ASX Announcement 29 July 2026

QUARTERLY ACTIVITIES REPORT

Period ended 30 June 2026

Highlights

Chalice Gold Project Transformational Acquisition

- **Binding Agreement to Acquire 100% of the Chalice Gold Project:** Corazon entered into a binding agreement with Westgold Resources Ltd (ASX|TSX: WGX) to acquire the Chalice Gold Project in the Higginsville district of Western Australia's Eastern Goldfields for total consideration of ~A$25.7 million.
- **191,000oz JORC 2012 Mineral Resource Secured:** Chalice hosts an established Mineral Resource of 191,000oz at 2.7g/t Au on a granted Mining Lease (ML 15/786), with a 645,000oz historical production history and a resource that remains open along strike and at depth.
- **A$16.5 Million Placement :** Corazon completed (post quarter) a A$16.5 million (before costs) placement at A$0.14 per share to fund the Chalice Acquisition cash consideration and an accelerated drilling program.
- **Westgold Becomes a ~19.9% Cornerstone Shareholder: (post quarter)** Providing a strategic endorsement from an established WA gold producer and a structural foundation for future operational alignment at Higginsville.
- **Shareholder Approval Obtained:** All resolutions required to approve the Chalice Acquisition, Placement and related matters were passed by poll at a General Meeting held 29 June 2026.

Two Pools Gold Project

- **Maiden Diamond Drilling Confirms Gold Mineralisation in All Four Holes:** Results from Corazon's maiden diamond program at Two Pools confirmed a coherent, structurally controlled orogenic gold system, with a high-grade intercept of 4.6g/t Au recorded in TPDD0002.
- **Vein Orientation Revised to East–West:** Diamond core logging revised the interpreted orientation of gold-bearing veins from the previously modelled NW-trend to an east–west trend, directly informing the design of follow-up RC drilling.
- **Substantial Pegmatite Dyke Intersected:** A 25-40m thick pegmatite dyke was traced over more than 500m of strike and remains open in all directions, interpreted as a potential fluid-focusing structure.
- **Tenure Expanded:** Exploration Licence E52/4521, adjoining the existing Two Pools tenement package, was granted during the quarter, with an existing Native Title agreement in place enabling immediate on-ground access.

Feather Cap Gold Project

- **Two Additional Walk-Up Drill Targets Identified:** A historical data review defined the Trudgeon Well (untested 3.5km gold-in-lag anomaly) and Murphy's Creek (drill-ready, along strike from Westgold's 112koz Durack deposit) targets.
- **Heritage Survey Completed:** A heritage survey across the primary Wembley and Durack East/Jigsaw drill target areas was completed, clearing the approval pathway for a maiden RC drilling program targeted for Q3 CY2026.

Corporate

- **Board and Management Strengthened:** Mr Warrick Clent was appointed Non-Executive Director and Mr Paul Hughes appointed Chief Financial Officer, both effective 5 May 2026, adding technical, M&A and financial leadership capability ahead of the Chalice transaction.
- **Cash Position:** The Company held cash of A$1,453,000 at 30 June 2026, with the Placement proceeds received subsequent to quarter end providing a substantially strengthened balance sheet.

Corazon Mining Ltd (ASX:CZN) ('Corazon' or 'Company') is pleased to present its Quarterly Activities Report for the period ending 30 June 2026 ('Quarter'), a quarter that cemented the Company's position as an advanced Western Australian gold developer.

Two Pools delivered its first drilling results, Feather Cap advanced two new drill-ready targets and cleared heritage approvals, and the Company secured shareholder approval for the acquisition of the Chalice Gold Project — the third WA gold acquisition Corazon has completed in under 12 months, following Two Pools and Feather Cap. together, these projects underpin Corazon's focused strategy of building a multi-asset, advanced WA gold platform.

Corazon Mining Ltd Managing Director, Simon Coyle, commented: *"This has been a significant quarter in Corazon's history. We delivered our first drill results at Two Pools, confirming a real, structurally controlled gold system and giving us a clear model to chase with follow-up drilling. At Feather Cap we've added two genuine walk-up targets and cleared heritage ahead of our maiden RC program. And with shareholder approval secured for the Chalice acquisition, post quarter we completed a transaction that takes Corazon from an early-stage explorer to an advanced, production-ready WA gold developer with a 191,000oz resource, a 645,000oz production history, and one of WA's leading gold producers as a cornerstone shareholder. We look forward to an active September quarter across all three projects".*

EXPLORATION ACTIVITIES

Chalice Gold Project, Higginsville (100% CZN)[1]

On 19 May 2026, Corazon entered into a binding agreement to acquire 100% of the Chalice Gold Project from a wholly owned subsidiary of Westgold Resources Limited (ASX|TSX: WGX) for total consideration of approximately A$25.7 million. Chalice is located on a granted Mining Lease (ML 15/786) in the Higginsville district of the Norseman-Kalgoorlie greenstone belt (see Figure 1), within 130km of seven operating processing facilities, including Westgold's 1.6Mtpa Higginsville CIL plant, located 22km from site via an access road (see Figure 2).

