ASX Announcement

30 July 2026

Quarterly update for the quarter ending 30 June 2026

Highlights:

- Well supported placement during the quarter raised a total of \$2.62m; cash as at 30 June 2026 approx. \$4.2m
- Continued progress on environmental baseline studies for the JCVEP EIS, reinforcing QEM's strong ESG framework
- Acquisition of Idaho, USA critical minerals projects advanced during the quarter; completion delayed while final legal due diligence is completed
- Big It and Columbite Projects in Idaho are prospective for seven U.S. critical minerals: fluor spar, tungsten, antimony, niobium, tantalum, REE, and gold – potential to address the most acute U.S. supply vulnerabilities

QEM Limited (ASX: QEM) ("**QEM**" or "**Company**") is pleased to provide an update on its activities for the quarter ending 30 June 2026.

QEM Managing Director Robert Cooper said, "Our focus remains on maintaining optionality for the JCVEP while continuing to investigate other critical minerals opportunities that may enhance shareholder value. We continue to seek and evaluate high-quality assets that align with QEM's strategy and current global demand trends.

The acquisition of the Idaho, USA critical minerals projects is progressing, The Company believes that it represents a highly strategic step forward for QEM, and a stepping stone to the potential growth of QEM in the critical minerals sector."

ASX Announcement

30 July 2026

Julia Creek Vanadium and Energy Project

QEM Limited is an Australian resource company which has 100% ownership of its flagship Julia Creek Vanadium and Energy Project ("JCVEP"), one of the world's single largest undeveloped vanadium and oil shale deposits with a globally significant **JORC (2012) Mineral Resource of 2,870Mt @ 0.31% V₂O₅**. The resource is comprised of **461Mt @ 0.28% V₂O₅** in the **Indicated** category and **2,406Mt @ 0.31% V₂O₅** in the **Inferred** category, with the added benefit of a contingent (**SPE-PRMS 2018**) in-situ oil resource of **6.3 million barrels (MMbbl's)** of Oil equivalent in the **1C category**, **94 MMbbl's** in the **2C category**, and **654 MMbbl's** in the **3C category**, contained within the same ore body.

Figure 1: Julia Creek Vanadium and Energy Project Location

QEM
ASX : QEM

ASX Announcement

30 July 2026

The JCVEP is located approximately 16 km south-east of the Julia Creek township in north-west Queensland, within the Tier 1 mining jurisdiction of the North-West Minerals Province. The project is intersected by the main infrastructure corridor of the Flinders Highway and the Great Northern Railway line in the northern section of the tenement, which connects Mt Isa to the international Port of Townsville.

Environmental and Approvals

Baseline Water Monitoring

The second environmental ground and surface water monitoring campaign for the five holes completed 1 September 2025 was completed in the quarter. The purpose of this work is to provide an assessment of baseline groundwater and surface water conditions to support preparation of an Environmental Impact Statement (EIS). In accordance with the Environmental Protection Act 1994, this EIS is a requisite to obtain Environmental Authority. Two of the five holes were noted as making water and so will be capped in late July 2026. The next round of surveys is planned for August 2026.

ASX Announcement

30 July 2026

Project Acquisition Update

During the reporting period, QEM entered into a binding agreement (subject to any approval required under the ASX Listing Rules) to acquire all of the shares in Freshwater Metals Pty Ltd ("**Freshwater**") which owns two critical minerals projects located in Idaho, United States¹. The two projects are Big It (tungsten, antimony, gold) and Vaught-Peck Columbite (fluorspar, niobium, tantalum, rare earth elements), shown in Figure 2.

Figure 2: Location of Big It and Vaught-Peck Columbite Projects in Idaho, USA

¹ Refer to the announcement dated 15 April 2026 titled 'Project Acquisition and Placement' for details of the Big It and Vaught-Peck Columbite projects

The majority of the conditions precedent to complete the acquisition have been satisfied, with the remainder dependent on final legal due diligence. The completion date has been extended twice (set now at 31 July 2026) to allow the vendor to provide additional documentation related to the Big It tenements. This has unfortunately taken longer than anticipated given the nature of the ownership structure, with the Big It mining claims being held by individuals in Idaho rather than by state or federal agencies.

