### Commentary:

Following the sale of all the assets of USCOM Limited, the operational activities of the Company are minimal and directed at maintaining the Company for sale and strategic re-listing to optimize shareholder value.

Uscom Limited remains ASX-listed although suspended awaiting restructure. We remain active in seeking partners to revitalize the Company but global geopolitics have not been helpful. We have been in active discussion with a number of potential Uscom Limited investors, and these discussions remain ongoing. We are optimistic regarding next steps. Uscom Limited shareholders remain as owners of the Company and will benefit from any restructure. Although the Company has no material tangible assets, it does hold ~\$23M AUD in carry forward tax losses which may be partly used after any restructure.

Global markets remain challenging and thus limit creative opportunities to regenerate dormant vehicles. Additionally, the process of suspension is resource consuming so pragmatic decisions will need to be made at some time in the event the current negotiations are unsuccessful.

Uscom manufactures and markets the world leading **USCOM 1A**, the Uscom **BP+**, and the Uscom **SpiroSonic** digital multi-channel ultrasonic spirometry technologies into global markets addressing cardiovascular and pulmonary diseases.
