

Quarterly Report

For the period ended 30 June 2026

Operational Highlights

- Initial Reverse Circulation (RC) drill program completed during the quarter
- Government Exploration Incentive Scheme (EIS) co-funding awarded to MB Gold
- Heritage survey completed over Razorback Prospect
- Positive assay results from Twin Veins received
- Termination of the existing 0.75% net smelter royalty held by First Au Limited

MB Gold Limited (ASX:MBG) (**MB Gold** or the **Company**) is pleased to report its activities for the quarter ended 30 June 2026 at its Marble Bar Gold Project, located within the highly prospective Marble Bar region of the Pilbara, Western Australia

Corporate

Cash position of \$5.96 million at 30 June 2026.

During the quarter MB Gold completed the termination of the existing 0.75% net smelter royalty (NSR) held by First Au Limited (First Au) over the Company's tenements E45/3679, E45/3857, E45/4137, E45/5571, E45/5595 and E45/5596. Consideration for the Termination comprised the issue of 256,958 fully paid ordinary shares in the Company to First Au at a deemed value of \$50,000¹.

The Company also issued 1,440,000 Long-term Incentive Performance Rights to senior management and staff. The terms of the Performance Rights are designed to assist in the reward, retention and motivation of senior management and staff and to align their interests with those of shareholders by rewarding performance against the Company's strategic objectives². In addition, the Board approved the proposed issue of 3,400,000 Performance Rights to Directors subject to shareholder approval at the Company's 2026 Annual General Meeting.

Exploration

During the quarter, the Company commenced its maiden ~6,000m Reverse Circulation (RC) drill program. The RC program focused primarily on the high-priority Twin Veins and Douglas Find prospects. These areas are strategically located within a structurally complex zone surrounding a granite intrusive on the northwest margin of the Mt Edgar Batholith and are key to unlocking the project's significant gold potential³.

Initial assay results from the Twin Veins Prospect returned encouraging gold mineralisation, including^{4,5}

- 20m @ 1.7g/t Au from 81m, including 7m @ 4.06g/t Au from 81m in 26MBRC005;
- 8m @ 2.5g/t Au from 48m in 26MBRC015, and
- 5m @ 1.25g/t Au from 82m in 26MBRC019.

These initial results demonstrate the potential that exists at the Twin Veins Prospect and the Marble Bar Gold Project more broadly.

Phase 1 drilling was completed safely and efficiently during the quarter by the team on site.

Further drill planning and preparation for the 6,000m Phase 2 drill program are under way.

⁴ASX Announcement 20 May 2026 "Exceptional initial assay results from Twin Veins"

⁵ASX Announcement 15 June 2026 "Further positive assay results from Twin Veins received."

During the quarter, a drone LIDAR survey has been flown over the key prospects at the Marble Bar Gold Project, providing high resolution topography and orthophoto to support the team with field activities including mapping, drill hole planning, drill pad preparation and any future resource modelling.

On 28 April 2026, MB Gold announced it had been successful in its application to Venture 3 of the Government Co-funded Geophysics Program for \$100,000 in co-funding towards a geophysical survey at the Marble Bar Gold Project. The DDIP survey will cover the Murphy Well Prospect. The survey is designed to test the potential for an intrusive related/porphyry gold and base metal mineralised system at Murphy Well similar the Spinifex Ridge Mo-Cu-Ag porphyry deposit 20km to the east-northeast associated with the same granite. The survey results combined with the historical drill results may support further drill testing⁶.

The Company also successfully completed a heritage survey over its Razorback Prospect. The heritage survey was undertaken by Nyamal Traditional Owners, reflecting MB Gold's ongoing commitment to its Heritage Protection Agreement and its collaborative approach to exploration⁷.

About MB Gold Limited:

MB Gold Limited is focused on gold exploration in the highly prospective Marble Bar region of Western Australia. The Marble Bar Gold Project (MBGP) is strategically located northeast of Marble Bar, within the Archean Pilbara Craton. The package spans the northwest margin of the Mt Edgar Batholith, a geologically significant zone with high potential for gold mineralization. The project boasts a 12km strike length of gold-in-soil geochemical anomalies, which are offset by late-stage faulting. Existing drill intercepts have already returned positive gold results.

MB Gold benefits from excellent infrastructure and accessibility adjacent to and into the project area. The site is just 150km from Port Hedland via the sealed Marble Bar Road, 40km from the Marble Bar townsite, and 60km from AIM Mining Corporation's Warrawoona Operations.

Competent Persons' Statements and JORC Compliance Statements

The information in this report that relates to the exploration results is extracted from the Company's ASX announcements referenced in this report and which are available on the Company's website www.mbgold.com.au and the ASX website (ASX code: MBG).

The Company confirms that it is not aware of any new information or data that materially affects this information included in the relevant market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings that are presented have not been materially modified.
