Mineral Hill Operational Update & Capital Raising

Kingston Resources Limited (**ASX: KSN**) (**Kingston** or the **Company**) provides the following update on the mining operations at Mineral Hill, a planned drilling program and capital raising.

Pearse South Open Pit Update

On 1 June 2026, site personnel identified a wall failure in the Pearse South open pit. As tension cracks were visible in the access ramp open pit mining was immediately suspended. All personnel were kept safe and all equipment was removed from the pit. Over the subsequent days, the tension cracks continued to open resulting in vertical slumping of the access ramp, rendering it unsafe for use. Due to the limited scale of the pit there is only one access ramp.

This is the second geotechnical incident at the Pearse South open pit. The first incident occurred in late 2025 in the northern end of the pit.¹ The Pearse South open pit was scheduled to be mined for another four (4) months and produce approximately 100,000 tonnes of ore before closure.

Kingston has undertaken an intensive technical assessment of the incident, including engaging external geotechnical experts. The instability has been attributed to a soft graphitic shale recently uncovered in the base of the pit that has interacted with structures and been exacerbated by rainfall. Use of the existing ramp has been deemed unsafe. Before any re-entry to the pit can be considered, stabilisation of the ramp and impacted area is required. Potential remediation options would take several weeks and a ramp redesign would sterilise a material amount of the remaining ore.

Kingston has evaluated the potential restart of mining the Pearse South open pit and it is now evident that the risks and costs of regaining access outweigh the benefits of mining the remaining ore at this time. The graphitic shale has also been attributed with poor metallurgical recoveries during the quarter.

On this basis, Kingston will not resume mining the Pearse South open pit.

See Appendix A for images of the Pearse South pit.

Mineral Hill Strategic Pivot

After careful consideration of the optimal approach to realising the value of the Mineral Hill underground and having regard to the cashflow impact of mining cessation at Pearse South, the Kingston Board has made the decision to pause underground development and delay commencement of underground production in favour of undertaking an intensive resource and near mine exploration drilling program.

¹ See KSN ASX announcement dated 22 January 2026 - KSN Quarterly Activities Report 31 December 2025.

Mineral Hill's long-term value has always been centred on realisation of the high grade polymetallic underground deposits via the fully approved processing plant located in the highly prospective Cobar basin.

The Company's immediate work plan comprises:

- **25,000m of infill and extensional drilling** – utilising a full-time underground diamond rig with surface diamond and RC rigs for step-out drilling focused on
 - Southern Ore Zone (SOZ) – extensions in G/H Lode and Upper A Lode areas.
 - SOZ Footwall discovery and further depth extensions.
 - Jack's Hut – down-dip and along strike extensions.
 - Jack's Hut-Iodide Link Zone – southern continuation of Jack's Hut.
 - Jack's Hut – EOZ Link Zone – test near-surface potential.
 - Parker's Hill East – test potential new target.
- **Mineral Resource updates** – for the Southern Ore Zone (SOZ) and Jack's Hut to grow the underground Measured and Indicated Resources;
- **Plant expansion studies** – to evaluate and support an expanded operation targeting 700ktpa ; and
- **Delivery of a larger Ore Reserve** - to support underground mining and processing plant restart and underpin the future expansion potential of Mineral Hill.

The work plan is designed to grow the underground Mineral Resource and Ore Reserves to support a larger operation with an extended mine life, and a clear pathway to increase the production rate.

People Impact

As part of Kingston’s strategic pivot, the Company staffing requirements will materially change. Kingston will retain approximately 24 site personnel for an interim period with approximately 120 redundancies and the loss of 18 contractors. Employee entitlements and redundancies will be paid in full and the Company will support personnel with the transition. Kingston is working closely with all impacted employees and providing regular updates. Kingston recognises that this situation will impact many people and we are committed to supporting all employees through this period. An Employee Assistance Program (EAP) is available for confidential counselling and support.

