INTERNATIONAL GRAPHITE

ASX:IG6 | FWB:H99

QUARTERLY ACTIVITIES REPORT

For the period ending 30 June 2026

International Graphite (ASX: IG6 | FWB: H99) achieved significant project, corporate and commercial milestones during the June quarter to advance its graphite processing businesses in Australia and Europe.

HIGHLIGHTS

- **Binding Joint Venture and Shareholders' Agreement** signed with Alkeemia S.p.A. to progress the Porto Marghera graphite processing hub. Alkeemia 51% / IG6 49%, with profits shared equally.
- **Technical and financial evaluation** completed for the Alkeemia / IG6 Joint Venture, confirming strong project economics.
- **Building permit issued and principal building contract** executed for construction of the Collie Micronising Facility with siteworks underway.
- **Heads of Terms signed** with Wogen Pacific Limited, securing future product sales of ~3kt/y, feedstock supply of ~10kt/y and supply chain support for the Collie Micronising Facility across Asia-Pacific markets.
- **$4.4M equity financing** announced to advance operations in Australia and Europe, cornerstoned by UK-based critical minerals and metals investor Xcelsior Capital and an associated family office investor.
- **Xcelsior CEO Liam Farley appointed Non-Executive Director** on 1 July, adding international investment, project financing, commercial and critical minerals expertise to the IG6 Board.

This announcement has been authorised for release by the Board of Directors of International Graphite Limited.

Andrew Worland
Managing Director & CEO

THE NEXT GENERATION IN
ADVANCED GRAPHITE PROCESSING

PERTH / COLLIE / PORTO MARGHERA / SPRINGDALE

Figure 1. *IG6 project locations.*

EXECUTIVE OVERVIEW

As Governments and manufacturers continue to pursue secure, diversified critical minerals supply chains and increased domestic manufacturing capability, IG6 is establishing graphite processing operations in Australia and Europe. These facilities will supply specialised graphite products for industrial, defence, energy storage and advanced manufacturing to customers in key markets.

During the June quarter, the Company made significant progress across each element of its strategy. In Western Australia, the Collie Micronising Facility progressed through key approvals, construction contracting and procurement. In Europe, the Porto Marghera project advanced to a binding joint venture with Alkeemia S.p.A., following completion of a Technical and Financial Evaluation.

Commercially, an agreement with Wogen Pacific Limited establishes the pathway for future Collie product sales, feedstock supply and supply chain support across the Asia-Pacific region.

The Company's corporate capability has been strengthened through a $4.4M equity financing, including new institutional and family office investors, and the appointment of Liam Farley to the Board.

PROCESS OPERATIONS

COLLIE MICRONISING FACILITY

Construction is underway at the new Collie Micronising Facility in Western Australia following receipt of the final building permit from the Shire of Collie.[1] In June, Prosser Built was appointed to construct the production building.[2] Micronising equipment has been ordered, while vendor testwork and equipment selection for jet milling continued during the quarter.

Figure 2. *Earthworks underway for the new Collie Micronising Facility.*

The Collie Micronising Facility is a significant development for the regional town of Collie. The project is supported by the Western Australian Government's Collie Industrial Transition Fund and the Australian Government's Critical Minerals Office.

Receipt of the building permit satisfied the second milestone under the $4.5 million Collie Industrial Transition Fund grant releasing the next tranche of funding. At 30 June 2026 $2.8 million remained available.

Feedstock, product sales and market support

The Company has signed a non-binding Heads of Terms with Hong Kong based trading company Wogen Pacific Limited to supply graphite concentrate, product sales and marketing support for the Collie Micronising Facility, in Western Australia.[3]

Wogen Pacific is a subsidiary of Wogen Limited, a global leader in the specialist metals and minerals markets, with a track record spanning more than 50 years. Wogen has deep experience in the global graphite supply chain with an outstanding reputation and a strong presence across all major markets.

Under the agreement, Wogen will purchase a minimum of 3,000t/y of micronised graphite from Collie for exclusive distribution throughout the Asia-Pacific region. Wogen also intends to source up to 10,000t/y of flake graphite concentrate to support future feedstock requirements as production at Collie expands.

The proposed arrangements provide access to Wogen's international sourcing capability, logistics network and supply chain finance solutions.

The Heads of Terms is expected to be converted into a definitive commercial agreement as the Collie Micronising Facility progresses towards commercial production.

