Perth, Australia: Advanced Braking Technology Ltd (ASX: ABV) ('ABT' or 'the Company' or 'the ABT Group') is pleased to report its quarterly activities report for the period ended 30 June 2026 (Q4).

Record Revenue and Operational Momentum

ABT delivered another strong quarterly performance in Q4 FY26, with record product sales revenue of $6.2 million, up 10.7% on the prior corresponding period. The result reflects continued demand for the Company's safety-critical braking solutions, supported by disciplined execution, a growing installed base and ongoing momentum across both domestic and international mining markets. Unaudited total revenue for FY26 was $23.5m, up from $19.1m in FY25.

Normalised unaudited net profit before tax (NPBT) for the quarter was $652k, up 81.0% on the pcp. This outcome was supported by operating discipline and record total gross margins of 50.7% (47.4% pcp), demonstrating the scalability of ABT's operating model and the strength of its product mix.

Commenting on the Company's Q4 FY26 performance, Managing Director and Chief Executive Officer Andrew Booth said: "ABT delivered a strong result in the fourth quarter, supported by ongoing demand for our safety-critical braking solutions, disciplined execution, and growing momentum across our domestic and international markets.

"During the quarter, we advanced key innovation programs, expanded engagement with mining customers and strategic partners, and continued to strengthen our installed base and aftermarket revenue platform. The increasing interest in our next-generation safety technologies reinforces both the scale of the market

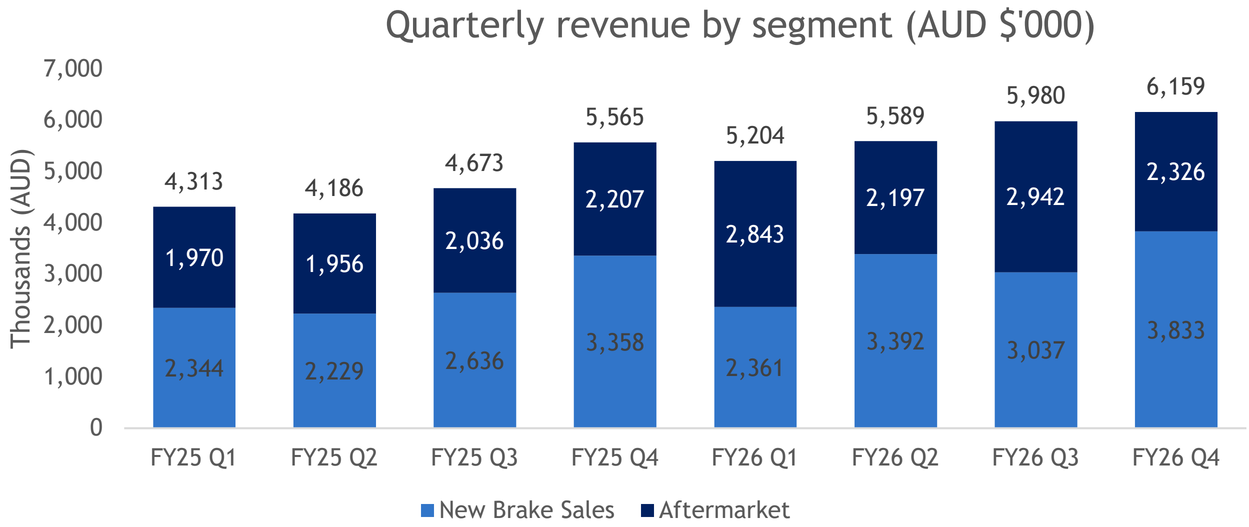
opportunity and the strength of ABT's long-term growth strategy. Central to this strategy is the continued investment in R&D to leverage our proprietary technologies and diversify our product portfolio.

"With a strong balance sheet, expanding global opportunities and a clear pathway to scale, the Company enters FY27 well positioned to capitalise on demand for vehicle safety and automation solutions across the mining sector."



Market Leadership, Innovation and International Growth

ABT continues to execute on its strategy to become the leading provider of safety-critical braking technologies for the global mining industry. During the quarter, the Company achieved substantial progress across its innovation portfolio, with ongoing development and validation activities supporting the commercialisation of its next-generation safety technologies.

A key focus during the period was the advancement of BRAKEiQ, ABT's autonomous braking solution designed to integrate seamlessly with Collision Avoidance Systems (CAS) and legacy mining fleets.

During the period, ABT achieved eight key technical and customer engagement milestones, advanced major integration work, expanded engagement with leading PDS OEMs, strengthened strategic partnerships and saw growing interest across mining, aggregates and mineral sands markets in Australia, North America and South America.

The Company's innovation pipeline extends beyond BRAKEiQ, with ongoing development work progressing across both autonomous braking and fail-safe vehicle safety technologies. These initiatives reinforce ABT's position as a technology-driven OEM focused on solving critical safety challenges for mining operators globally.

International Expansion

ABT's international growth strategy gained momentum during the quarter, with increased engagement across North America, Africa and Asia-Pacific. The Company strengthened relationships with distribution and strategic partners while expanding opportunities within both underground and surface mining applications. The increasing global installed base of ABT safety systems continues to support growth in recurring aftermarket revenue through aftermarket, consumables and refurbishment activities. This growing installed footprint provides a strong platform for future earnings growth while enhancing customer relationships and strengthening barriers to entry.

ABT's global expansion is a response to the positive outlook for the mining sector and its increasing demand for advanced safety technology. By diversifying its products and focusing on customer-driven innovation, the

Company is aiming to capitalise on the international growth opportunities, solidifying its position as a global supplier and a trusted partner for mining operations worldwide.

Update on Middle East conflict and market conditions

ABT is monitoring geopolitical developments in the Middle East and the potential impacts on global shipping routes, logistics costs and vehicle supply chains. While these external conditions remain fluid, the Company has not experienced any material disruption to date. Management remains focused on maintaining supply chain resilience, actively engaging with customers and suppliers, and positioning the business to respond to any changes in market conditions or customer capital expenditure timing.