[1] See ASX Announcement "Chalice Acquisition Establishes Corazon as an Emerging Gold Developer" dated 19 May 2026

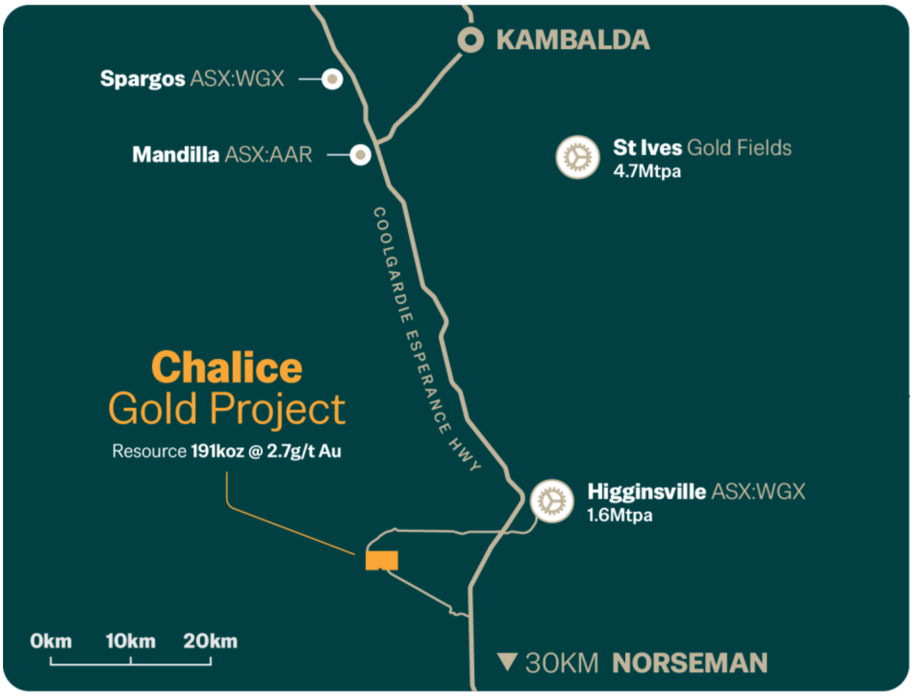

Figure 1: *Chalice Gold Project location*

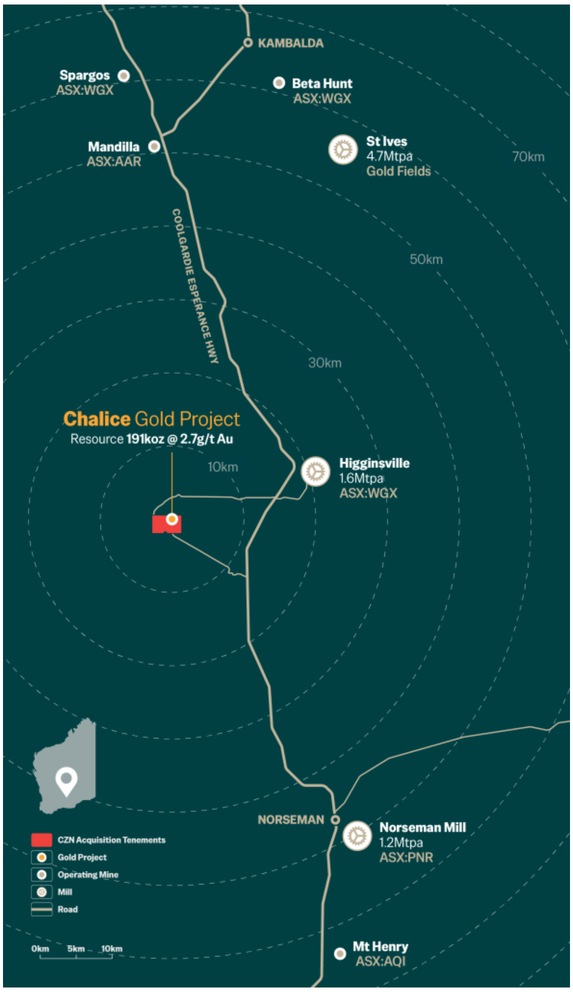

Figure 2: *Chalice Gold Project Location proximal to regional operating processing facilities*

Established, High-Grade Resource[2]

- Chalice hosts a JORC 2012 Mineral Resource Estimate of 191,000oz at 2.74g/t Au (42,000oz Measured, 94,000oz Indicated and 55,000oz Inferred), reported at a 1.3g/t Au cut-off and estimated using a US$1,700/oz gold price assumption, materially below prevailing gold prices.