Cashflow Impact

The estimated costs of the open pit closure, redundancies and fleet demobilisations are estimated at \$5 million over the coming months. The Pearse South open pit closure has resulted in an estimated gross revenue reduction of approximately \$39 million through the June to September period.

The Company confirms it currently has \$9.45 million in unrestricted cash and will receive a \$10 million cash payment in July via deferred consideration from the sale of the Misima Gold Project². The Company also holds \$7.4 million in restricted cash for the environmental bonds.

² See KSN ASX announcement dated 11 July 2025 – Kingston Receives \$50 million from Misima Divestment.

Strategic Value

Mineral Hill continues to hold strategic value, it is fully permitted, with processing (flotation & CIL), and multi-metal production capability. Located in the proven NSW mining district, Mineral Hill benefits from established infrastructure being one of only two polymetallic plants in the region. Kingston intends to undertake engineering studies on a potential plant expansion up to 700ktpa during FY27, following the commencement of a ~25,000m drilling program to unlock the maximum value from its existing infrastructure and strategic location.

Capital Raising

To support the strategy and new work plan, Kingston is undertaking a capital raising to raise approximately \$11.6 million (before cost), comprising:

- a firm commitment for a \$2.55 million placement (before costs) to investors including Kingston's largest shareholder Farjoy via the issue of approximately 36.4 million new Kingston shares at an issue price of \$0.07 per share (**Issue Price**)(**Placement**); and
- an fully underwritten non-renounceable entitlement offer to raise approximately \$9.1 million (before costs) via the issue of approximately 129.5 million new Kingston shares at the Issue Price (**Entitlement Offer**), (the Placement and Entitlement Offer together, the **Capital Raising**).

The Placement shares will be issued under the Company's existing capacity to issue securities under ASX Listing Rule 7.1.

The Issue Price represents a:

- 19.5% discount to the last closing price of \$0.087 as at 1 June 2026; and
- 18.9% discount to the 5-day VWAP of \$0.086 up to and including 1 June 2026.

Kingston will offer the opportunity to participate in the Entitlement Offer on the basis of two (2) new Kingston shares for every thirteen (13) existing Kingston shares held at the record date.

Only Kingston shareholders with a registered address in Australia, New Zealand, the European Union (excluding Austria), Hong Kong and Singapore will be eligible to participate in the Entitlement Offer (**Eligible Shareholders**).

The proposed record date for the Entitlement Offer is 5:00pm AEST on Tuesday, 23 June 2026 (refer to the Indicative Timetable set out below for further information).

The Entitlement Offer is non-renounceable, meaning that the rights cannot be traded on the ASX and are not otherwise transferable. New shares issued under the Placement and Entitlement Offer will rank equally with the Company's existing shares.

Further information on the Entitlement Offer will be contained in an offer booklet, scheduled to be despatched to Eligible Shareholders on Friday, 26 June 2026. Eligible Shareholders should consider the offer booklet carefully before deciding whether to participate in the Entitlement Offer and consult with their professional advisers if they have any queries.

Argonaut Corporate Finance Limited (**Argonaut**) has agreed to fully underwrite the Entitlement Offer pursuant to an underwriting agreement entered between Argonaut and the Company. The obligations of Argonaut to underwrite the Entitlement Offer are subject to the satisfaction of certain conditions precedent. A summary of the conditions precedent and termination events is set out in Annexure 1 to this announcement.

In addition, Farjoy has agreed to sub-underwrite the Entitlement Offer up to a maximum of \$8.0 million. Mick Wilkes, the Chairman and Stuart Rechner, Non-Executive Director have committed to take up their entitlements in full, representing approximately 0.9 million shares for approximately \$65k.

