

DXN Wins \$1M Pacific Telecoms Infrastructure Contract

DXN Limited ("DXN" or "the Company"), a prefabricated modular data centre specialist, is pleased to announce it has been awarded a contract valued at approximately AUD \$1.0million by the American Samoa Telecommunications Authority (ASTCA) for the design, manufacture, delivery and commissioning of a Cable Landing Station (CLS).

Key Highlights

- **Awarded a A\$1.0 million contract by ASTCA for the design, manufacture, delivery and installation of a CLS**
- **DXN selected for its expertise in delivering complex prefabricated critical infrastructure**
- **Project supports the expansion and resilience of telecommunications infrastructure in American Samoa and further strengthens DXN's presence in the Pacific telecommunications market**

Under the agreement, DXN will design, engineer, manufacture, test, ship and install a CLS. The CLS solution for ASTCA comprises of a prefabricated modular facility incorporating critical power, cooling, fire detection and suppression systems, standby generation and supporting infrastructure. Manufacturing will commence immediately upon signing with delivery of the facility due by March 2027.

The project supports ASTCA's ongoing investment in resilient telecommunications infrastructure and subsea CLS capabilities in American Samoa; while also demonstrating DXN's capability to deliver complex, prefabricated critical infrastructure solutions throughout the Pacific region.

Shalini Lagrutta, Managing Director of DXN, commented:

"We are delighted to have been selected by the ASTCA for this important telecommunications infrastructure project. This award reflects DXN's proven capability to deliver high-quality prefabricated critical infrastructure solutions for telecommunications operators and government customers throughout the Asia-Pacific.

"This contract further establishes DXN as a trusted infrastructure partner across the Pacific, delivering a CLS for the Le Vasa cable connecting American Samoa to the Bulikula Cable trunk and onward to Fiji and French Polynesia. The award underscores how telecoms infrastructure in the Pacific increasingly intersects with defence and strategic priorities, strengthening DXN's position as a trusted partner for projects spanning commercial and security interests, an advantage as regional investment continues to accelerate.

"We look forward to working closely with ASTCA to successfully deliver this project and further strengthen our presence in the Pacific region."

About the Le Vasa Cable

The Le Vasa Cable is a US \$45 million subsea fibre-optic system connecting American Samoa with Fiji and French Polynesia. Launched in January 2026 as a landmark partnership between the American Samoa Government and Google's Pacific Connect initiative, the cable is owned and operated by the American Samoa Telecommunications Authority.

About DXN Limited

DXN Limited is a vertically integrated manufacturer and operator of modular data centres across Asia Pacific. The Company designs, engineers, manufactures, and operates high-quality, prefabricated facilities for government and blue-chip enterprise customers.

DXN operates through three core divisions:

1. **Modular Division** – Delivers prefabricated, scalable EDGE data centres and critical infrastructure, tailored to diverse industries including telecom, mining, defence, and subsea cable operators.
2. **Data Centre Operations** – Owns and manages data centres in Darwin and Hobart, providing colocation, monitoring, and managed hosting services.
3. **Data Centre as a Service (DCaaS)** – A capital-light “facility as a service” model, offering bespoke data centre and satellite ground station solutions with end-to-end management, maintenance, and 24/7 monitoring.
