

# Quarterly Activities Report

For the period ending 30 June 2026

Augustus Minerals (ASX: **AUG**; "**Augustus**" or the "**Company**") is pleased to provide the following summary of activities undertaken during the quarter ended 30 June 2026 (**June Quarter**) in relation to the Music Well, Mt Kare, Vanapa River and Ti-Tree Projects.

## Highlights

### Music Well

- Assay results of 1m samples from the March 2026 drilling program at the Clifton East prospect at Music Well Gold Project were returned during the June Quarter.
- The 1m March RC results included<sup>1</sup>:
  - **11m at 2.41g/t gold** for 26.5g\*m from 32m in MWRC0006
  - **11m at 0.92g/t gold** for 10.1g\*m from 69m in MWRC0007
  - **34m at 0.83g/t gold** for 28.1g\*m from 38m in MWRC0010
- Follow-up drilling program at the Clifton East prospect at Music Well Gold Project has been completed with 11 RC holes drilled for 1650m.
- The 150m deep angled RC holes infilled between drill lines and intersections from the first phase of drilling conducted in March 2026.
- **Diamond drilling at Clifton East commenced testing down dip** of the mineralisation identified in RC holes MWRC0006 and MWRC0007.

### Mt Kare

- The advanced Mt Kare Gold Project is an Exploration Licence Application that is continuing to progress through the PNG permitting system whilst the Company continues to advance landowner engagement

### Vanapa River

- The application covering 1,900 km<sup>2</sup> within the highly prospective New Guinea Mobile Belt is located **~40 km along strike from the 1.5Moz Tolukuma Gold Mine.**
- The **Company continues to advance landowner engagement and permitting processes** with a view to progressing systematic exploration once the licence is granted.

### Corporate

- In May, the Company announced that it has received commitments from institutional, professional and sophisticated investors, Company directors and management to **raise \$2.5 million**; highlighted by the participation of **G Ex Australia Pty Ltd (a subsidiary of Gold Fields Limited) taking a 5% equity position.**

Figure 1 Augustus Minerals Project Locations.

## Music Well Project

Augustus Minerals Limited (ASX: AUG) holds the exploration licenses and applications comprising the Music Well Gold Project ("Project") located 35km north of Leonora in the **Leonora/Laverton Greenstone Belt** of Western Australia.

Music Well comprises fourteen exploration licences covering an area of **1,242km<sup>2</sup>**, making the Project one of the largest exploration packages in the region (Figure 2).

The outstanding gold endowment of the Leonora-Laverton District of **>28M ounces<sup>2</sup>** is illustrated by the numerous operating gold mines including the **Darlot Gold Mine** (~12km to the north), the **King of the Hills Mine** (~20km to the west), the **Leonora Gold Camp** (~30km to the southwest), and the **Thunderbox Gold Mine** (~20km to the west).

### RC Drilling at Clifton East prospect

The maiden March RC drilling program tested a 600m strike length of the broader 1.2km long Clifton East gold-in-soil anomaly, with drilling completed on three lines, with a single hole targeting an area of localised high grade rock chips just south of the interpreted northeast striking structure (MWRC0001) Figure 3.

Assay results from the initial 4m composite samples were received in late April, and subsequent assays of the 1m samples that returned anomalous results were returned in late June (Table 1)<sup>3</sup>.

The 1m March RC results included:

- **11m at 2.41g/t gold** from 32m in MWRC0006
- **11m at 0.92g/t gold** from 69m in MWRC0007
- **34m at 0.83g/t gold** from 38m in MWRC0010

The geological setting and geochemistry at Clifton East show strong similarities with the Gold Cities group of deposits (1.4Moz Au), one of the largest granite hosted Archaean gold systems in Australia<sup>3</sup>. Golden Cities is located 50km north of Kalgoorlie and is hosted within a sanukitoid type mafic granitoid<sup>3</sup>. Sanukitoids have also been identified by the GSWA at Music Well<sup>4</sup>. Distal epidote surrounds a proximal chlorite after biotite alteration zone which contains quartz sulphide veins – similar alteration to that seen in the drilling at Clifton East.

