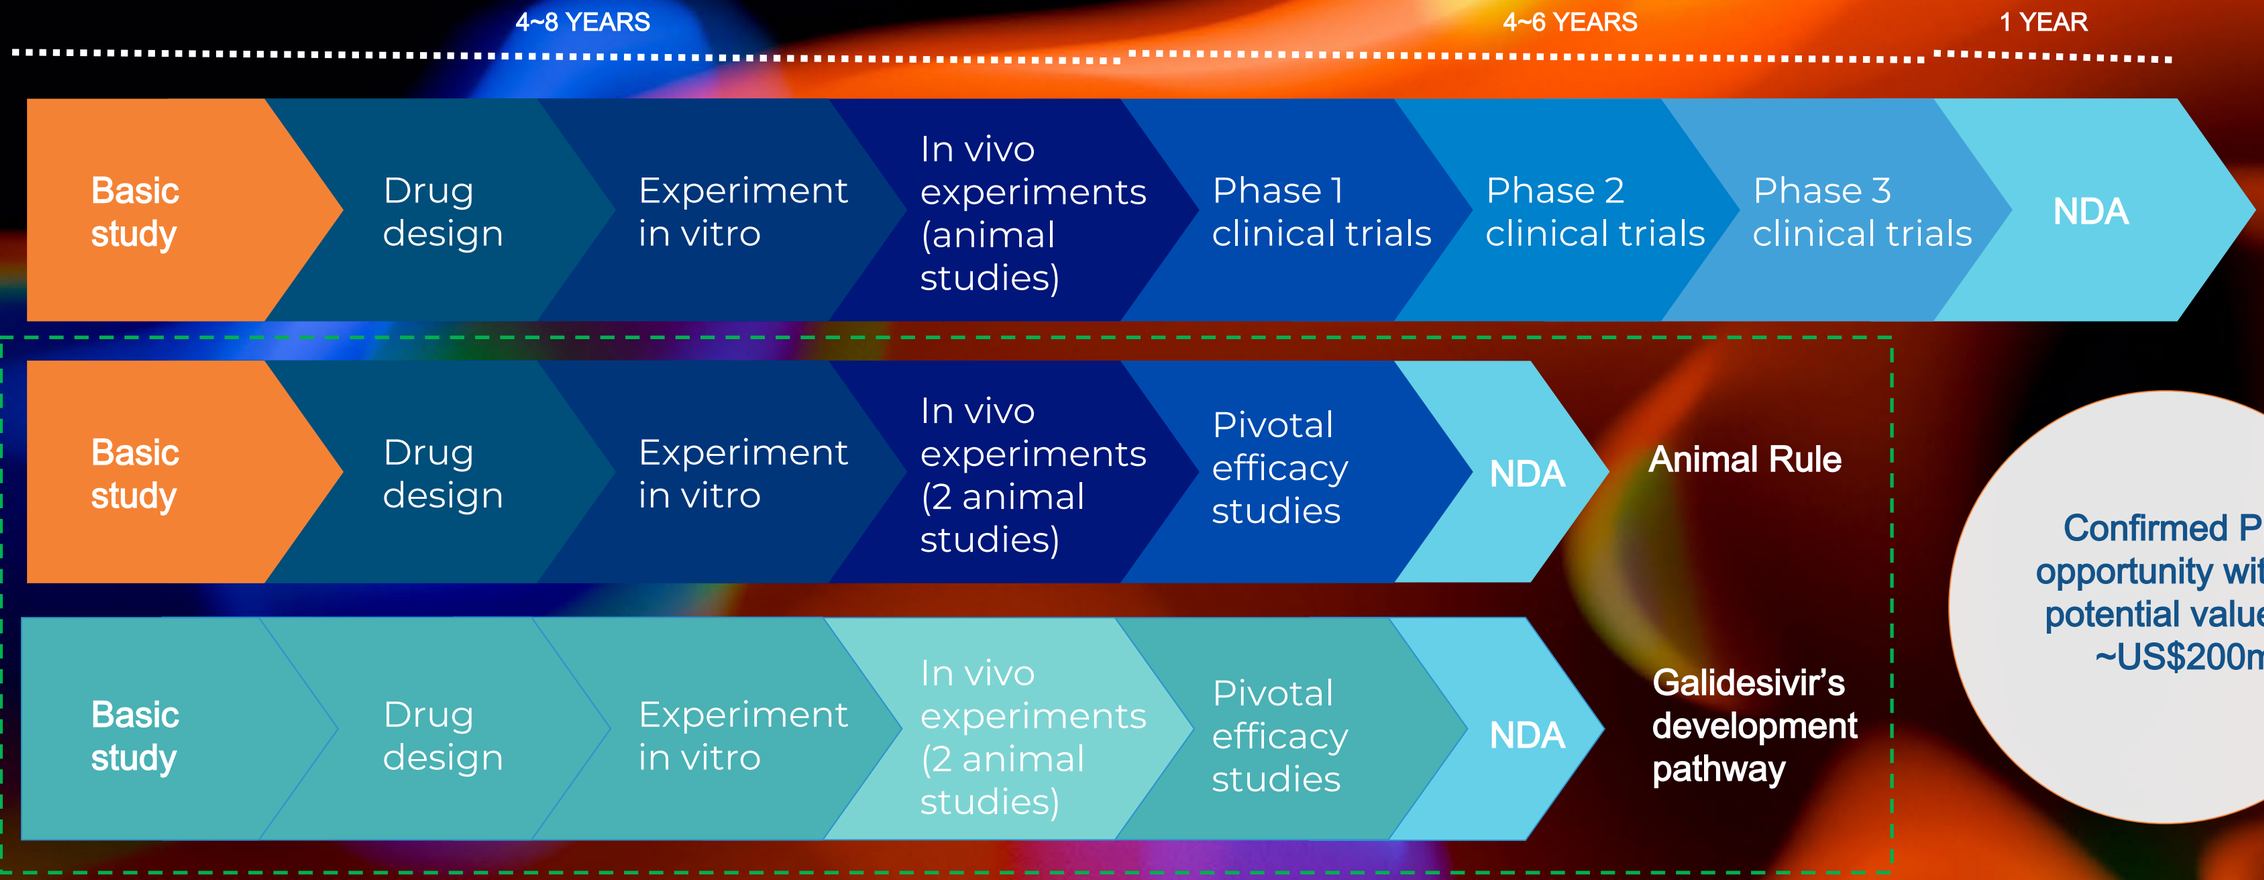
FDA confirmed the Animal Rule pathway is appropriate for developing countermeasures against Marburg virus

