Competent Persons Statement

The information in this report that relates Exploration Results and Mineral Resources is based on the information of the Competent Persons listed in the table above. Each of the Competent Persons have sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity they are undertaking to qualify as Competent Persons under the JORC Code 2012. For new information, each consents to the inclusion in the report of the matters based on his information in the form and context in which they occur. Previously announced information is cross-referenced to the original announcements. In these cases, the Company is not aware of any new information or data that materially affects the information presented and that the technical parameters underpinning the estimates continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcements of (GSN 25/1/19, 12/8/20, 2/3/21, 14/4/21, 21/7/21, 21/9/21, 5/10/21, 11/10/21, 28/10/21, 13/12/21, 17/1/22, 9/3/22, 31/3/22, 15/6/22, 29/6/22, 5/7/22, 8/11/22, 13/12/22, 27/3/23, 16/5/23, 21/6/23, 9/10/23, 9/11/23, 31/1/24, 27/5/24, 22/7/24, 8/10/24, 12/11/24, 18/2/25, 20/3/25, 24/4/25, 28/7/25, 28/8/25, 28/10/25, 6/11/25, 15/12/25, 27/1/26, 28/1/26, 29/1/26, 16/2/26, 19/2/26, 4/3/26, 15/6/26 and 24/6/26. References to ASX RRL announcements of 18/1/11, 8/3/11, 6/4/21, 31/3/22 are noted in the presentation).

ASX announcements are available on the Company's website at www.gsml.com.au

No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or proved correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisors or agents expressly disclaims any responsibility for the accuracy or completeness of the statements made in the presentation and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any effort or omission therefrom. Any opinions expressed in the presentation are subject to change without notice. The distribution of this presentation (including an electronic copy) outside of Australia (including the United States) may be restricted by law and any such restrictions should be observed. Any noncompliance with these restrictions may contravene applicable securities laws. This presentation does not provide investment advice or financial product advice. Each recipient of this presentation should make its own enquiries and investigations regarding all information in this presentation including, but not limited to, the assumptions, uncertainties and contingencies which may affect future operations of the Company and the impact that different future outcomes might have on the Company. Information in this presentation is not intended to be relied upon as advice to investors or potential investors and has been prepared without taking account of any person's individual investment objectives, financial situation or needs. Before making an investment decision, prospective investors should consider the appropriateness of the information having regard to their own investment objectives, financial situation and needs and seek legal, accounting and taxation advice appropriate to their jurisdiction. The Company is not licensed to provide financial product advice in respect of its securities.

Forward Looking Statements

This presentation has been prepared by Great Southern Mining Limited and contains background information about Great Southern Mining Limited, current at the date of this presentation. The presentation is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this presentation. This presentation is for information purposes only. Neither this presentation nor the information in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of shares. This presentation does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular persons. Recipients should seek professional advice when deciding if an investment is appropriate. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments. To the fullest extent permitted by law, Great Southern Mining Limited and its officers, employees, agents and advisers do not make any representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of any information, statement, opinions, estimates, forecasts or other representations contained in this presentation. No responsibility for any errors or omissions from this presentation arising out of negligence or otherwise is accepted.

Aggressive company making exploration on both sides of the country

Western Australia +900km² Laverton tenure

Major RC drill program commenced across 3 exciting gold targets

Queensland

Edinburgh Park Joint Venture

Diamond drilling in July by Gold Fields Ltd at Edinburgh Park

Photo: 2025 Diamond drilling at Edinburgh Park

WA - Three Gold Priorities – Surrounded by Existing Mills and Infrastructure

Commanding 909km² landholding in the Laverton District

- Strategically placed between Regis Resource +12Moz Duketon camp and Genesis Mining +6Moz Laverton tenure
- Multiple operating and planned gold processing facilities within trucking distance
- GSN has one of the largest landholding by a junior gold discovery company in the Laverton District