**Table 1 Drilling intersections from March 2026 drilling > 0.1g/t Au from 1m samples (Variances in g\*m calc are due to rounding). Intersections >0.2g/t Au have not been included in this table<sup>1</sup>.**

| Hole ID               | From m    | To m      | Width m  | Au g/t      | g*m Au |

| MWRC0011              | 60        | 71        | 11       | 0.22        | 2.4    |
| MWRC0011              | 86        | 92        | 6        | 0.21        | 1.2    |
| MWRC0011              | 94        | 98        | 4        | 0.31        | 1.3    |

A second RC drilling program was completed in early June, with another 11 holes for a total of 1650m drilled. There is now drill coverage over 400m of the 1.2 km long soil gold anomaly with spacing of drill lines of 40m in the west and 80m in the east. The new drilling to 150m depth and nominal -55 degree dip has extended further into fresh rock than the first program, which should provide valuable mineralogical and alteration information as well as fresh rock gold grade.

Assays from the second RC program are expected in late July.

In early July a diamond drilling program commenced at Clifton East. On hole will be drilled down dip of the mineralisation identified in RC holes MWRC0006 (11m at 2.41g/t gold from 32m) and MWRC0007 (11m at 0.92g/t gold from 69m)<sup>1</sup> and for a planned depth of 200m. The drill core from the hole will provide valuable alteration, structural and density information.

### Planned Activities (Next Quarter):

- Soil geochemistry over Black Cat East and Teutonic East prospects, as well as extensions to existing soil sample areas along strike of major structures (Figure 4) that host gold mineralisation.
- RC drilling of St Patrick's Well and Black Cat East prospects.

**Figure 2** Music Well regional Tenement Packages, Gold Prospects and nearby mines.

Figure 4 Cross Section A-A' comparing the recent 1m splits with the original 4m composite intersections.<sup>1</sup>

## Ti Tree Project

The **Ti Tree Project**, covering an area of 840km<sup>2</sup>, contains **several gold and copper prospects** as well as **demonstrated potential for Cu-Ni-PGE mineralisation** within the 16km strike of the Money Intrusion within Augustus tenements (Figure 5). The Money intrusion is being explored by Dreadnought Resources Limited and Teck Resources Limited immediately to the north of Augustus tenure.

Augustus has also **defined Cu-Mo potential at the Minnie Springs porphyry** prospect and defined several high-grade Cu-Au occurrences which require further work.

No field work was conducted during the quarter.

**Figure 5** Ti Tree Project Tenure, Prospects and adjacent mineralisation.

The map displays the New Guinea Mobile Belt, a tectonically active region. Key features include:

- Geological Features:**
  - SEDIMENTARY AND METAMORPHIC ROCKS:** Quaternary, Tertiary, Cretaceous, Paleogene, Paleozoic, Proterozoic.
  - IGNEOUS ROCKS:** Alkaline, Intermediate to basic, Ultrabasic, Acid, Intermediate to basic, Ultrabasic, Basic.
- Mineral Deposits and Localities:**
  - Frieda River (PanAust):** 12Blbs Cu, 10Moz Au.
  - Porgera (Barrick/New Porgera):** 32Moz Au.
  - ELA2446:** A large area of exploration.
  - Mt Kare (Pending):** A pending mine.
  - Crater Mountain (Crater Gold):** 0.8Moz Au.
  - GOROKA:** A major locality.
  - Kainantu (K92 Mining):** 0.8Blbs Cu, 4.6Moz Au.
  - Hidden Valley (Harmony):** 8.3Moz Au.
  - Wafi Golpu (Newmont/Harmony):** 22Blbs Cu, 23Moz Au.
  - Tolukuma (Tolu Gold):** 1.5Moz Au.
  - Kodu Porphyry:** 2.6Moz au, 1,630Mlbs Cu.
  - ELA2955:** A large area of exploration.
  - PORT MORESBY:** A major locality.
- Scale and Orientation:**
  - Scale: 100km.
  - Orientation: North arrow pointing towards the top right.

