23rd JULY 2026

NINNIS GOLD DRILLING RECOMMENCES

Auger Programme Expanded to Include Infill Drilling

Vita Resources NL (**ASX: VTA**, **Vita** or the **Company**) is pleased to advise that the maiden exploration programme at the Company's Ninnis Gold Project (**Ninnis Gold**) in Western Australia will recommence in early August 2026. The 1,200-hole auger programme was suspended following the completion of 850 holes owing to wet weather conditions affecting rig mobility.

Highlights

- Gyro Drilling remobilising to site to complete the auger drilling programme following the suspension of activities due to wet weather conditions affecting rig mobility
- **Initial results reported from the completed 850 auger holes are highly encouraging**[1]
- **Multiple large gold in soil anomalies identified in the northern sector** of Ninnis Gold extending for 600m north-west
- Closer spaced sampling in the southern sector identified **a large and consistent gold in soil anomaly 500m north-south by 300m wide**
- **Maiden programme has been expanded** to include approximately 300 infill holes in addition to the remaining ~350 holes yet to be completed
- The infill programme will target the two sub parallel fault zones successfully intersected in maiden programme, which have been **identified as the major structural controls to the mineralised system**
- Completion of maiden drilling programme expected end August 2026
- PoW granted for infill drilling component
- Planning in process for maiden RC drilling programme

Non-Executive Chairman Gavin Rutherford commented:

"Whilst the programme being interrupted was not ideal, the rain induced hiatus in our Ninnis Gold auger drilling programme provided the Company with the opportunity to review the initial 850 assay results, which were very pleasing.

"The results provided encouraging guidance and an incentive for the Board to expand our maiden Ninnis Gold programme to include some in-fill drilling. We anticipate the programme being complete in August 2026 and if the balance of the results yields similar results, we will be very pleased. Whilst not ruling out more infill auger drilling, we expect to follow up with an RC drilling programme later in 2026."

The Company's maiden Ninnis Gold drilling programme is scheduled to recommence in early August 2026 following the remobilisation of Gyro Drilling. The maiden programme to be completed comprises:

- Remaining 350 auger holes
- 300 infill holes

Following completion of the maiden drilling programme, Vita intends to run a geochemistry review followed by an RC drilling programme later in 2026.