Tungsten – A Critical Defence Metal

The global tungsten market is experiencing strong growth, driven by demand for defence and military applications, cemented carbides in industrial machinery, automotive, and electronics. The primary driver is tungsten carbide with tungsten's extreme hardness, high melting point, and density means it finds uses in cutting tools, wear-resistant parts for mining and drilling equipment, armour-piercing rounds, and high-temperature industrial parts. It's also finding increasing use in light bulb filaments, electronics, welding electrodes, and as weights in sporting goods and aerospace.

The tungsten market is anticipated to maintain a steady growth trajectory from 2025-2035, with key future factors including advancements in tungsten-based products, such as in electronics and sustainable manufacturing technologies. Starting at roughly USD 5.5–7.3 billion in 2024/2025, the market is expected to grow to over USD 11 billion by 2033–2035, growing at a compound annual growth rate (CAGR) of 4.7% to 8.7% during that period driven by increasing industrial and military applications².

China dominates supply (approx. 83% of production) and consumption, holding significant reserves (1.8 million metric tonnes)³ making the market sensitive to Chinese policy, environmental regulations, and export quotas. Tightening supply and geopolitical factors are shifting market dynamics and while the Asia-Pacific is the largest market, demand for tungsten, particularly in defence and high-tech industries, is driving exploration and production in other regions, including Russia, Vietnam, and Australia. Major importers (USA, Europe) are focusing on diversifying supply chains to reduce dependence on Chinese imports.

Niobium - Supply Concentration Risk

A single Brazilian company (CBMM) controls approx. 75% of global niobium supply⁴ – the highest single-company concentration of any critical mineral on earth. CBMM recently restricted access to strategic investors, highlighting sovereign supply risk. The U.S. has imported 100% of its niobium needs since 1959 with no domestic production in living memory⁵. Demand for niobium is being driven by:

- High-strength low-alloy (HSLA) steel using niobium is now mandatory in modern military vehicles, naval vessels, and aerospace frames.
- Niobium-based superalloys are used in jet engine turbine blades – F-35, F-22, and next-generation hypersonic platforms all require it.
- Niobium is emerging as a solid-state battery anode material with NioCorp and others racing to secure supply.
- Global niobium demand projected to grow 6–8% CAGR through 2030 driven by EV steel, defence, and energy transition⁶

ASX Announcement

30 July 2026

Corporate

Following the completion of the Strategic Review in the prior quarter, QEM continues to monitor relevant macro-economic conditions and potential value-add opportunities to ensure that both value and optionality for the JCVEP are preserved, while building an asset portfolio with complimentary acquisitions consistent with its critical minerals focus.

QEM has also been actively investigating potential investments in alternative critical minerals opportunities that it considers complimentary and have potential to enhance the Company's critical minerals portfolio strategy and shareholder value. This initiative reflects the Company's commitment to broadening its strategic options and unlocking additional pathways for growth and shareholder value creation.

Placement

During the quarter, the Company completed a placement raising \$2.595 million (before costs) via the issue of approximately 57.67 million new fully paid ordinary shares at \$0.045 per share. 28.83 million free-attaching options will also be issued, subject to shareholder approval.

ESG and Community Relations

QEM's ESG reporting is based on the 21-core metrics set by the World Economic Forum (WEF), as part of WEF's standardised and globally recognised Stakeholder Capitalism Metrics ESG framework. Further details of QEM's ESG activities and governance documents can be found on the Company website.

Economic Contribution and Community Investment & Relations

Even while we look to conserve cash, investment in our community will always be a high priority for QEM and we continue to support local events. QEM maintains a regular presence in Julia Creek with a team member spending at several weeks per quarter in town for various operational matters and environmental surveys. These trips also provide an opportunity to meet and discuss the project with council and landowners.