- The Project has a production history of approximately 645,000oz of gold, comprising 517,000oz at 5.6g/t Au from open-pit operations and 39,000oz at 5.5g/t Au from underground mining during 1995–1999, with a further 89,000oz at 4.35g/t Au produced between 2011 and 2014.

- The Mineral Resource is defined across four mineralised zones (Kronos, Atlas, Grampians and Olympus) (see Figure 3) with high-grade intercepts identified outside the resource indicating each remaining open at depth and/or along strike.

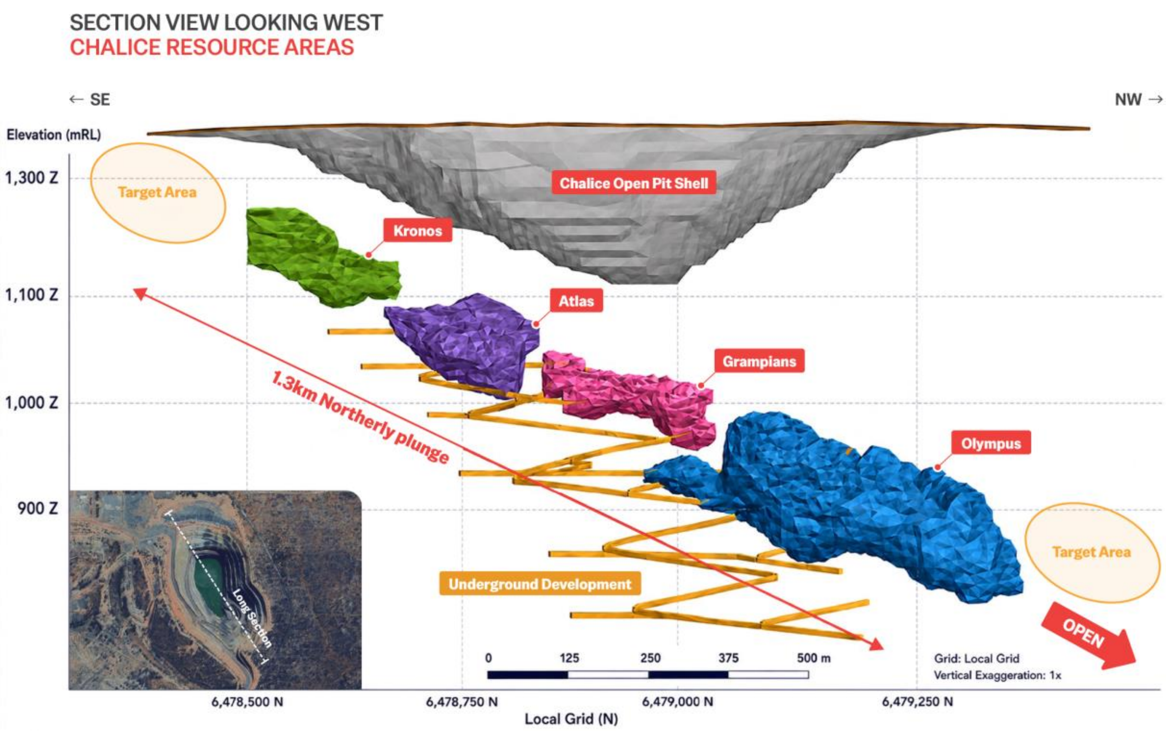

Figure 3: *Chalice Gold Resource Areas*

Exploration Upside and Planned Program

- The Mineral Resource remains open along strike and at depth across all four mineralised zones, with a 645,000oz production history at an average grade of ~5.4g/t Au[2], substantially above the current 2.74g/t Au resource grade, pointing to significant potential for both near-mine and regional extensions. Corazon intends to commence a resource growth drilling program of up to 10,000m as soon as practicable following Completion, with initial holes focused on the near-surface target area up-dip from the Kronos zone.

Transaction and Funding[2]

- Total consideration of ~A$25.7 million comprises A$8.0 million upfront cash, ~A$6.7 million in Corazon shares (~47.6 million shares, representing ~19.9% of expanded capital) issued to Westgold, and up to

[2] See ASX Announcement "Chalice Acquisition Establishes Corazon as an Emerging Gold Developer" dated 19 May 2026

A$11.0 million in deferred payments linked to an anniversary date and Mineral Resource growth milestones.

- The upfront cash consideration and an accelerated exploration program are being funded through a A$16.5 million (before costs) placement of ~117.9 million shares at A$0.14 per share, which also provides funding for continued exploration at Two Pools and Feather Cap.
- Following completion, Westgold hold ~19.9% of Corazon's expanded share capital, together with a right to nominate one non-executive director to the Corazon Board while its holding remains above 10%.