Three key priorities for up to 20,000m drilling program currently underway

Mon Ami Gold Project – In Progress

1. Testing for depth extension and repeated lodes to the existing 55Koz JORC Mineral Resource

Duketon Gold Project – Commencing July

2. Golden Boulder discovery – infill and extension to 3.5km strike already defined
3. Amy Clarke emerging discovery - infill and extension to 4.7km strike already defined

Huge potential for major gold discoveries with virtually no drilling >100m below the surface at Duketon Gold Project

Golden Boulder Discovery

Drilling Out 3.5km of Gold Mineralisation

- Golden Boulder sits on the N-W structural trend host to Rosemont (>2.5m oz), Baneygo (380koz), Ben Hur (390koz) and multiple others
- Over 50 historic workings with gold mineralisation from surface
- Defined three mineralised trends, but only drilled to less than 100m below surface to date
- Gold mineralisation extends for over ~3.5km strike
- Better intercepts to date include¹:
 - 5m at 14.6 g/t Au from 41m, incl. 1m at 70.9 g/t Au in hole 25GBRC009
 - 6m at 6.7 g/t Au from 48m, incl. 1m at 34.5 g/t Au in hole 25GBRC054
 - 2m at 12.6 g/t Au from 99m, incl. 1m at 18.2 g/t Au in hole 25GBRC007
 - 5m at 5.1 g/t Au from 25m, incl. 1m at 23.9 g/t Au in hole 23GBAC030

Next steps

- RC drilling commencing in July 2026 – infill and extensional drilling up to 15,000m
- Testing depth extensions and infilling zones of significant mineralisation

¹ Refer to GSN ASX announcements dated 20 March 2025, 27 January 2026 and 16 February 2026

Golden Boulder Discovery

Huge Scale Potential

- Drilling from July 2026 to follow up to highly successful 2025 program where nearly all drill lines intercepted >1 g/t gold
- Little to no drilling below 100m
- Still very sparsely drilled to the south

Amy Clarke Emerging Discovery

Gold Mineralisation over a 4.7km strike

- 2025 drilling extended the mineralised gold trend to 4.7km, which remains open to the south
- Mineralisation from surface, but only drilled to an average 50m depth below surface
- Located <12km from Regis Resources' Garden Well processing facility
- Along strike (less than 3.5km) from Regis Resources' Erlistoun pit with 320koz @ 1.9 g/t Au
- Significant gold intercepts from 2021 and 2025 drilling, include¹:
 - 17m @ 1.4 g/t Au from 20m incl. 1m @ 11.2 g/t Au in hole 25ACAC0105
 - 2m @ 23.9 g/t Au from 10m in hole 25ACAC0007
 - 8m @ 6.7 g/t Au from 33m, including 4m @ 12.5 g/t Au in hole 21ACAC147
 - 11m @ 1.2 g/t Au from 25m, incl. 6m at 1.7 g/t Au in hole 25ACAC0057

Next steps

- Follow-up RC drilling commencing immediately after the Golden Boulder program – Phase 1 drilling up to 3,000m
- Step out and deeper RC drilling to expand on zones of strong gold mineralisation

¹ Refer to GSN ASX announcements dated 17 January 2021, 6 November 2025 and 15 December 2025

Amy Clarke Emerging Discovery

Huge Scale Potential

- Extensive strike with huge scale potential, but little drilling below 50m from surface
- Mineralisation remains open to the south where there has been no modern drilling (only shallow drilled in the 1990's)
- Upcoming drilling program planned to step out from zones of higher-grade gold mineralisation

Mon Ami Gold Project

Extensional drilling in progress

- Located ~10km east of Granny Smith (Gold Fields) mill
- Existing 1.56Mt @ 1.11g/t Au for 55koz Mineral Resource¹
- Mineralisation remains open in multiple directions
- Near-term development potential with granted Mining License and heritage and environmental studies complete
- Within trucking distance to at least three gold processing facilities
- RC drilling underway

Figure 1. Image of the Mon Ami head frame

¹Source: ASX announcement 21 July 2021. The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements regarding the Mineral Resource Estimate (MRE). MRE reported in accordance with JORC Code (2012) and ASX Listing Rules.