Other ASX requirements

ASX Listing Rule 5.3.1: Exploration and Evaluation Expenditure during the Quarter was \$163k. \$150k was paid during the Quarter to Related Parties, as reported in clause 6 of the ASX Appendix 5B (Cash Flow Report). This comprises directors' fees.

Full details of activities during the Quarter are set out above.

ASX Listing Rule 5.3.2: there were no mining production and development activities during the Quarter.

ASX Announcement

30 July 2026

Tenement Schedule

At 30 June 2026, QEM continued to have interests in the following tenements, there were no other changes in the Company's interests in tenements during the quarter.

Project	Country	Tenement	Status	% Held	Change During Quarter
Julia Creek	Australia	EPM25662	Granted	100%	-
Julia Creek	Australia	EPM25681	Granted	100%	-
Julia Creek	Australia	EPM26429	Granted	100%	-
Julia Creek	Australia	EPM27057	Granted	100%	-

All tenements remain in good standing.

ENDS

This announcement was authorised for release on the ASX by the Board of QEM Limited.

ASX Announcement

30 July 2026

ABOUT QEM

QEM Limited (ASX: QEM) is a publicly listed company which is focused on the exploration and development of its 1005 owned flagship, the Julia Creek Vanadium and Energy Project (JCVEP), covering approximately 250km² in the Julia Creek area of North Western Queensland.

The JCVEP is a unique world class resource with the potential to deliver innovative and sustainable energy solutions, through the production of energy fuels and vanadium pentoxide. QEM strives to become a leading producer of liquid fuels and in response to a global vanadium deficit, also aims to become a global supplier of high-quality vanadium pentoxide, to both the nascent energy storage sector and the Australian steel industry.

This globally significant JORC (2012) Mineral Resource of 2,870 Mt @ 0.31% V₂O₅ is one of the single largest ASX listed vanadium resources and represents a significant opportunity for development. The resource is comprised of 461Mt @ 0.28% V₂O₅ in the Indicated category and 2,406Mt @ 0.31% V₂O₅ in the Inferred category, with the added benefit of a contingent (SPE-PRMS 2018) in-situ oil resource of 6.3 MMbbls of Oil equivalent in the 1C category, 94MMbbls in the 2C category, and 654MMbbls in the 3C category, contained within the same ore body.

The tenements form part of the vast Toolebuc Formation, which is recognised as one of the largest deposits of vanadium and oil shale in the world and located less than 16km east of the township of Julia Creek. In close proximity to all major infrastructure and services, the project is intersected by the main infrastructure corridor of the Flinders Highway and Great Northern Railway, connecting Mt Isa to Townsville.

**The information in this announcement that relates to the mineral resource and contingent resource estimates for the Company's Julia Creek Vanadium and Energy Project was first reported by the Company in its IPO prospectus dated 20 August 2018 and supplementary prospectus dated 12 September 2018 (together, the "Prospectus") and the subsequent resource upgrade announcements ("Resource Upgrade") dated 14 October 2019, 7 April 2022 and 5 March 2024. The Company confirms that it is not aware of any new information or data that materially affects the information included in the Prospectus and Resource Upgrade, and in the case of estimates of Mineral Resources and Contingent Resources, that all material assumptions and technical parameters underpinning the estimates in the Prospectus and Resource Upgrade continue to apply and have not materially changed.*

The information in this announcement that relates to exploration results and metallurgical test work for the Company's Julia Creek Vanadium and Energy Project was announced on 23 September 2025 (titled 'Latest Test Work Results and Strategic Review'). The Company confirms that it is not aware of any new information or data that materially affects the information included in the announcement dated 23 September 2025.

8.6	Total available funding (item 8.4 + item 8.5)	4,240
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	8.2
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: N/A	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: N/A	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	Answer: N/A	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>		

Compliance statement

- This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- This statement gives a true and fair view of the matters disclosed.

Date: 30 July 2026

Authorised by: By Order of the Board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