Shareholder Approval and Status at Quarter End[3]

Corazon shareholders approved the issue of the Consideration Shares, the Placement shares and related director participation at a General Meeting held on 29 June 2026, with all resolutions passed by poll (see Corporate section below). As at 30 June 2026, the Acquisition had not yet completed. Completion, including settlement of the Placement and issue of shares to Westgold, occurred subsequent to quarter end (see Events Subsequent to Quarter End).

Two Pools Gold Project, Gascoyne (100% CZN)

Two Pools was the first WA gold project acquired by Corazon in August 2025. The 100%-held exploration asset is located within the proven Plutonic-Marymia Greenstone Belt of Western Australia, approximately 60km north-east of Catalyst Metals' Plutonic processing plant.

Maiden Diamond Drilling Completed and Results Received[4]

The Company's maiden four-hole diamond drilling program at Two Pools (TPDD0001–TPDD0004, ~995m total) reached completion on 9 April 2026, less than six months after tenement acquisition. Assay results, received and reported on 19 May 2026, confirmed gold mineralisation in all four holes, establishing a coherent orogenic gold structural architecture consistent with high-grade systems of the Yilgarn Craton (see Figure 4).

- Mineralised intercepts included 2.15m @ 0.55g/t Au (TPDD0001, from 179.5m); 1.59m @ 0.60g/t Au incl. 0.5m @ 1.54g/t Au, and 2.0m @ 1.50g/t Au incl. 0.5m @ 4.59g/t Au (TPDD0002); 4.0m @ 0.53g/t Au incl. 1.0m @ 1.61g/t Au (TPDD0003);
- Mineralisation is hosted within a coherent geological package of east- to north-east-trending, moderately north-west dipping (45–50°) greenstones, associated with foliation-parallel quartz–carbonate veinlets, chlorite–sericite alteration and consistent pyrite–chalcopyrite sulphide mineralisation (~1–2%).
- A key structural outcome of the program was the revision of the interpreted vein orientation (previously modelled as NW-trending) to an east–west trend, dipping moderately to steeply (60–75°) to the north/north-east. This directly informs the design of follow-up RC drilling and materially improves the probability of intersecting the highest-grade portions of the system.
- Drilling also intersected a substantial pegmatite dyke approximately 25–40m thick, dipping shallowly (~40°) to the north and traced over more than 500m of strike, remaining open in all directions.

[3] See Corazon Mining ASX Announcement "Results of General Meeting" dated 29 June 2026
[4] See Corazon Mining ASX Announcement "Two Pools Drilling Results" dated 19 May 2026

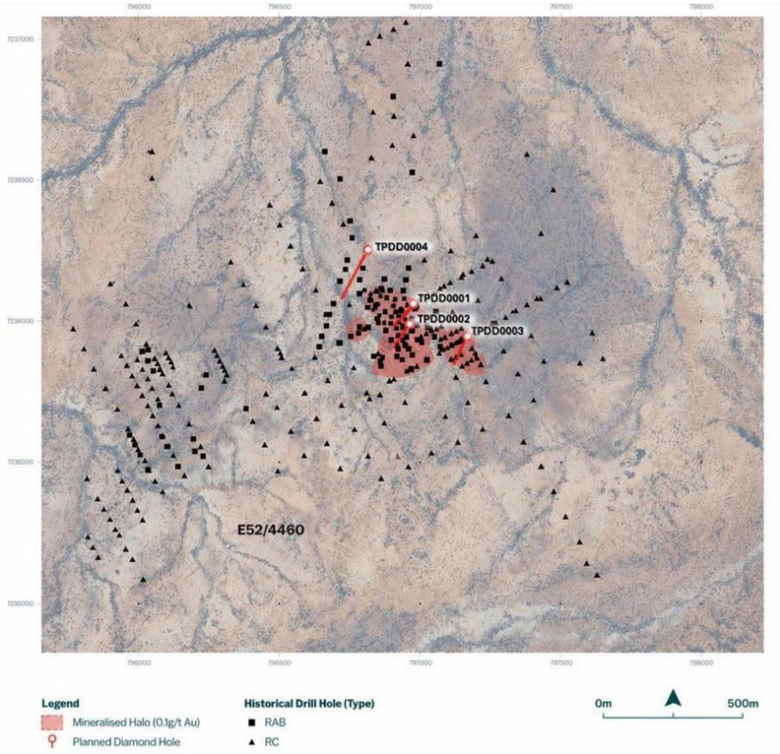

Figure 4: *Two Pools Gold Plan View of Diamond Drillholes*

Tenure[4]

Exploration Licence E52/4521, forming part of the existing Two Pools Project boundary, was granted during the quarter by the WA Department of Energy, Mines, Industry Regulation and Safety (see Figure 5). With an existing Native Title agreement already in place, Corazon is not subject to access constraints and can proceed directly to geological mapping, target generation and drill program planning across this ground.

