ClearVue Appoints Globally Recognised BIPV Expert to Board

Professor Rebecca Yang brings deep technical authority in building-integrated photovoltaics (BIPV) and international standards leadership, strengthening ClearVue's industry positioning.

16th July 2026 – **Perth, Australia** – Smart building materials company **ClearVue Technologies Limited (ASX: CPV | OTCQX:CVUEF) (ClearVue or the Company)** announce the appointment of Professor Rebecca Yang as an Independent Non-Executive Director, effective 16th July.

Professor Yang is internationally recognised as one of Australia's leading experts in BIPV, sustainable building technologies and renewable energy integration. Her appointment further strengthens ClearVue's Board as the Company continues to execute its strategy of commercialising advanced BIPV technologies across global markets.

Professor Yang is Professor and Doreen Thomas Fellow at the University of Melbourne. Her internationally recognised research spans BIPV, net zero buildings, building energy systems, artificial intelligence, digital twins and the integration of renewable energy into the built environment. Through extensive collaboration with industry, government and research organisations, her work has helped bridge the gap between leading-edge research and practical commercial application.

The appointment continues the strategic evolution of the ClearVue Board, adding internationally recognised scientific and technical leadership to complement the Company's commercial, engineering, photovoltaic standards, architecture and governance expertise.

Chair Theresa Smits welcomed Professor Yang to the Board:

"Professor Yang has established an international reputation at the forefront of BIPV and sustainable building technologies. Her decision to join the ClearVue Board reflects confidence in our technology, our strategy and the significant global opportunity ahead of the Company.

Rebecca's expertise spans research, commercial collaboration and the future of intelligent, energy-generating buildings. As ClearVue continues to expand internationally, her experience and strategic perspective will further strengthen the Board as we continue executing our long-term growth strategy. We are delighted to welcome someone of Rebecca's calibre to the ClearVue Board."

Chief Executive Officer Douglas Hunt said the appointment reflects the Company's continued focus on combining world-class innovation with disciplined commercial execution:

"Professor Yang is recognised internationally as one of the leading voices in BIPV and sustainable building technologies. Her appointment reflects the calibre of expertise ClearVue is attracting as we continue to build our position in global markets.

Rebecca's work spans building-integrated photovoltaics, artificial intelligence, digital building technologies and renewable energy integration. Her strategic perspective will further strengthen the Board as ClearVue continues to capitalise on opportunities emerging from the convergence of advanced building materials, clean energy and intelligent building design.

We are delighted to welcome someone of Rebecca's standing to the Board and look forward to benefiting from her governance, strategic insight and deep understanding of the technologies shaping the future of the built environment."

Professor Rebecca Yang said:

"I've followed ClearVue's progress over recent years and have been impressed by the Company's commitment to advancing BIPV technology from research and development into real-world commercial applications.

ClearVue has developed an innovative technology platform with the potential to transform the role of glass in the built environment from a passive building material into an active energy-generating component. As demand for net zero buildings continue to grow globally, I believe the Company is well positioned to make an important contribution to the future of sustainable construction.

I am delighted to join the ClearVue Board and look forward to working with my fellow directors and the management team to support the Company's continued innovation, international growth and the broader adoption of building-integrated photovoltaic technologies."

Professor Yang's appointment reflects ClearVue's continued commitment to strengthening its Board with internationally recognised expertise while supporting the Company's strategy to accelerate the global commercial deployment of its proprietary BIPV technologies.

Authorised by the Board of ClearVue Technologies Limited.

ABOUT CLEARVUE TECHNOLOGIES LIMITED

ClearVue Technologies Limited (ASX: CPV; OTCX: CVUEF) is an Australian technology company that integrates solar technology into building façade and rooftop surfaces to provide renewable energy generation and offset the operational carbon footprint of buildings. The Company's advanced, patented glass technology preserves glass transparency maintaining building aesthetics while generating energy.

ClearVue has extended solar energy-generation to vision glass, cladding, spandrel, balustrade, and skylight solutions. These solutions can offset operational energy requirements significantly contributing to the net zero building.

ClearVue's integrated solar façade is revolutionizing the way buildings are designed, constructed, and renovated. Experience how building façades will become a major contributing factor to reducing operational carbon by visiting ClearVue at www.clearvuepv.com.