[3] *ASX Announcement 25 June 2026*

ALKEEMIA / IG6 JOINT VENTURE

Figure 3. *Porto Marghera infrastructure and Alkeemia site location.*

The Company has signed a binding Joint Venture and Shareholders' Agreement with Alkeemia S.p.A., one of Europe's leading hydrofluoric acid (HF) manufacturers, to establish a graphite processing hub at Alkeemia's production site in Porto Marghera, Italy.[4]

The agreement builds on the Memorandum of Understanding announced during the March quarter[5] and establishes the commercial framework for development of the project. Alkeemia will hold 51% of the joint venture and IG6 49%, with profits shared equally.

The JV combines IG6's graphite processing expertise with Alkeemia's strategic industrial infrastructure to create a highly capital-efficient graphite processing operation in the heart of Europe's critical minerals supply.

The initial graphite processing facility will have planned production capacity of approximately 10,000t/y, expanding to approximately 15,000t/y within three years, subject to market demand.

IG6 will fund the capital required for initial development. Expansion is expected to be funded from joint venture cash flow. Under a separate Operations Management Agreement. Alkeemia will provide the land, permitting support, industrial infrastructure along with skilled personnel and operational services.

Project Highlights	
JV ownership	**Alkeemia 51% / IG6 49%**
Profit sharing	**50% / 50%**
IG6 capital contribution	**$12M**
Production	**10,500t/y**

Key Financial Information – 12 Month Snapshot	
IG6 50% SHARE BASED ON CURRENT MARKET CONDITIONS. THIS IS NOT A FINANCIAL FORECAST.	
Sales revenue	**$20.1M**
All in sustaining cost	**$7.9M**
EBITDA	**$12.2M**

A technical and financial evaluation was published in June[6] confirming the strong technical and commercial fundamentals underpinning the JV.

[4] *ASX Announcement 27 May 2026*
[5] *ASX Announcement 26 March 2026*
[6] *ASX Announcement, 17 June 2026*

The evaluation presents a 12-month operating snapshot based on current market assumptions and should not be regarded as a financial forecast.

The evaluation demonstrates that the Alkeemia/IG6 Joint Venture location, within Alkeemia's existing industrial platform, will reduce capital requirements, timelines and execution risk compared with a standalone development. Key advantages include:

- **Established infrastructure –** shared use of existing industrial facilities and services such as warehousing, control rooms, laboratory services and utilities.
- **Land –** Alkeemia holds a 99-year lease on its operating site (ending ~2117) and is contributing land for the JV facility.
- **Direct access to port –** processing at port minimises logistics and lead times for receiving feedstock and despatching finished products.
- **Operations management –** existing senior management and skilled operations personnel are available to the JV with limited new hires required.
- **Permitting –** graphite operations will be conducted within the site which is a fully established HF chemical manufacturing platform with rigorous permitting compliance in place.
- **Construction readiness –** construction capability exists within Alkeemia's workforce and relationships are in place with construction firms that know the site and can mobilise quickly.

The graphite processing facility will be located adjacent to Alkeemia's planned graphite purification plant. As previously announced,[7] IG6 has secured access to 50% of the purification facility's initial capacity, providing a pathway to expand the range of high value graphite products the JV can supply.

Ongoing discussions are focused on project financing, including European critical minerals funding programs, while engagement with prospective customers and trading groups is well advanced.

European market context

Locating the JV processing facilities adjacent to Alkeemia's planned purification facilities creates the platform for a new domestic graphite supply for Europe. The integrated operation will provide:

- More choice and supply chain certainty at scale for European customers seeking high purity graphite products.
- Products that meet EU Critical Raw Materials Act requirements.
- Opportunities for the JV to pursue strategic and government funding.

Almost all of the processed graphite consumed in Europe is imported from China and the European Union is committed to diversifying supply.

China's December 2023 export restrictions sharpened awareness of supply chain concentration risk in graphite. The EU had already begun to address this vulnerability with the Critical Raw Materials Act (CRMA) 2024. The CRMA designates graphite as a strategic raw material, the highest category under the legislation, and sets a target for 40% of EU consumption to be processed domestically by 2030.

[7] ASX Announcement 16 December 2025

About Alkeemia

Figure 4. *Alkeemia's plant infrastructure at Porto Marghera.*

Alkeemia is a major producer of hydrofluoric acid (HF) and fluoro derivatives. HF is the most widely used and commercially proven purification reagent for producing high purity graphite, including to battery grade.