The Offer Booklet will contain a shortfall dispersion policy which will include the ability of Eligible Shareholders to apply for additional shares, subject to pro rata scale-back relative to the applicant's shareholding if the applications by Eligible Shareholders for additional shares is oversubscribed, and, if determined appropriate, based on the quantum of any remaining shortfall, an institutional placement undertaken by the underwriter to institutional/exempt investors (at the discretion of the Company), prior to allocation to sub-underwriters and then the underwriter pursuant to the underwriting agreement.

Farjoy presently has an interest in approximately 17.6% of the shares in the Company, and following the Placement will have an interest in approximately 19.7% of the shares in Kingston on an enlarged basis post the Placement. If no Eligible Shareholders were to take up their entitlements and the maximum shortfall of \$8.0 million was allocated to Farjoy, the maximum voting power of Farjoy would increase to approximately 28.5%.

Use of Proceeds

The Capital Raising proceeds will be applied towards drilling, delivering Mineral Resource and Ore Reserve updates, redundancy and fleet demobilisation costs, care and maintenance costs and general working capital purposes.

Advisers

Argonaut is acting as Underwriter in respect of the Entitlement Offer. Argonaut Securities Pty Ltd is acting as Lead Manager on the Capital Raising. HopgoodGanim is acting as legal adviser to the Company on the Capital Raising.

Kingston Resources Managing Director and CEO, Andrew Corbett comments:

“These are disappointing circumstances for the Company as we were preparing to realise the value of the work we had put in to developing the Mineral Hill operation for over four years. The safety of our people is our highest priority and not something we will compromise.

I want to acknowledge and apologise for the impact on our local stakeholders, shareholders, employees and the township of Condobolin. The Kingston board has made a difficult decision which will ensure value protection for shareholders and provide the basis of a long-life mining operation at Mineral Hill.

We remain committed to Mineral Hill and the local community.

Importantly, the underground has always been the long-term future of Mineral Hill, and we are now moving at speed to expand the Resource and Reserves and overall potential of the underground operations. We are confident this is the best strategy to build a stronger, more resilient Mineral Hill that delivers lasting value for our shareholders, our people and our local communities.”

This new direction provides an opportunity to reset and realise the full potential of Mineral Hill through the drill-bit. We are undertaking the first large-scale exploration program since the 1980’s, providing the pathway to materially increase our underground resource and reserve base and derisk the restart of an enlarged, long-life copper and gold focused operation at Mineral Hill.

Our vision is to expand the Mineral Hill processing rate towards 700ktpa and beyond to realise the full potential of our assets and this work plan will assist us to deliver on this vision”

Competent Persons Statement and Disclaimer

The information in this report that relates to Exploration Results and Mineral Resources is based on information compiled by Mr. Stuart Hayward BAppSc (Geology) MAIG, a Competent Person who is a member of the Australian Institute of Geoscientists. Mr. Hayward is an employee of the Company. Mr. Hayward has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr. Hayward confirms that the information in the market announcement provided is an accurate representation of the available data and studies for the material mining project and consents to the inclusion in this report of the matters based upon the information in the form and context in which it appears.

The Competent Person signing off on the overall underground SOZ Ore Reserves Estimate is Mr Steven Weckert BE ME (Min) CP, of Australian Mine Design and Development Pty Ltd, who is a Member of the AusIMM and who has sufficient relevant experience in operations and consulting for underground metalliferous mines. Mr Weckert consents to the inclusion in this report of the information pertaining to the Mineral Hill SOZ Ore Reserve in the form and context in which it appears.

The Mineral Hill Mineral Resource estimates included in this announcement were released in ASX announcements on 15 March 2023 (Pearse South), 21 March 2023 (Jack's Hut) and 13 November 2025 (Southern Ore Zone, Red Terror and Parkers Hill). The Ore Reserve estimate outlined below was released in ASX announcements on 30 September 2024 (Southern Ore Zone). Further information is included within the original announcements.

Kingston is not aware of any new information or data that materially affects the information included in this announcement. All material assumptions and technical parameters underpinning the Mineral Resource estimates and production targets continue to apply and have not materially changed.