Mon Ami Gold Project – An Ida H Analogy

- GSN considers Mon Ami to be a potential analogue for the high-grade Ida H deposit (Owned by Genesis Minerals)
- Mon Ami and Ida H are just 7km apart on the prolific gold bearing Barnicoat Shear
- Ida H one of the highest-grade mines in the Laverton District (170k oz @ 22.6 g/t Au)
- Grade of Mon Ami looks to be increasing with depth – similar to Ida H
- Upcoming drilling will test extensions to high grade zones at depth and test for a potential parallel lode to the north¹

Figure 1. Image of the Mon Ami deposit showing gold lodes defined in the JORC Mineral Resource, and significant intercepts proximal to target zones for the upcoming RC drilling program. The Ida H deposit outline is shown in shaded grey.

Edinburgh Park

Provincial Scale – Hunting for Giant Intrusive Related Gold Systems

Edinburgh Park Project

TOWNSVILLE

ROCKHAMPTON

BRISBANE

QLD

Edinburgh Park

JV with Gold Fields Chasing Monster Gold Deposits

- Over 1,500km² tenure - highly prospective for major gold-copper-silver mineral systems
- Targeting multi-million-ounce intrusive related giants
- Tenure accumulated over a decade, following Chairman, John Terpu's Conquest Mining Limited's discovery of Mt Carlton that became cornerstone asset of Evolution Mining (ASX:EVN)
- Over 20 porphyry and intrusive related gold targets identified by GSN
- Global major, Gold Fields Ltd (NTSE:GFI,US\$35bn) farming into the project¹
 - A leading porphyry specialist, spending \$15 million to earn 75%
 - Extensive mapping and geophysics program has vectored in on large-scale targets
- **Diamond drilling commencing in July 2026 at the exciting Mt Dillon target**
- Several other targets to be tested in 2026 with exploration still in its infancy within the huge tenement area

¹ Refer to GSN ASX announcement dated 9 October 2023

Mt Dillon

Potential for a concealed monster

➤ Mt Dillon target defined by a large-scale IP anomaly under a quartz lithocap¹

➤ Interpreted as a preserved porphyry or epithermal system

➤ Outcropping alteration is consistent with a high-sulphidation epithermal gold system

➤ **Drilling commencing in July 2026**

➤ Mt Dillon target is considered analogous to litho-capped discoveries such as:

- Quebradona in Columbia (AngloGold Ashanti, 4.26Mt copper and 7.0 Moz gold contained)²
- Valeriano in Chile (ATEX Resources, 10.2Mt copper and 14.2Moz gold contained)³
- Lepanto epithermal and Far Southeast porphyry deposits in the Philippines (Lepanto Consolidated Mining, +20Moz gold and +4.5Mt copper contained)⁴

Copper and silver rich porphyry specimen adjacent to the Mt Dillon target

¹ Refer to GSN ASX Announcement dated 18 February 2025. ² See AngloGold Ashanti December 2024 Mineral Resource and Ore Reserve statement. ³ See ATEX Resources September 2025 Mineral Resource statement. ⁴ Sourced from Lepanto Consolidated Mining Company public reports

CORPORATE SNAPSHOT

Shares on Issue ¹	1,162M

SHARE PRICE HISTORY

BOARD OF DIRECTORS

John Terpu
Executive Chairman

Over 25 years' experience in the mining & exploration sector, through acquisition and investment in many projects. Founder of Conquest Mining which discovered the Mt Carlton mine and went on to become gold major Evolution Mining. As Chairman of Emerchants Ltd, drove the company's market cap from A\$1m to over A\$150m.

Matt Keane
Managing Director

Geologist with 27 years of experience in mining, exploration and financial markets, including 8 years as a Resources Analyst. Mr Keane's technical career incorporated 10 years with BHP across various commodity groups.

Matthew Blake
Non-Executive Director

Mr Blake has 30 years' experience in the financial services industry and with companies listed on the ASX.

Andrew Caruso
Non-Executive Director

Mining executive with over 30 years' experience in the Australian and international mining industries, including significant corporate leadership and business development experience. Currently CEO of Kingsrose Mining (ASX:KRM)