Clear guidance provided on clinical program design – enables Island to continue to engage with the FDA and finalise plans ahead of trial commencement

FDA advised that Galidesivir would qualify for a Tropical Disease Priority Review Voucher (PRV) on approval – Most recent PRV sold for US$200m

CRADA secured with USAMRIID to commence the next Galidesivir animal study in Marburg to advance clinical development pathway and potential approval

An Established Regulatory Pathway



Confirmed PRV opportunity with a potential value of ~US$200m

Island is now focused on advancing Galidesivir's clinical development pathway, which includes a dose optimisation study to commence shortly with USAMRIID

Expanded CRADA with USAMRIID

Agreement with US Army Medical Research Institute of Infectious Diseases and the Geneva Foundation to secured 23 non human primates and advance dose optimisation study

USAMRIID is the US Army's premier research institute and Biosafety Level 4 (BSL-4) facility for the study of infectious diseases and medical countermeasures against biowarfare threat agents

Amended CRADA confirms supply of 23 non-human primates and timeslot for dose optimisation study – Study to commence next quarter

Dose optimisation study designed to identify minimally effective dose required prior to pivotal confirmatory trial for potential FDA approval

Study to evaluate high loading dose on day one followed by various dose regimens and treatment initiations over five NHP cohorts

Expanded CRADA materially de-risks the Galidesivir program by securing non-human primate supply and working with one of the world's leading biodefence and high-containment infectious disease research organisations

NHP dose optimisation protocol

STUDY GROUP	# ANIMALS	GALDESIVIR DOSE	GALDESIVIR ADMINISTRATION (HR POST VIRUS EXPOSURE)	DOSING FREQUENCY	DISEASE BIOMARKER SPECIMEN COLLECTION	PK SPECIMEN COLLECTION	ENDPOINTS
1	4	0 MG/KG (VEHICLE CONTROL - 30MIN INFUSION)	24 HOURS	BID	DAY -14, 0 (PRE-CHALLENGE), 1, 2, 3, 4, 5, 7, 10, 14, 28	DAY -14, 0 (PRE-CHALLENGE); DAY OF FIRST TX (PRIOR TO TX; SIX INTERVALS POST TREATMENT TO MATCH PK CURVE); LAST DAY OF DOSING (PRIOR TO TX; SIX INTERVALS POST TREATMENT TO MATCH PK CURVE)	CLINICAL OBSERVATIONS, BODY WEIGHTS, FOOD CONSUMPTION, CLINICAL PATHOLOGY, VIREMIA (PCR AND PLAQUE ASSAY), BODY TEMPERATURE AND ACTIVITY, ANTATOMIC PATHOLGY (GROSS NECROPSY AND HISTOPATHOLOGY)
2	4	15 MG/KG (30MIN INFUSION)	24 HOURS	BID			
3	4	10 MG/KG (30MIN INFUSION)	24 HOURS	BID			
4	4	3 MG/KG (30MIN INFUSION)	24 HOURS	BID			
5	4	15 MG/KG (30MIN INFUSION)	48 HOURS	BID			

NOTE: Each active treatment group will be administered two loading doses of 100mg/kg BID, 30min infusion, on treatment day 1. Following the BID loading doses, each cohort will be administered the defined maintenance doses listed in Table 1.

Recent appointments strengthen clinical development

Combining deep Galidesivir expertise with extensive US biodefence and procurement experience to accelerate development, funding and commercialisation opportunities

Mark Herzog– Senior Global Health Security Advisor

- 25 years'+ experience in biodefence, biopharmaceuticals, government contracting and global health security initiatives
- Proven track record securing and managing US$100m+ government contracts across biodefence and medical countermeasure programs
- Extensive experience engaging with key US agencies including the DoD, HHS, BARDA and allied procurement organisations
- Former US pharmaceutical executive supporting multiple US biodefence and medical countermeasure initiatives
- · Executive Committee member of the Medical CBRN Defense Consortium (MCDC), a leading US biodefence organisation

Raymond Taylor- Senior Scientific Fellow

- Over 40 years' experience in drug development, antiviral therapeutics, biodefence and regulatory strategy
- Spent 19 years in senior leadership roles at BioCryst Pharmaceuticals, where Galidesivir was originally developed
- Direct historical experience with Galidesivir, including antiviral development, program execution and regulatory initiatives
- · Secured and managed over US$490m in US Government funding, including US$125m+ in Strategic National Stockpile procurement contracts
- Extensive expertise working with BARDA, NIAID, CDC and other US Government agencies in countermeasure development

Current Ebola outbreak highlights the opportunity

Emerging filovirus outbreaks continue to reinforce the importance of preparedness, rapid response capability and effective medical countermeasures

Active Ebola outbreak in East Africa:

- Budibugyo Ebola virus responsible for recent outbreak activity
- Highlights continued emergence of high-consequence threats
- Currently 101 dead and 550 confirmed cases

Governments continue to prioritise preparedness:

- Emerging outbreaks reinforce investment in biodefence
- There is an increasing focus on rapid-response countermeasures
- Island is actively engaging with industry participants to assist

Limited treatment options available:

- Existing countermeasure capabilities remain limited in Ebola
- Significant unmet need remains for broad-spectrum antivirals
- Global health agencies and governments are pursuing options

WHY GALIDESIVIR CAN BE THE DIFFERENCE:

- Designed to address high-consequence viral threats where treatment options remain limited
- Broad antiviral profile provides potential utility across multiple outbreak and biodefence scenarios
- Marburg development program provides the lead regulatory pathway, while creating optionality across other viral indications
- Increasing global focus on preparedness continues to support demand for effective medical countermeasures

Island is actively engaged in discussions with third parties to accelerate Ebola development and advancing engagement with key industry participants to expedite opportunities

Supply chain optimised to meet pending demand

Critical manufacturing and quality infrastructure being established to support FDA submission and future procurement opportunities

Manufacturing campaign commenced:

- Agreement with PI Health Sciences for a 5kg GMP manufacturing campaign
- Includes analytical method validation, reference standard preparation and stability studies
- GMP-grade Galidesivir to be delivered in the coming months
- Existing Galidesivir inventory available for planned dose optimisation studies

A transition to registration and SNS procurement:

- Establishing validated manufacturing, analytical and quality systems for late-stage development
- GMP product intended for planned pivotal initiatves under the FDA Animal Rule pathway
- Supports future regulatory submissions and government procurement initiatives
- Represents a key transition from development-stage asset to potential biodefence product

Supply for opportunities beyond Marburg:

- Maintains access to GMP-grade product for biodefence and outbreak response opportunities
- Supports engagement with government agencies and procurement stakeholders
- Broad-spectrum antiviral activity demonstrated across multiple high-consequence viral threats
- Enhances readiness to pursue opportunities with current and future outbreaks, including Ebola

Multiple commercialisation opportunities

Galidesivir has the potential to fill multiple gaps in the US government's biodefence stockpile

Virus	Cell culture data	Animal data	Non-human primate efficacy	PRV Eligible for first indication	Animal Rule Potentia	Strategic National Stockpile Potential
Marburg	✓	✓	✓	✓	✓	✓
Ebola	✓	✓	✓	✓	✓	✓
Sudan	✓			✓	✓	✓
Zika	✓	✓	✓	✓		
Chikungunya	✓			✓		

Animal Rule is a proven path for SNS inclusion

Company	Product	Year Approved	Disease Treated	SNS Sales (AUD)	Under SNS Contract
Emergent BioSolutions	raxibacumab	2012	Inhalational Anthrax	~$450M	Yes
Kaléo	AUVI-Q	2012	Anaphylaxis (emergency countermeasure)	~$100M+	No (contract expired)
Emergent BioSolutions	BioThrax	2015	Anthrax (prophylactic vaccine)	~$1.2B+ (multi-year)	Yes
Elusys Therapeutics	Anthim	2016	Inhalational Anthrax	~$320M	Yes
SIGA Technologies	TPOXX	2018	Smallpox	~$850M+ (ongoing)	Yes
Paratek Pharmaceuticals	Nuzyra	2018	Anthrax (post-exposure prophylaxis)	~$120M (partial uptake)	Yes (limited scope)
varian Nordic	Jynneos	2019	Smallpox / Monkeypox	~$300M+	Yes
imerix	Tembexa	2021	Smallpox	~$400M	Yes

Since 2012, the FDA's Animal Rule approval has led to 8 bioterror countermeasures joining the US Strategic National Stockpile (SNS)

In 7 out of 8 cases, these medical countermeasures continue to remain under SNS contract and have generated 'lifetime sales' of between US$100m - US$1.2Bn at an average of US$467m

~US$600m has been provided through grants to develop a Marburg countermeasure with no tangible results

Marburg is the only Category A biothreat that has no treatment presently available in the Strategic National Stockpile

FDA approval of Galidesivir in Marburg provides a significant opportunity for a Priority Review Voucher as well as a multi-year SNS contract
