

ASX RELEASE

22 June 2026

Extension of Mobile Speed Camera Contract in New South Wales

Highlights

- Acusensus has entered into a Deed of Variation with Transport for New South Wales (TfNSW) to extend its Mobile Speed Camera Services Agreement for an initial six month period, with an additional six-month option available.
- The value associated with the first six month period is approximately \$16 million (excluding GST).

Acusensus Limited (ASX:ACE) (**Acusensus**), a technology company designing and developing artificial intelligence enabled road safety solutions, is pleased to announce the extension of its existing Mobile Speed Camera Services Agreement with Transport for New South Wales (**MSC Services Agreement**).

The original MSC Services Agreement was due to expire on 30 June 2026. This Deed of Variation provides for a six-month extension of the contract term, commencing 1 July 2026 and expiring 31 December 2026. TfNSW retains an option to extend the MSC Services Agreement for a further six-month period from 1 January 2027.

The contract value associated with each extension period of six months is expected to be approximately \$16 million (excluding GST).

The tender process for a new long-term mobile speed camera services contract with TfNSW remains ongoing.

Acusensus Founder and Managing Director, Alexander Jannink, said:

“We are pleased to have agreed this extension with TfNSW, which allows the MSC program to continue to deliver important road safety outcomes for the people of New South Wales.”

About Acusensus

Acusensus is a technology company that was founded in 2018 with a mission to design and develop artificial intelligence enabled road safety solutions. Collaborating with governments and commercial stakeholders to tackle distracted driving globally is Acusensus' first priority. Acusensus has pioneered intelligent solutions that provide anywhere, anytime digital evidence that can be used in conjunction with law enforcement to drive behavioural change and improve road safety. Acusensus technology is used to detect and provide prosecutable evidence of distracted driving (mobile phone use), seatbelt compliance, speeding, railway crossing compliance and the monitoring of vehicles of interest.

Leveraging AI and sensing expertise, Acusensus also provides technology that protects workers in live traffic environments. The Forsite by Acusensus road worker safety system integrates roadside sensors, connected wearables and real time analytics to give crews early warning of approaching vehicle risks, delivering the vital seconds needed to avoid harm while generating data that helps make worksites safer over time.

Acusensus listed on the Australian Securities Exchange in January 2023. Acusensus is headquartered in Melbourne, Australia, with offices also in Sydney, Brisbane, Perth, Auckland (New Zealand), Wellington (New Zealand), Christchurch (New Zealand), London (United Kingdom), Las Vegas Nevada (United States) and Hartford Connecticut (United States).
