

## **DRILLING COMMENCED AT BYROCK COPPER GOLD PROJECT, MACQUARIE ARC - NSW**

Figure 1 - Drilling Commenced at the Byrock Project, NSW; UDR1000 drill rig pictured - Resolution Drilling (NSW)

### **SUMMARY**

- **RC drilling has commenced: 2,300m program underway to test three (3) highest priority Pipe Targets at the Byrock Project, NSW**
- Drilling is testing concealed porphyry-style targets beneath shallow cover within Altitude's interpreted north-west segment of the Macquarie Arc
- The program is being conducted in collaboration with Altitude's project partner Nimrod Resources Ltd, under the Byrock Project Earn-in and JV agreement
- Drilling is expected to be completed in June (weather dependent)
- The Company intends to report laboratory results

*"With drilling now commenced at Byrock, Altitude is moving from target definition to drill testing of concealed porphyry-style systems beneath shallow cover on the Company's interpreted extension of the Macquarie Arc.*

*The program is designed to test pipe-like geophysical targets in a disciplined, cost-effective manner, and we look forward to updating shareholders on the results."*

**Operational**

The program is being operated by project partner Nimrod Resources Ltd in collaboration with Altitude's geology team as part of the Earn-in and JV agreement between Altitude and Nimrod. Drilling has commenced using a UDR1000 multi-purpose rig supplied by Resolution Drilling (NSW). The planned RC program comprises approximately 2,300m to test three high-priority Pipe Targets. See ASX Announcement from 6 February 2026 for details of the Earn-in and JV arrangements. The UDR1000 rig can switch to diamond core drilling if ground conditions require it, and contingency planning has provided the necessary equipment on site to ensure targets are effectively tested.

**Altitude Minerals Ltd****Unlocking shareholder value with high-quality discoveries**

Altitude Minerals Ltd (**ASX: ATT**) (**Company** or **Altitude**) (formerly Copper Search Ltd) is an ASX-listed explorer with a pipeline of large-scale drill targets across multiple projects and commodities, most of which are all within geological domains containing established profitable mines. The key to executing Altitude Minerals' strategy is successfully identifying the best drill targets that can be made ready for drill testing with only a few months of low-cost fieldwork.