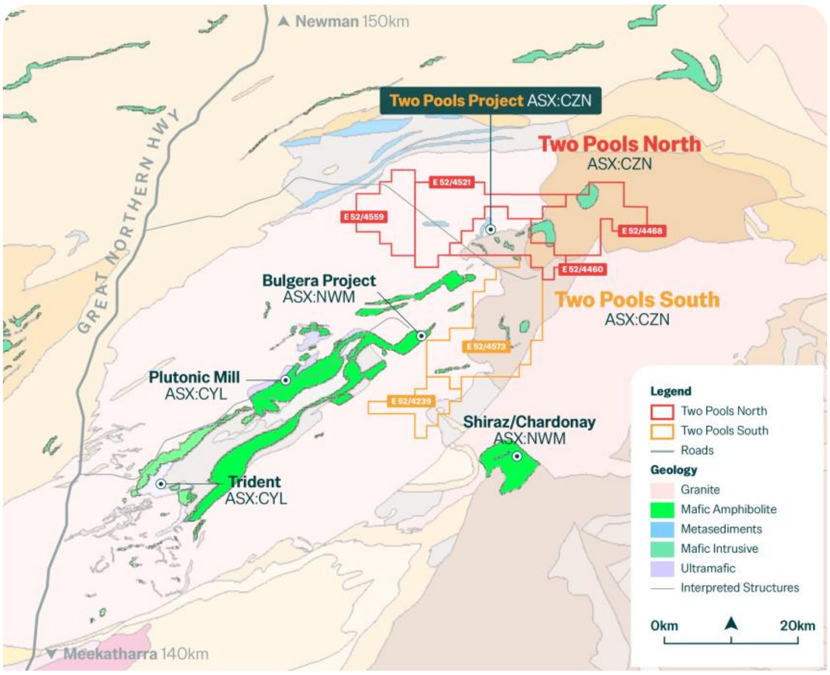

Figure 5: *Target Area 1 Historical soil and drill intercepts*

Disclosure Notice

On 22 April 2026, the Company issued a retraction in relation to certain qualitative visual observations of core referenced in its 9 April 2026 announcement, on the basis that assay results necessary to support those comments had not yet been received. Assay results confirming gold mineralisation across all four holes were subsequently received and reported to the market on 19 May 2026, as summarised above.

Feather Cap Gold Project, Bryah-Padbury Basin (Option to Acquire 80%)

The Feather Cap Gold Project is strategically located in the Bryah-Padbury Basin of Western Australia, an established and productive WA gold province hosting regional mining centres including Fortnum, Peak Hill, Horseshoe and Labouchere.

New Walk-Up Drill Targets Identified[5]

A systematic review of historical drilling, soil geochemistry and rock chip data completed during the quarter identified two additional high-priority gold targets (see Figure 6):

- Trudgeon Well: a coherent, untested 3.5km gold-in-lag anomaly (peak 760ppb Au) overlying prospective Narracoota Volcanics, with no drilling ever conducted on the target.
- Murphy's Creek: a drill-ready target located along strike from Westgold Resources' 112koz Durack Gold Deposit, with historical RAB drilling returning 10m @ 0.6g/t Au from 20m, including 5m @ 1.0g/t Au from 25m at end of hole (MCR291), remaining open at depth and along strike.

