icetana AI secures first sales of new product offering Antara Core for \$617,000

Highlights:

- icetana AI has received its first two orders for Antara Core, its new on-premise AI software solution for surveillance networks.
- The orders are from strategic partner Millennium Services Group Pty Ltd ("Millennium"), with a combined value of \$617,000 over five years, billed as software-as-a-service ("SaaS") and paid up front.
- Antara Core extends icetana AI's existing self-learning security software platform to deliver on-premise generative AI capabilities — providing enterprise customers with a privacy-controlled alternative to cloud-based AI services such as OpenAI
- It is also the Company's first sale of its floor hazard detection offering.
- Millennium is a security and cleaning services operator in which icetana AI's strategic partner and significant shareholder SoftBank Robotics holds a controlling stake. These first orders represent two of the over 100 shopping centres Millennium services in Australia and New Zealand.

icetana Limited (ASX:ICE "icetana AI" or "the Company"), a company building self-learning security AI software designed for large-scale surveillance networks and Security Operations Centers, has received two orders for its Antara Core software from Australian security and cleaning services operator Millennium Services Group.

First sale of Antara Core

This is the Company's first commercial sale of Antara Core, icetana AI's new on-premise AI solution for surveillance networks. Antara Core extends the Company's existing self-learning security software platform to deliver on-premise generative AI capabilities — providing enterprise customers with a privacy-controlled alternative to cloud-based AI services such as OpenAI. This first deployment is expected to save Millennium up to approximately \$4 million in AI costs per year.

For personal use only

This sale also marks the first commercial deployment of icetana AI's floor hazard and slip-and-fall detection solution, a tool designed to help shopping centre operators reduce incidents, limit liability, and lower insurance premiums.

Millennium is one of Australia's largest national integrated service providers, delivering security and cleaning services to over 100 major shopping centres across Australia and New Zealand. SoftBank Robotics, icetana AI's strategic partner and significant shareholder, holds a majority stake in Millennium.

The first order has an aggregate value of \$199,000 and is for an initial contract term of 60 months. The end user is a large retail shopping centre in northeast Queensland of over 107,000sq metres and 345 shops, an existing user of icetana AI (a previous \$376,000 sale to this end user was announced 23 October 2025).

The second order has an aggregate value of \$419,000 and is for an initial contract term of 60 months. The end user is a large retail shopping centre in New South Wales, and one of the largest malls in the southern hemisphere.

CEO Comment

Chief Executive Officer Kevin Brown said:

"We are pleased to announce the first sale of Antara Core, which delivers on-premise generative AI capabilities purpose-built for large-scale surveillance environments. This product addresses a genuine gap in the market — customers who need the power of AI but require it to operate securely within their own infrastructure, without reliance on external cloud services.

"This sale also reflects the strength of our partnership with SoftBank Robotics and Millennium Services Group in our home market of Australia, and we look forward to expanding Antara Core's footprint across their broader portfolio of sites."

Material terms of commercial arrangements:

- The contractual arrangement disclosed in this announcement is between icetana AI and Millennium Services Group Pty Ltd.
- Licensing will begin on 30 June 2026 for the Queensland site and 1 September 2026 for the New South Wales site.
- Payment terms are five years in advance, with initial payment due 30 days from invoice.
- The order is for a total contract value of \$198,800 + GST (Queensland site) and \$418,545 + GST (New South Wales site), each covering a 60 month period, adding a total of \$123,000 to the Company's annual recurring revenue. Ongoing revenues beyond this initial period will be subject to a customer renewal. Going

forward it is therefore possible that no revenue over and above the initial order value materialises pursuant to this commercial arrangement.

About icetana AI

icetana AI develops self-learning security AI software designed for large-scale surveillance networks and Security Operations Centers. Its advanced AI technology continuously learns what is normal for every individual camera and automatically detects, highlights, and reports unusual or potentially dangerous events in real time.

Traditional security monitoring requires human operators to watch thousands of video streams, an overwhelming and inefficient task. icetana AI replaces much of this manual effort by providing autonomous, real-time event detection, significantly reducing security risks while lowering personnel requirements.

Built for scale, icetana AI eliminates the need for manual rule configuration or camera stream setup. Its self-learning approach adapts dynamically to each environment, making it ideal for complex, multi-site deployments such as retail, hospitality, public safety, transportation, education, and enterprise infrastructure.

Today, icetana AI's technology operates globally, deployed across 70+ sites, 19,000+ cameras, and in 15+ countries, providing continuous, intelligent monitoring that empowers organisations to stay secure, proactive, and efficient.

Forward-looking statements

This announcement may contain forward-looking statements. Forward looking statements include those containing words such as: "anticipate", "believe", "expect", "estimate", "should", "will", "plan", "could", "may", "intends", "guidance", "project", "forecast", "target", "likely", "continue", "objectives" and other similar expressions within the meaning of securities laws of applicable jurisdictions and include, but are not limited to, certain plans, strategies and objectives of the Board and other matters. Any forward-looking statements, opinions and estimates provided in this announcement are

For personal use only

based on assumptions and contingencies which are subject to change without notice and involve known and unknown risks and uncertainties and other factors which are beyond the control of icetana and its officers, employees, agents, associates and advisers. Forward looking statements are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Readers are cautioned not to place undue reliance on forward-looking statements. Actual results may differ materially from those expressed or implied in such statements. Except as required by law or regulation (including the ASX Listing Rules), icetana undertakes no obligation to update these forward-looking statements or to provide any other additional or updated information whether as a result of new information, future events or results or otherwise.

To the maximum extent permitted by law, icetana and its officers, employees, agents, associates and advisers do not make any representation or warranty, express or implied as to the currency, accuracy, reliability or completeness of any forward-looking statements, or the likelihood of fulfilment of any forward-looking statement, and disclaim all responsibility and liability for the forward-looking statements (including, without limitation, liability for negligence). There can be no assurance that actual outcomes will not differ materially from these forward-looking statements.

The forward-looking statements are based on information available to icetana as at the date of this announcement.