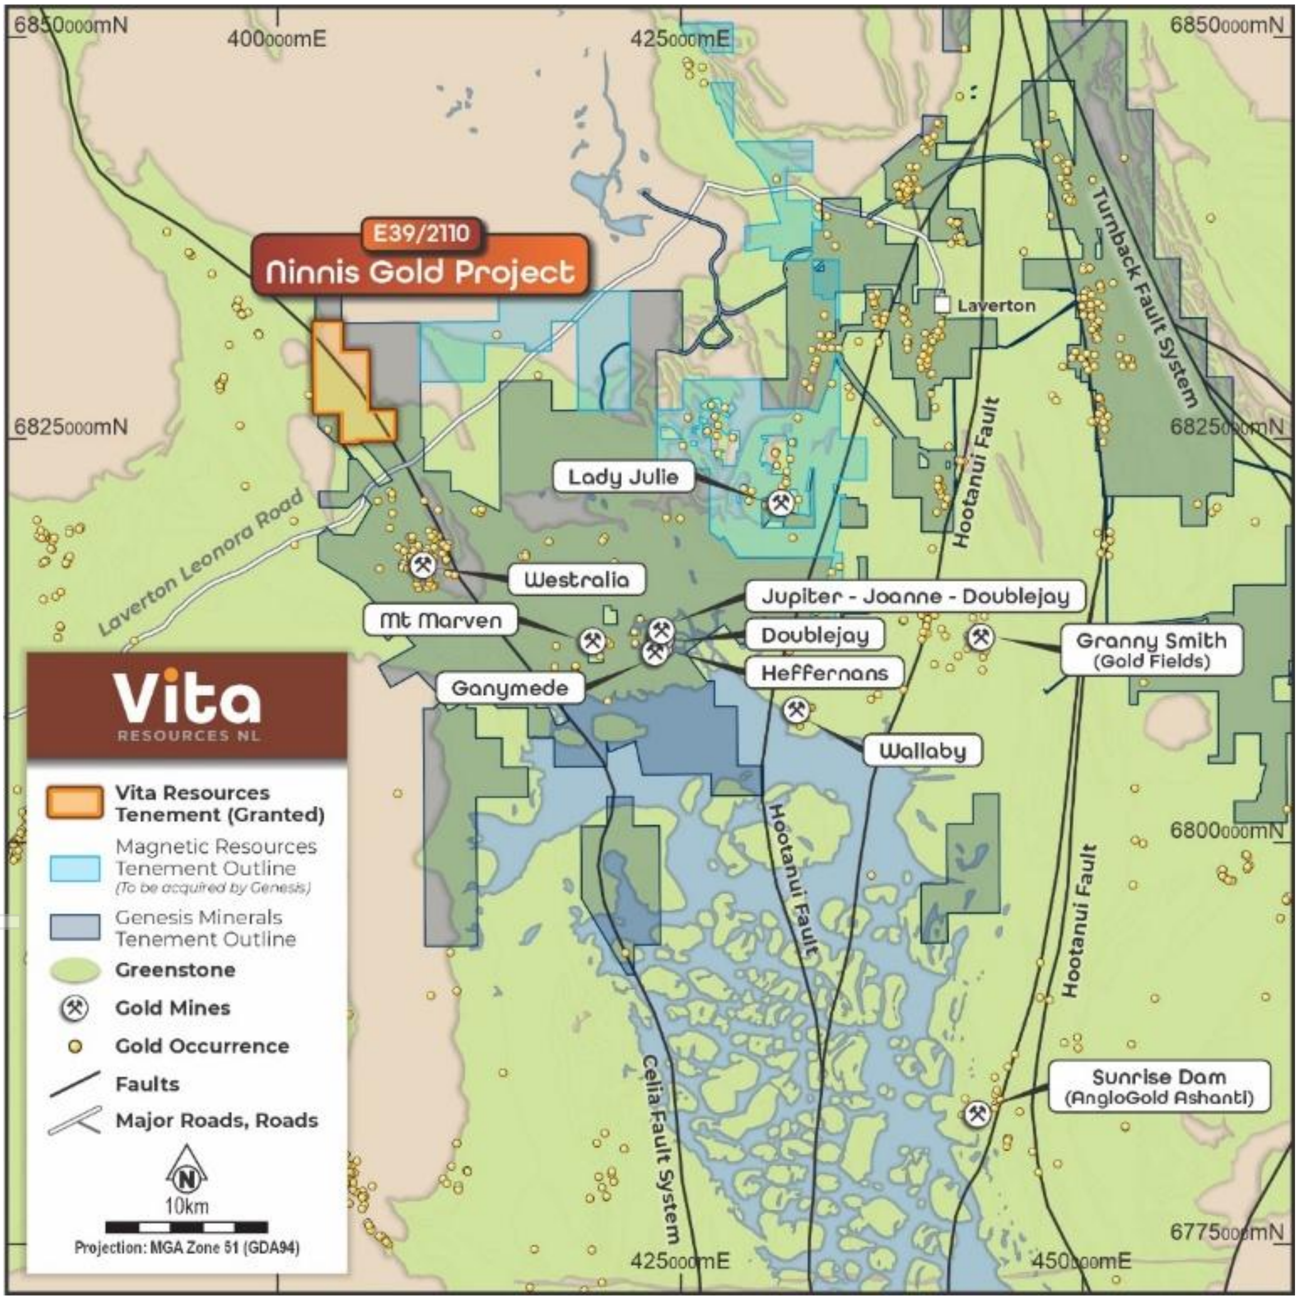

Figure 1. Ninnis Gold Project location map

The Ninnis Gold Project

Ninnis Gold (E39/2110) is an early-stage gold exploration project located approximately 30km west of Laverton in the Eastern Goldfields region, acquired **by Vita** in November 2025 [2]**.**

Ninnis Gold covers 25km^2 and presents a similar geological setting to several multi-million-ounce gold discoveries in the region, including Genesis Minerals Limited's (ASX: GMD) Mount Morgans Gold Mining Centre [3]. The contained variety of differing geological gold deposits are only a few kilometres to the south of Ninnis Gold and cluster about the regional Celia and Ninnis Gold fault systems.

Statements and Disclaimers

Competent Person Statement

The information in this report that relates to gold exploration results, is based on information compiled by Ray Muskett who is a Member of the Australasian Institute of Mining and Metallurgy (**AusIMM**). Ray Muskett is a Director of the Company and holds shares in the Company. Ray Muskett has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity currently being undertaken to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Ray Muskett consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

The information in this report that references previously reported exploration results is extracted from the Company's ASX market announcements released on the date noted in the body of the text where that reference appears. The previous market announcements are available to view on the Company's website (www.vitaresources.au) or on the ASX website (www.asx.com.au). The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Forward-Looking Statements

Certain statements contained in this Announcement, including information as to the future financial or operating performance of Vita Resources and its projects may also include statements which are 'forward-looking statements' that may include, amongst other things, statements regarding targets, estimates and assumptions in respect of mineral reserves and mineral resources and anticipated grades and recovery rates, production and prices, recovery costs and results, capital expenditures and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions. These 'forward-looking statements' are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Vita Resources , are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies and involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward-looking statements.