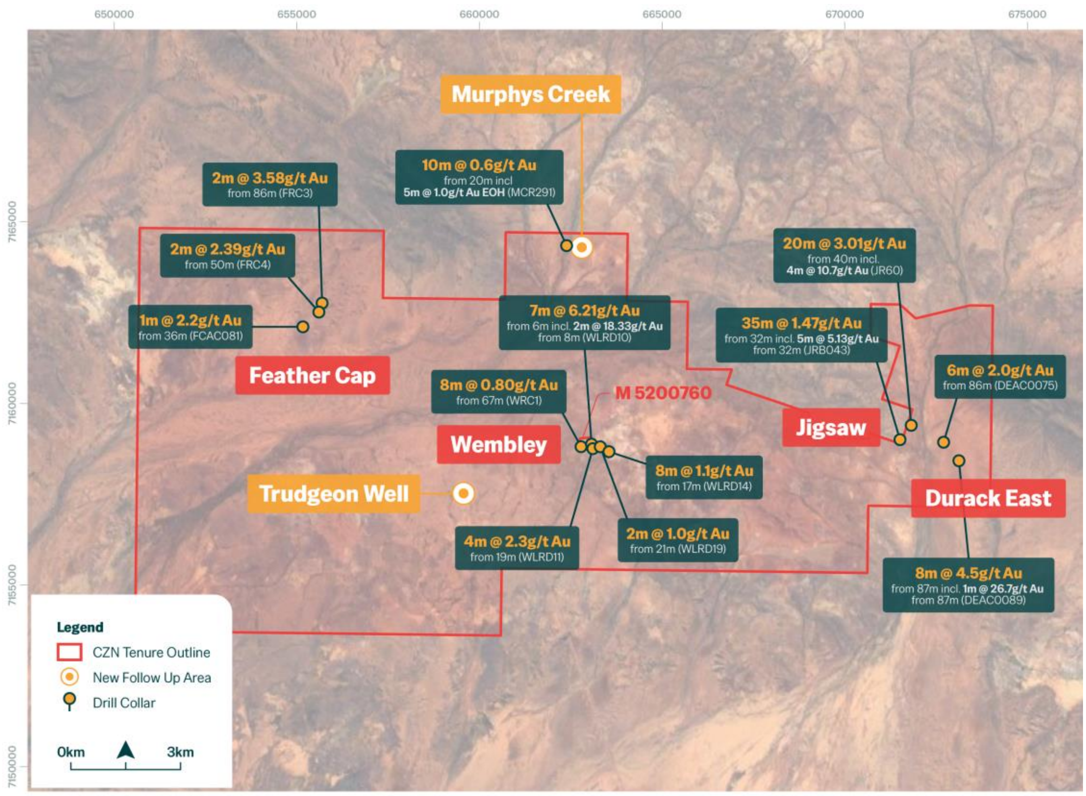

Figure 6: *Feather Cap Target Areas and Historical Drill Intercepts*

[5] See Corazon Mining ASX Announcement "New Drill Targets Identified at Feather Cap" dated 15 April 2026

Heritage Survey Completed, Path Cleared to Drilling[6]

On 30 June 2026, Corazon announced completion of a heritage survey across the primary Wembley and Durack East/Jigsaw drill target areas, clearing a key approval pathway ahead of a planned maiden RC drilling program.

- Wembley (granted Mining Lease M52/760 and Exploration Licence E52/4204) is characterised by shallow, high-grade oxide gold mineralisation, with historical intercepts including 7m @ 6.21g/t Au from 6m (incl. 2m @ 18.33g/t Au from 8m, WLRD10) and 4m @ 2.3g/t Au from 19m (WLRD11).

- Durack East/Jigsaw, located along strike from Great Boulder Resources' 112koz Durack Gold Deposit, has returned historical intercepts including 35m @ 1.47g/t Au from 32m (incl. 5m @ 5.13g/t Au, JRB043) and 8m @ 4.5g/t Au from 87m (incl. 1m @ 26.7g/t Au, DEA0089).

Lynn Lake Nickel-Copper-Cobalt Project, Manitoba, Canada (100% CZN)

The Lynn Lake Nickel-Copper-Cobalt Sulphide Project in Manitoba, Canada, hosts a significant JORC-compliant resource and represents a long-term battery minerals optionality for the Company. The project saw minimal activity during the quarter as the Company prioritised its West Australian gold strategy. Corazon continues to assess the optimal pathway to unlock value from this asset.

Mt Gilmore Copper-Cobalt-Gold Project, New South Wales (100% CZN)

Activities at the Mt Gilmore Copper-Cobalt-Gold Project in New South Wales were minimal during the quarter. The project remains an important component of the Company's broader portfolio. Corazon continues to monitor opportunities to advance this asset.

CORPORATE ACTIVITIES

Board and Management

- Mr Warrick Clent was appointed Non-Executive Director effective 5 May 2026, bringing over 30 years of exploration and executive leadership across orogenic gold, porphyry copper-gold, nickel sulphide and base metals systems across the Asia-Pacific region, together with demonstrated experience in project evaluation, due diligence and corporate transactions.

- Mr Paul Hughes was appointed Chief Financial Officer effective 5 May 2026. Mr Hughes is a Chartered Public Accountant with over 16 years' experience, including 12 years in the construction and resources sector, and most recently held a senior corporate planning role with ASX-50 lithium producer Pilbara Minerals Limited (ASX: PLS).

- Mr Hughes replaces Mr Robert Orr, who retires from the CFO position after 16 years but remains as Company Secretary to provide continuity.

General Meeting of Shareholders

At a General Meeting of shareholders held on 29 June 2026, all resolutions were passed by poll, including approval for the issue of Consideration Shares and Placement shares to progress the Chalice Gold Project acquisition, ratification of the agreement to issue broker options, and approval for the issue of Director placement shares. Full voting results are set out in the Company's ASX announcement dated 29 June 2026.

[6] See Corazon Mining ASX Announcement "Feather Cap Heritage Survey Completed" dated 30 June 2026

Capital Raising

Shareholder approval was obtained during the quarter for a A$16.5 million (before costs) placement of approximately 117.9 million new fully paid ordinary shares at an issue price of A$0.14 per share. Settlement of the Placement occurred subsequent to quarter end (see below).