## Mt Kare Project

**Augustus Minerals Ltd**, through ACMPNG (now a wholly owned subsidiary of the Company) **holds a second-in-time Licence Application for the Mt Kare Gold Project**. The Mt Kare exploration licence application continues to progress through the PNG permitting system.

The Mt Kare Gold Project lies 15 km southwest of Barrick (Niugini) Limited's multi-million-ounce Porgera gold mine. Both Mt Kare and Porgera Gold deposits are classified as Alkalic Epithermal deposits (Figure 7) and have formed in a continent-arc collision zone<sup>5</sup>.

Alkalic type deposits are a subset of low-sulphidation epithermal deposits and form some of the largest deposits in the world. They are characterized often by a second stage of high-grade mineralization that overprints an earlier porphyry related mineralization. Compared to conventional low-sulphidation deposits they offer the opportunity for **large vertical continuations**, both **low-grade stockwork to bonanza grade breccia and vein zones**. There is a close association with roscoelite, a vanadium mica, along with distinct mineral associations including telluride, arsenian pyrite and **abundant native gold** (electrum)<sup>5</sup>.

The Mt Kare Gold Project is hosted by Mesozoic and late Tertiary sedimentary rocks originally deposited on the Australian craton. Following continental collision, folding and thrusting in the Papuan Fold Belt and subsequent uplift, late Miocene-Pliocene (6.0Ma) alkaline intrusive bodies were emplaced. At Porgera and Mt Kare, intrusive complexes, about which subsequent precious metal mineralisation has been centered, are focused at the intersections of a deep-seated transverse fault<sup>5</sup>.

Alkali epithermal gold systems like Mt Kare are a rare class of gold deposit, that includes Porgera (PNG) (32Moz Au), as well as Lihir (PNG) (47Moz Au), Cadia-Ridgeway (NSW) (>50Moz Au) & Cripple Creek (Colorado) (26Moz Au)<sup>5</sup>.

Mt Kare is one of the largest undeveloped gold assets in Australasia.

**Figure 7** Geological relationships between Mt Kare and nearby Porgera Gold Mine<sup>3</sup>.

## Vanapa River Exploration Licence Application ELA2955

The Vanapa River Exploration Licence Application (ELA2955) in the Kira Koiari District, Central Province, PNG covers approximately **1,900 km<sup>2</sup> within the highly prospective New Guinea Mobile Belt, located ~40 km along strike from the 1.5Moz Tolukuma Gold Mine (NW of the Application) and the historic Kodu porphyry deposit (2.6Moz Au, 1,630Mlb Cu SE of the Application)** (Figure 6 and 8, Appendix 2).

The Vanapa River Application provides entry into a true frontier exploration district with minimal historical modern exploration.

The Company continues to advance landowner engagement and permitting processes with a view to progressing systematic exploration once the licence is granted.

**Figure 8.** Location of Vanapa River ELA is shown in relation to other nearby large gold/copper deposits.

## New Projects

The company periodically conducts reviews on other projects that may add value to the Augustus Project portfolio.

## Outlook

The upcoming quarter is expected to be very active, with a strong focus on:

- Continued soil sampling along major structural/mineralisation trends at Music Well
- Diamond drilling at Clifton East prospect at Music Well.
- Advancing PNG exploration opportunities, particularly Mt Kare and Vanapa River.
- Continuing disciplined exploration and portfolio growth aligned with the Company's strategic focus on gold.

## Tenement Status

The Company confirms that all its tenements and tenement applications remain in good standing. During the June Quarter, E09/2476, E09/2518, E09/2519, E09/2946 and E09/2884 were surrendered.

Details of the tenements and their locations are set out in Appendix 1.

## Corporate

In May, the Company announced that it has received commitments from institutional, professional and sophisticated investors, Company directors and management to raise \$2.5 million (Placement). Evolution Capital Pty Ltd (Evolution) acted as Sole Lead Manager to the Placement.