Alkeemia employs more than 100 people and has recently completed a major capital investment program (~€80 million) to upgrade the HF platform at Porto Marghera and add an additional HF production line.

The JV's graphite processing facility will be alongside Alkeemia's new purification plant which is currently under construction at Porto Marghera.

Recognising the growing demand for high purity graphite, Alkeemia is building a 200t/y graphite purification pilot plant with plans to expand output capacity to 20,000t/y by 2030.

As previously announced, IG6 has secured up to 50% of the plant's initial production capacity to use for ongoing testwork.

Preliminary testwork was completed in February with outstanding results. Further results were released in April and showed consistent performance across graphite concentrates from multiple sources and flake sizes, demonstrating the suitability of Alkeemia's process for treating a broad range of graphite feedstocks.

Purification testwork

Alkeemia has announced plans to establish a significant graphite purification capacity at Porto Marghera. A non-binding letter of intent was signed in December 2025 for Alkeemia to provide toll treatment purification services to IG6.[8]

A purification pilot plant is currently under construction and IG6 has been allocated up to 50% of the plant's 200t/y capacity for testwork purposes.

Sample Concentrate Grade Tested	Source	Potential Use	Purification Results
+894	East Africa	Expandable graphite	**99.98%**
+890	East Africa	Expandable graphite	**99.98%**
-185	Europe	Micronised graphite	**99.96%**
-194	East Africa	Micronised graphite	**99.96%**
-194	Springdale	Micronised graphite	**99.98%**
+897	Europe	Expandable graphite	**99.93%, 99.91%**
+895	East Africa	Expandable graphite	**99.98%**

Further outstanding purification results[9] were received during the June quarter from Alkeemia's specialist graphite laboratories. All seven concentrate samples tested – including samples from the Company's Springdale Graphite Project – have exceeded target purification levels of 99.9% TGC.

Alkeemia is targeting a phased expansion of its purification capacity, with operations commencing in 2026 and scaling to 20,000 t/y by 2030. IG6 will seek to increase toll treatment usage as the facility ramps up.

Expandable Graphite

The Company is finalising a feasibility study report for a proposed European expandable graphite project, with its partners Arctic Graphite (AS) and Arctic's major shareholder Leonhard Nilsen & Sønner AS (LNS), pursuant to the Co-operation Agreement of 23 July 2025. The parties are working to determine how best to commercialise the expandable graphite opportunity in Europe.