OUTLOOK

The Company is well positioned for a highly active September 2026 quarter, underpinned by completion of the Chalice Gold Project Acquisition and a strengthened balance sheet following the associated Placement. Key anticipated milestones include:

- Commencement of the ~10,000m Phase 1 resource growth drilling program at Chalice, targeted for Q3 CY2026, with initial holes focused on the near-surface zone up-dip from the Kronos lode identified through this historical data review;
- Progression of cut-off grade and open pit re-optimisation studies at Chalice, incorporating findings from the recent historical drill data review and the current elevated gold price environment;
- Continued interpretation of structural data from the maiden diamond drilling program at Two Pools to design and progress the follow-up Reverse Circulation (RC) campaign, alongside integration of historical exploration data into regional geological models over the expanded Plutonic-Marymia landholding;
- Advancement of exploration planning toward a maiden RC drilling program at Feather Cap, following completion of the heritage survey across the Wembley and Durack East/Jigsaw target areas; and
- Continued build-out of Corazon's technical team under newly appointed General Manager – Geology, Will Stewart, to support resource growth planning across the Chalice, Two Pools and Feather Cap projects.

EVENTS SUBSEQUENT TO QUARTER END

Completion of the Chalice Gold Project Acquisition, including settlement of the A$16.5 million Placement and issue of the Consideration Shares to Westgold Resources Limited, occurred subsequent to 30 June 2026. The Company announced completion of the Acquisition and associated A$16.5 million Placement on 9 July 2026.

On 6 July 2026, the Company announced the appointment of Mr Will Stewart as General Manager – Geology, to lead resource development and exploration strategy across the Company's WA gold portfolio, including Chalice, Two Pools and Feather Cap. Mr Stewart brings more than 20 years of technical and corporate leadership, including experience as Competent Person for resource estimates and exploration results at ASX-listed gold and base metals operators.

On 15 July 2026, the Company announced the results of a systematic review of historical drilling at Chalice, identifying multiple high-grade gold intercepts outside the current 191,000oz @ 2.7g/t Au JORC 2012 Mineral Resource, both near-surface and at depth. The results support the view that the Mineral Resource remains open for expansion and will directly inform the design of the Phase 1 drilling program.

FINANCIAL

Corazon closed the Quarter with approximately A$1,453,000 in cash; the Company's quarterly summary of financials are presented as a separate ASX release in the Appendix 5B.

In accordance with Listing Rule 5.3.1, 5.3.2 and 5.3.5 the Company hereby provides disclosure to reflect the information required in the quarterly report and the Appendix 5B, the information required is as follows:

- Item 6.1 in the Appendix 5B included an amount of A$114,000 as payment to related parties; this reflected payments to directors including non-executive directors for fees, salaries and consulting costs for the quarter.
- Item 2.1 in the Appendix 5B included expenditure of A$728,000 on Exploration Activities, associated with activities at the Lynn Lake Project in Canada, Two Pools, Feather Cap in Western Australia and Mt Gilmore Project in NSW.

This announcement has been authorised for release by the Board of Corazon Mining Limited.

Competent Persons Statement and Previously Reported Information

The information in this report that relates to exploration results and proposed activities is based on and fairly represents information compiled by Mr. Warrick Clent (B.Sc (Geol), member of The Australian Institute of Mining and Metallurgy), a director of Corazon Mining Limited. Mr. Clent has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr. Clent consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.

The information above that relate to Exploration Results has previously been released to the ASX. The Company confirms that it is not aware of any information or data that materially affects the information included in those market announcements, and that all material assumptions and technical parameters underpinning the announcements continue to apply. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Forward Looking Statements

This announcement contains certain statements that may constitute a "forward looking statement". Such statements are only predictions and are subject to inherent risks and uncertainties, which could cause actual values, results, and performance achievements to differ materially from those expressed, implied or projected in any forward-looking statements. Forward-looking statements are statements that are not historical facts. Words such as "expect(s)", "feel(s)", "believe(s)", "will", "may", "anticipate(s)" and similar expressions are intended to identify forward-looking statements. These statements include, but are not limited to statements regarding future production, resources or reserves and exploration results. All such statements are subject to certain risks and uncertainties, many of which are difficult to predict and generally beyond the control of the Company, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: (i) risks associated with acquisition and divestment of projects (including risks associated with completing due diligence and, if favourable results are obtained, 5 ASX Announcement | 8 October 2025 proceeding with the acquisition of the Feather Cap