Confidence in the Clifton East mineralisation has been highlighted by the participation of G Ex Australia Pty Ltd (a subsidiary of Gold Fields Limited) in the Placement taking a 5% equity position. Augustus welcomes Gold Fields, now the second largest shareholder to our Share Register.

The Company is convening a general meeting of shares on 7 August 2026 to ratify the Placement shares issued to date and approve the issue of the remaining Placement securities.

During the period, the Company spent \$179,000 on exploration activities. The expenditure represents direct costs associated with the exploration and drilling programs and associated assays outlined in this report. No expenditure was incurred on mining production or development activities during the June Quarter.

At the end of the June Quarter, the Company had \$1.69 million cash at bank.

For the purposes of section 6 of the Appendix 5B, payments totalling \$115,000 were made to related parties for director fees and salaries, office rent and administration services.

Authorised by the Board of Augustus Minerals Limited.

## About Augustus Minerals (ASX:AUG)

Augustus is a mineral explorer committed to exploring its project portfolio with a focus on gold in Western Australia and Papua New Guinea.

- **Music Well Project:** Augustus has 100% ownership of >1,242 km<sup>2</sup> of tenements located 25km North of Leonora, Western Australia with an array of high-quality drill targets which is highly prospective for gold, gold copper VMS and lithium, and rare earths.
- **Mt Kare Licence Application** (Second in Line) in Papua New Guinea: Augustus intends to actively pursue the Application and grant of an exploration license at Mt Kare. This may include objecting to other license applications or negotiating with other applicants with a view to consolidating the various applications to expedite the grant process. Mt Kare is an alkali epithermal gold deposit, a rare class of gold deposit, that includes Porgera (PNG) (**32Moz Au**), Lihir (PNG) (**47Moz Au**), Cadia-Ridgeway (NSW) (**>50Moz Au**) & Cripple Creek (Colorado) (**26Moz Au**)<sup>1</sup>.
- **Vanapa River:** Licence Application ELA2955 covers an area of 1,890km<sup>2</sup> and is situated 40km SE along strike of the **1.5Moz Tolukuma Gold Mine** (NW of the Application) and 28km NW of the **historic Kodu porphyry deposit (2.6Moz Au, 1,630M lbs Cu)** and 35km north of Port Moresby. ELA2955 is located in the New Guinea metallogenic belt, a 2,300 km mineralised corridor running along the central spine and northern foothills of the island of New Guinea. Many large deposits of gold (and copper) occur in the metallogenic belt which is regarded as one of the most prospective gold-copper metallogenic provinces in the world.
- **The Ti-Tree project:** Augustus has 100% ownership of ~840km<sup>2</sup> of tenements located in the Gascoyne Region of Western Australia which is highly prospective for copper, gold, lithium, uranium and rare earths.

Augustus is committed to proactively exploring and securing new acquisition opportunities that align with and enhance the Company's strategic focus. This ongoing pursuit aims to strengthen the Company's portfolio, leverage synergies, and establish a competitive advantage by continuously seeking out complementary assets through a unified exploration and acquisition strategy in Australia and Papua New Guinea.

The Company is led by Directors and Senior Executives with significant Australian and international expertise in exploration and discovery, open cut and underground mining including operational transformation, corporate strategy and capital program delivery.

### Listing Rule 5.23

The information in this announcement has been previously reported by the Company as referenced above (Announcements). The Company confirms that it is not aware of any new information or data that would materially affect the information included in the Announcements.

### Forward looking statements

This announcement may contain certain forward-looking statements and projections. Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. Forward looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. Augustus Minerals Limited does not make any representations and provides no warranties concerning the accuracy of the projections and disclaims any obligation to update or revise any forward-looking statements/projects based on new information, future events or otherwise except to the extent required by applicable laws. While the information contained in this report has been prepared in good faith, neither Augustus Minerals Limited or any of its directors, officers, agents, employees or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement.

| <i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>                                                                                                                |                                                                                                                                                                                                                  |         |

**Compliance statement**

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 July 2026

Authorised by: By the board

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
