BSFA Key Updates

During the quarter, BSFA continued to advance the commercialisation of its biotechnology platform across its operating subsidiaries, achieving significant milestones in product development, financing and international recognition.

A major highlight was the unveiling of the world’s first luxury handbag made from cultivated T-Rex Leather™, developed by Lab-Grown Leather Ltd. The launch attracted widespread international media attention and demonstrated the commercial potential of BSFA’s proprietary cultivated leather technology.

The marketing promotion of the handbag was subsequently showcased at the Cannes Lions International Festival of Creativity, where it received significant industry recognition for its innovation, before being auctioned in Paris. The auction successfully generated further international exposure for the Company’s cultivated

leather technology, validating growing market interest in premium sustainable luxury products. However, the bidding reached Euro150,000 which was short of the reserve price. Consequentially the handbag was passed in and BSFA is seeking a private sale.

During the quarter, BSFA also significantly strengthened its financial position through a series of successful capital raising initiatives. In April 2026, the Company completed a placing to institutional investors, followed by a £1.0 million convertible loan note facility to support the continued commercial development of its businesses.

These achievements position BSFA with increased financial capacity to execute its commercial strategy, expand strategic partnerships and continue progressing towards commercial revenue opportunities.
