

MARKET RELEASE (ASX:RDY)

ReadyTech selected as the Student Management System platform provider for the Victorian TAFE Network

29 June 2026 – ReadyTech Holdings Limited (ASX:RDY) (**ReadyTech** or **Company**), is pleased to announce it has been selected as the Student Management System (SMS) platform provider for the Victorian TAFE Network, following a competitive tender process.

Terms of the contract

At this stage, there are no committed contract values or mandated rollout timelines, and any future implementation will be subject to further scoping, approvals and customer requirements. No revenue has been contracted as part of this announcement.

The contract has been entered into for an initial term of 5 years.

The Company will provide further updates to the market as and when material commercial arrangements are finalised.

Selection process

The selection by the Department of Jobs, Skills, Industry and Regions, represents a significant expansion of ReadyTech's longstanding engagement with Victoria's TAFE sector, building on existing partnerships with the three Victorian TAFEs – Bendigo Kangan Institute, Chisholm Institute and Melbourne Polytechnic.

It positions ReadyTech as a long-term technology partner to support one of Australia's largest vocational education systems which delivers training to over 170,000 TAFE students annually.

ReadyTech's selection is intended to provide a 'common platform' of Student Management capability for the Victorian network of 11 TAFE Institutes, with implementation to be considered and progressed through further negotiations with the individual TAFE Institutes.

This milestone follows a multi-year, co-designed partnership between ReadyTech and the three existing customer TAFEs, established after a landmark platform selection several years ago. Through close collaboration, the parties have designed and evolved a student management platform purpose-built for modern TAFE delivery, transforming the student journey and enabling a scalable, efficient and network-wide approach to digital transformation.

ReadyTech's platform has also been shaped to support the increasing convergence of vocational education and higher education, recognising that many Victorian TAFE institutes now deliver higher education programs alongside traditional VET offerings.

The selection aligns with the Independent Review of the Victorian Public Service (June 2025), which highlighted the role of modern, interoperable platforms in improving service quality,

sustainability and efficiency, including the potential for shared student platforms to enhance consistency and learner outcomes across Victoria.

Marc Washbourne, CEO and Co-Founder of ReadyTech, said about the selection:

"This selection validates our long-term investment in an enterprise-grade education platform capable of supporting system-level transformation. What began as a co-designed partnership with Bendigo Kangan Institute has evolved into a platform now recognised as fit to support the future of the Victorian TAFE Network, and we are proud to be trusted as a long-term technology partner in this important work."

"I would like to commend the Victoria Government for its clear, future-focused leadership in advancing a transformative agenda for the Victorian TAFE Network. Vocational education is critical to Victoria's economy and workforce capability, and delivering change at this scale requires strong coordination and shared direction."

– ENDS –

This announcement has been authorised for release by the Board of Directors of ReadyTech Holdings Limited.
