

INTERNATIONAL TELCO DEALS WITH SPARK & VIEWQWEST DELIVERS UP TO \$6M ARR INCREASE

**Global Edge Launches Internationally, with further growth expected
across USA, Europe, Asia and India**

Highlights

- ATV's Global Edge self-service **network connectivity and API portal** now available to international telcos.
- Global telco contracts are driving a **step-change in revenue growth** for ATV's NaaS product.
- **Spark (New Zealand)** and **ViewQwest (Singapore)** signed at launch this week with many more to come spanning Asia, India, Europe and USA.
- NaaS is anticipated to deliver at least a \$2M increase in Annual Recurring Revenue (**ARR**) through FY27, growing past **\$6M in FY28**.
- Significant **upside from roll-out of new products** including cloud on-ramps, datacentre connectivity, managed firewalls and AI gateways for the remainder of the year.

With the addition of NBN national coverage, Global Edge is now the simplest way for international carriers to purchase network services in Australia, automated, on demand, and available from anywhere in the world.

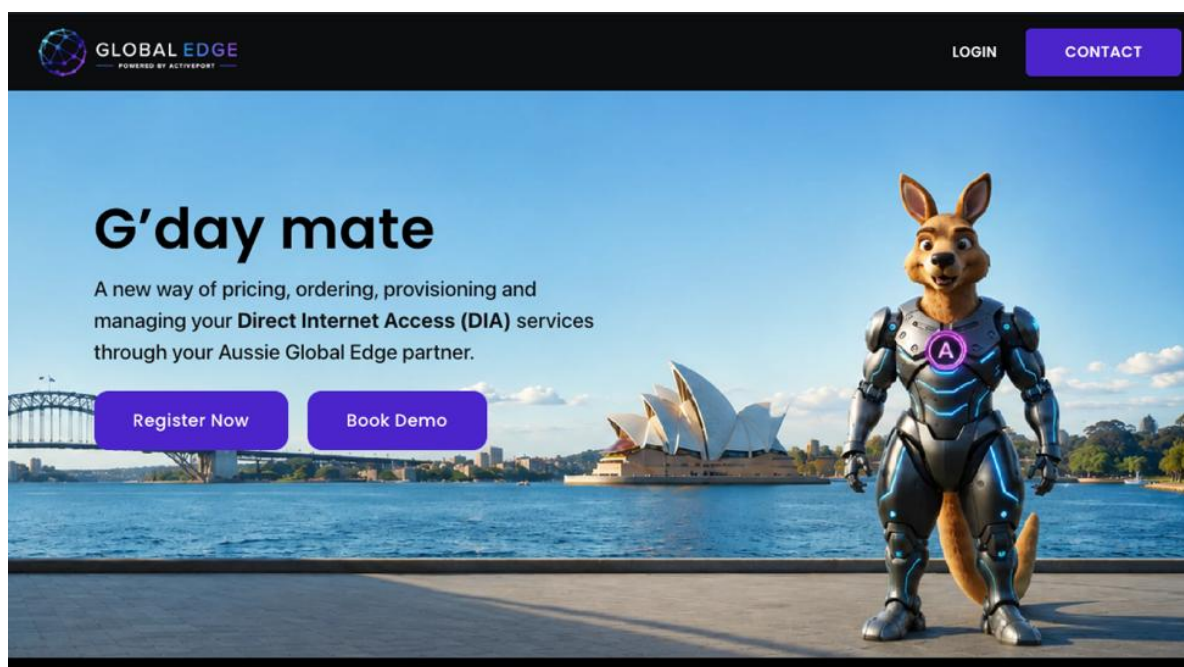

Image: The New Global Edge International Telco Portal

Activeport Group Ltd (ASX: ATV) (“Activeport” or “the Company”) is excited to announce the international release of www.globaledge.network.

Global carriers now have an intelligent on-demand pricing, ordering, provisioning and management platform for automated telecommunications service delivery across Australia.

Two international carriers signed in launch week.

Spark, NZ’s largest telco, and ViewQwest, one of Singapore’s leading ISPs, both signed contracts at launch this week, with many more carriers to follow. These wins validate Global Edge as the front door for international telcos buying Australian connectivity.

A step-change in recurring revenue growth for ATV

The new contracts are expected to drive a step-change in revenue growth for Activeport’s Network-as-a-Service (NaaS) product. NaaS is anticipated to deliver at least a \$2 million increase in annual recurring revenue (ARR) through FY27, growing past \$6 million in FY28.

New products to unlock further upside

New contracts are just the beginning, with significant upside opportunity as Activeport rolls out new products across the Global Edge platform including cloud on-ramps, datacentre connectivity, managed firewalls and AI gateways, expanding the range of services every carrier on the platform can buy.

Activeport Chief Commercial & Operating Officer, Michael Glynn, said:

“Global Edge changes the way Australian network services are bought and we’re taking it to the world. Signing two major international carriers in launch week tells us the demand is real. International telcos want a fast, fully intelligent platform not only to price but to order and manage across Australian connectivity, and Global Edge is it.” Glynn continued, *“With NBN coverage nationwide and new products on the way, from cloud on-ramps to AI neocloud gateways, ATV has built the front door to Australian network services, and carriers are walking through it. We have used our own software tools to deliver real-time network management for global communications.”*

About Activeport

Activeport Group Ltd (ASX: ATV) is an Australian technology company that delivers network automation and orchestration software to telecommunications, data centre and IT markets worldwide. Headquartered in Perth, with operations across Australia, Europe and India, Activeport helps organisations turn existing infrastructure into scalable, automated, revenue-generating digital platforms.
