

DELOREAN AWARDED ADDITIONAL \$1.66 MILLION ARENA GRANT FOR SA1 SALISBURY FACILITY

Delorean Corporation Ltd ("Delorean" or "the Company") is pleased to announce it has been awarded an additional grant funding commitment of \$1.66m exclusive of GST under its existing grant funding agreement with the Australian Government's Australian Renewable Energy Agency ("ARENA") for the SA1 Salisbury bioenergy facility, currently under construction in Edinburgh Parks, South Australia. This brings total ARENA support for the project, provided under ARENA's National Industrial Transformation Program, to \$7.74 million, from the previously awarded \$6.08 million.

The additional funding reflects unanticipated project scope refinements identified after execution of the original Funding Agreement and during progression into detailed design, procurement and construction. These refinements include upgrades to the facility's biomethane production and gas injection systems, wastewater treatment infrastructure, biogenic CO₂ recovery systems, and associated civil, engineering and compliance requirements. The enhanced scope reflects evolving regulatory, technical and offtake requirements that emerged during detailed design and project delivery. The ARENA grant payments fund Delorean's costs to support the facility's ability to meet the Project objectives to produce and upgrade biogas into mains-grade biomethane and biogenic CO₂.

Construction of the flagship Build-Own-Operate SA1 Salisbury project continues to progress, bringing the Company closer to first renewable gas production and the delivery of long-term environmental and economic benefits to South Australian industry.

SA1 Salisbury Bioenergy Facility Construction

Authorised on behalf of the Delorean Corporation Board of Directors by Hamish Jolly, Executive Chair.

About SA1 Salisbury Bioenergy Plant

The SA1 Salisbury Bioenergy plant is 100% Delorean Corporation owned and strategically located in the Northern Adelaide Food Park in Edinburgh Parks (metropolitan Adelaide) in South Australia on land owned by Delorean. The project is currently in construction.

Stage 1 of the project will process 70,000 tonnes per annum of organic waste streams for the nominal production of up to 210 TJ per annum of renewable natural gas (biomethane) exported to the Adelaide's Gas network, under a gas offtake agreement to Australian Gas Infrastructure Group ("AGIG"). In Stage 2 (potential future expansion), there is the potential for extension to 125,000 tonnes per annum under the current development approval.

The SA1 Project will produce 6 different products and revenue streams, including Renewable Natural Gas (Biogenic Methane), renewable food grade liquid CO₂ (Biogenic LCO₂), Carbon Credits (ACCUs), Renewable Gas Guarantees of Origin (RGGOs), Liquid Fertilisers and Gate Fees.

About Delorean Corporation Limited

Delorean Corporation is a leading Australian bioenergy company. Delorean specialises in the design, build, ownership and management of bioenergy infrastructure. Delorean Corporation is a vertically integrated company positioned in two high growth industries; renewable energy and waste management.

Delorean Corporation comprises an Engineering Division, Infrastructure Division and Energy Retail Division. Through these divisions Delorean Corporation has the inhouse capability to deliver bioenergy projects across the full lifecycle, from project conception to completion, processing organic waste, generating renewable energy and monetising the sale of green electricity, heat and gas.

DEL's projects produce renewable energy whilst reducing the volume of waste going to landfill, utilising a model that generates multiple revenue streams.