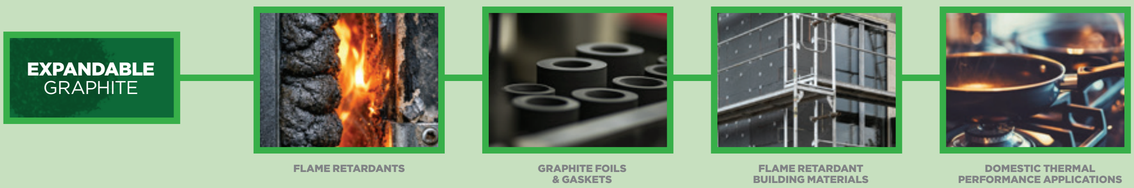

Figure 5. *Expandable graphite product applications.*

SPRINGDALE GRAPHITE PROJECT

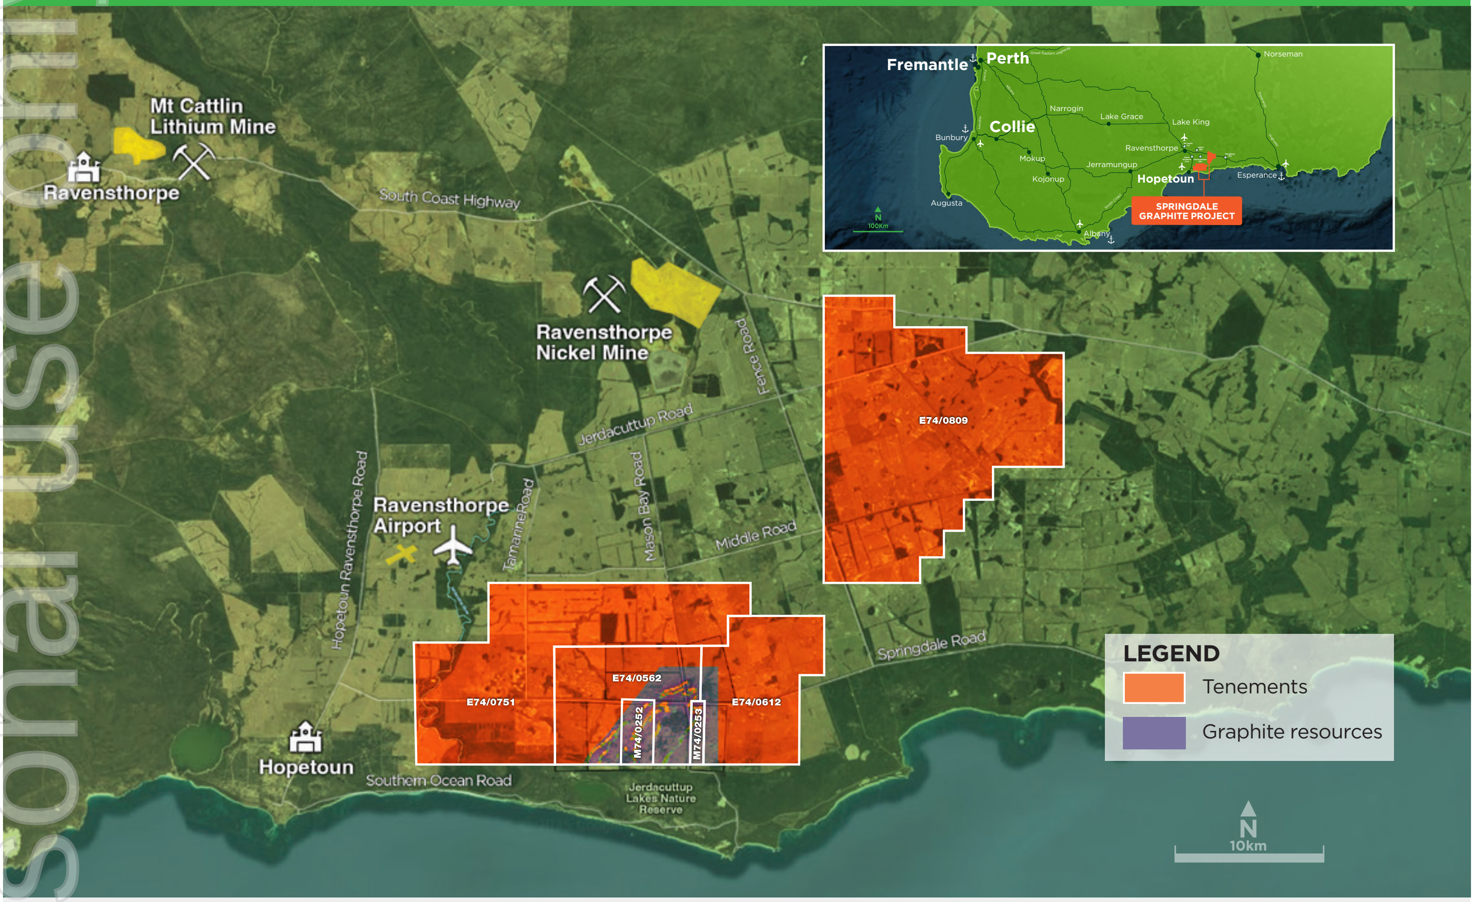

Figure 6. Springdale tenements and mining leases.

The Springdale Graphite Project is in the feasibility stage. As one of Australia's largest graphite resources, it has the quality, scale and development optionality to be a key supply source as global markets evolve. Allied economies are seeking to diversify graphite supply and reduce their reliance on dominant producers and Australia plays an important role as a trusted supplier of critical minerals.

		2% TGC cut-off			5% TGC cut-off		
		Tonnes (Mt)	Graphite (TGC%)	Contained Graphite (Mt)	Tonnes (Mt)	Graphite (TGC%)	Contained Graphite (Mt)
Springdale Central	Indicated	8.8	7.6	0.7	5.9	9.6	0.6
	Inferred	36.2	6.1	2.2	19.0	8.6	1.6
	Total	**45.0**	**6.4**	**2.9**	**24.9**	**8.8**	**2.2**
Mason Bay	Indicated	2.7	7.1	0.2	2.0	8.3	0.2
	Inferred	1.5	6.0	0.1	1.1	6.9	0.1
	Total	**4.3**	**6.7**	**0.3**	**3.1**	**7.8**	**0.3**
Total	**Indicated**	**11.5**	**7.5**	**0.9**	**7.9**	**9.3**	**0.7**
	Inferred	**37.7**	**6.1**	**2.3**	**20.1**	**8.5**	**1.7**
	Total	**49.3**	**6.5**	**3.2**	**28.0**	**8.7**	**2.4**