Project), (ii) those relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits and conclusions of economic evaluations, (iii) risks relating to possible variations in reserves, grade, planned mining dilution and ore loss, or recovery rates and changes in project parameters as plans continue to be refined, (iv) the potential for delays in exploration or development activities or the completion of feasibility studies, (v) risks related to commodity price and foreign exchange rate fluctuations, (vi) risks related to failure to obtain adequate financing on a timely basis and on acceptable terms or delays in obtaining governmental approvals or in the completion of development or construction activities, and (vii) other risks and uncertainties related to the Company's prospects, properties and business strategy. Our audience is cautioned not to place undue reliance on these forward-looking statements that speak only as of the date hereof, and we do not undertake any obligation to revise and disseminate forward-looking statements to reflect events or circumstances after the date hereof, or to reflect the occurrence of or non-occurrence of any events. The Company believes that it has a reasonable basis for making the forward-looking Statements in the announcement based on the information contained in this and previous ASX announcements. The Company is not aware of any new information or data that materially affects the information included in this ASX release, and the Company confirms that, to the best of its knowledge, all material assumptions and technical parameters underpinning the exploration results in this release continue to apply and have not materially changed.

About Corazon

Corazon Mining Limited (ASX: CZN) is a Western Australian gold exploration and development company. Following the acquisition of the Chalice Gold Project, Corazon's primary focus is advancing Chalice through a targeted resource growth drilling program in the established Higginsville gold district of the Eastern Goldfields. Chalice hosts a 191,000 oz JORC 2012 Mineral Resource at 2.7 g/t Au on a granted Mining Lease, has a production history of 645,000 oz of gold, and lies within 130 km of seven operating processing facilities, including Westgold's 1.6 Mtpa Higginsville CIL plant. As part of the Chalice acquisition, Westgold Resources Limited (ASX: WGX) holds an approximate 19.9% strategic interest in Corazon and is aligned with the long-term success of Chalice and the Company.

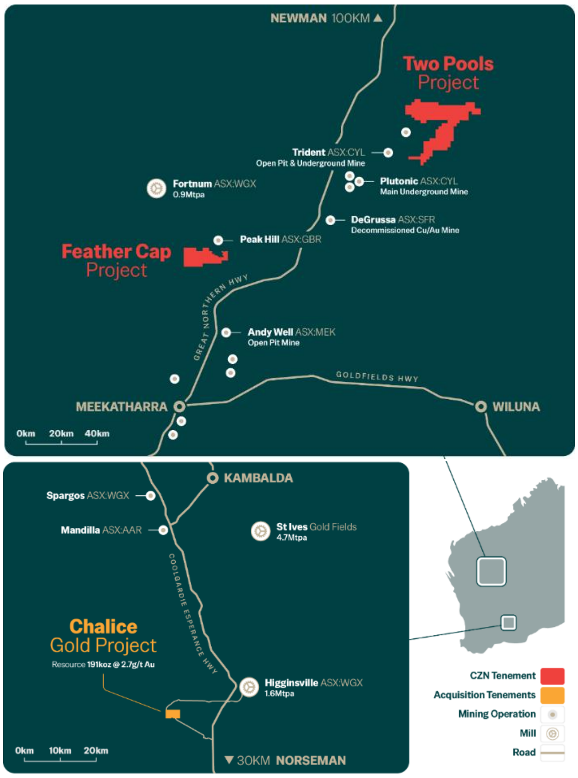

Figure 1: *Corazon Mining's Western Australian Gold Project locations*

The Chalice Gold Project hosts a JORC 2012 Mineral Resource Estimate (MRE) of 2,181,000 tonnes at 2.74 g/t gold for 191,000 ounces of contained gold, reported within the granted Mining Lease (M15/786) at a cut-off grade of 1.3 g/t Au (see Table 1). The MRE comprises 42,000 oz Measured, 94,000 oz Indicated and 55,000 oz Inferred, providing a strong foundation for potential resource growth through a systematic drilling program.

Table 1: *Statement of Mineral Resources by Deposit as at 11 April 2026 with 1.3 g/t Au cut off*

Classification	Tonnes (kt)	Grade (g/t Au)	Contained (koz Au)
Measured	406	3.19	42
Indicated	1120	2.6	94
Inferred	655	2.64	55
Total Resources	**2,181**	**2.74**	**191**

Notes:
1. *Mineral Resources are classified and reported in accordance with the 2012 JORC Code as at 11 April 2026 at a 1.3g/t Au cut-off and US$1,700/oz gold price.*
2. *Numbers may not add up due to rounding.*
3. *Refer to the Company's ASX Announcement "Chalice Acquisition Establishes Corazon as an Emerging Gold Developer" dated 19 May 2026 for full disclosure, including Annexure A, B and C.*

Corazon's broader portfolio includes the Two Pools Gold Project in the Plutonic-Marymia Greenstone Belt and the Feather Cap Gold Project in the Bryah-Padbury Basin in Western Australia, together with the Lynn Lake Nickel-Copper-Cobalt Sulphide Project in Manitoba, Canada.
