MARKET OVERVIEW

Australian equities rose 0.7% in June (including franking credits), lifting the total return for FY26 to 7.2%, as investor confidence improved following the ceasefire between Iran and Israel. Market leadership shifted during the month, with Healthcare—the weakest-performing sector in FY26 to date—rebounding 13.3%. Consumer Staples and Consumer Discretionary also outperformed by over 10%, as softer housing conditions following proposed tax changes contained in the Federal Budget and earlier interest rate increases prompted investors to increasingly position for an eventual easing in the RBA's policy cycle. In contrast, Materials and Energy, the strongest-performing sectors over FY26, retreated during June. Within the Resources sector, companies with exposure to copper continue to be viewed as the ASX's primary beneficiaries of the AI investment theme, helping to explain at least part of the sector's strong performance over FY26.

Some of the largest positive contributors to the Company's performance during the month were overweight positions in QBE Insurance and Charter Hall as well as underweight positions in PLS Ltd, Liontown and Independence Group. However, underweight positions in Aristocrat Leisure, Wesfarmers, Pro Medicus, CSL and James Hardie detracted from relative performance.

The Company remains actively positioned to seek superior income than the benchmark.

Companies mentioned are illustrative only and not a recommendation to buy or sell any particular security.