Key project metrics – first 15 years of operation[10]	
Processing plant capacity:	**500kt/y**
Head grade:	**9.5% C**
Graphite concentrate produced:	**46,000t/y**
Operating cost estimate:	**US$450-485/t concentrate FOB Fremantle**
Capital cost estimate:	**$76M**

The project presents a highly efficient cost structure reflecting the significant infrastructure that exists in close proximity to the project, including roads, water and power access, a commercial airport, accommodation and labour. Capital focuses directly on development of the mine and concentrate processing plant.

Options for developing small scale start up operations are part of the Company's ongoing feasibility work.

Figure 7. *Exploration drilling at Springdale.*

CORPORATE AND FUNDING

Cash position

At 30 June 2026, the Company had cash on hand of $2.71 million.

Equity financing

The Company announced a $4.0 million share Placement in June which was increased to $4.4 million on 1 July.[11]

The Placement comprises the issue of 110 million shares at $0.04 per share with a one for two free attaching option exercisable at $0.08 per share within two years from issue.

The Placement will be completed in two tranches. Tranche 1 was completed prior to quarter end and comprised 51,183,687 shares at $0.04 per share raising approximately $2.0 million before costs under the Company's existing placement capacity.

Tranche 2 comprises 58,816,313 shares and will raise $2.4 million before costs and will be issued subject to shareholder approval at a General Meeting scheduled for 3 August 2026. The options will also be issued subject to shareholder approval at the General Meeting.

[10] *ASX Announcement 29 January 2024*
[11] *ASX Announcement 19 June 2026*

Funds raised will be used to progress the Alkeemia / IG6 Joint Venture towards a Final Investment Decision, development of the Company's graphite processing operations in Australia and Europe, and general working capital.

The Company has approximately $7.6M in undrawn Western Australian Government grant funding available to support development of the Collie Micronising Facility and associated processing activities.

Board appointment

Critical minerals finance specialist Liam Farley joined the IG6 Board as a Non-Executive Director on 1 July 2026.[12]

Mr Farley is the founder and Chief Executive Officer of cornerstone investor Xcelsior Capital and brings more than two decades of experience across international project finance, strategic investment and the critical minerals sector. His appointment enhances the Board's commercial, investment and international industry experience and strengthens the Company's ties with Wogen as a key partner.

Figure 8. *Non-Executive Director Liam Farley.*

Community and industry engagement

Workforce development, technical innovation and regional economic growth continue to be the primary focus of the Company's social investment program. Key activities during the quarter include:

- **Skills development –** Graphite samples were provided to the nationally recognised Teacher Earth Science Education Programme Ltd (TESEP) for its Critical Minerals Kits, giving students hands-on experience with critical minerals and their role in modern technologies.

Figure 9. *Packing graphite samples at Collie.*

- **Collie Job Connect –** IG6 joined the Western Australian Government's new employment platform, supporting local workforce transition and promoting future employment opportunities associated with the Collie Micronising Facility.
- **Research and innovation –** Discussions progressed with Germany's Fraunhofer IKTS and Edith Cowan University's Ideas to Industry Lab on potential collaboration in advanced graphite processing and applied research to support Australia's downstream critical minerals capability.
- **Collie Chamber of Commerce and Industry –** The Company is represented on the Chamber's Management Committee and is an active supporter of local economic development initiatives, including sponsoring the 2026 Collie Business Awards, which recognise excellence and innovation.
- **Community partnerships –** For the second year, IG6 sponsored the Collie Eagles Football Club family fun day, encouraging family participation in local sport and strengthening relationships within the community.

QUARTERLY CASH FLOW REPORT

CONSOLIDATED STATEMENT OF CASH FLOWS

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	(82)
8.2	Payments for exploration & evaluation classified as investing activities (item 2.1(d))	(34)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(116)
8.4	Cash and cash equivalents at quarter end (item 4.6)	2,712
8.5	Unused finance facilities available at quarter end (item 7.5)	2,600
8.6	Total available funding (item 8.4 + item 8.5)	5,312
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	**45**

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

8.8.2 Has the entity taken any steps, or does it propose to take any steps to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.
