\$6.0m chemistry contract secured with Newmont

SciDev Ltd (ASX:SDV) ("the Company") is pleased to announce it has secured a three-year contract, with a one-year extension option, with Newmont to supply their Boddington Gold Operations in Western Australia with MaxiFlox® chemistry and OptiFlox® dose control technology.

Highlights

- Boddington is one of Australia's largest producing gold and copper mines, located 130km southeast of Perth, Western Australia.
- The contract is expected to generate ~\$6.0 million in sales over the three-year term for the supply of MaxiFlox® flocculant chemistry, OptiFlox® dose control technology, and technical services, with an option to extend for a further one-year period.
- Sales are expected to begin in early 1H FY27 and are anticipated to generate ~\$2.0 million in revenues per annum over the duration of the contract.

SciDev's Process Chemistry business focuses on the development and supply of a range of advanced flocculant chemistry that allows clients to enhance metal extraction, recover and recycle water, improve operational efficiencies, and reduce their environmental footprint.

Todd Scott, Chief Executive Officer of SciDev Ltd, said "Securing a multi-year contract with an operator of Newmont's calibre is a significant endorsement of our chemistry and dose control technology. This win is a tangible example of our strategy to build a market-leading, integrated water solutions platform that combines engineering, chemistry, data & optimisation. It also supports our goal to grow long-term recurring revenue and improve the stability of our earnings base."

The Board of SciDev Limited authorises this announcement.
