ASX Release: Tolu Minerals Limited – Quarterly Report Period Ending 30 June 2026

Tolu Minerals Limited ("**Tolu**" or "**the Company**") is pleased to provide a market update for the June 2026 quarter, a period of strong progress at the Tolukuma Gold Mine ("**TGM**") reflected by record drilling, two new high-grade discoveries and continued momentum toward the updated Mineral Resource Estimate ("**MRE**") and first production.

Highlights

- **Strong cash position of approximately A$50 million**, providing the Company with a robust balance sheet to fund its growth strategy.
- **On track** to deliver the 75,000+ metre drilling campaign, the updated MRE and the restart of TGM.
- **Delivery of drill results** – the most intensive drilling program in Tolukuma's history delivered 68 holes for 11,686 metres in the June quarter alone (143 holes for 22,975 metres to 30 June 2026), including two new high-grade discoveries – the **Fundoot Splay** (4.67m at 40.90g/t Au from 66m depth, including 1.3m at 82.80g/t Au from 66m depth) and the **Gulbadi Splay** (2m at 16.94g/t Au from 149m depth). A further 17 holes reported on 29 July 2026 were headlined by **3.9m at 42.35g/t Au** from 64.5m depth in the New Zine FW splay, confirming the exceptional grade endowment of the Tolukuma system.
- **Anticipated MRE** – the updated Mineral Resource Estimate remains on track for release in late August 2026, a major inflection point for the Company. The revised geological model now recognises **44 mineralised veins and splays** (previously 15) across a system extending at least 8 kilometres, of which only ~1.2 kilometres has been mined to date.
- **Production timeline** – the Company remains confident of first gold production by Q1 2027. Underground development has recommenced on the 1560 Level, with early face-sampling grades including multiple intervals exceeding 30g/t Au.

Safety

On 6 July 2026, the Company reported a fatal incident in the field on EL2531, resulting in the death of an employee from its services division. The Company extends its deepest condolences to the employee's family, colleagues and friends, and continues to assist the family while working closely with the relevant authorities. The safety and health of everyone involved in our operations has always been, and shall remain, Tolu's paramount priority.

Drilling and Resource Growth

Exploration at TGM accelerated sharply during the quarter following commissioning of the Company's expanded fleet of diamond drill rigs. The June quarter's 11,686 metres of drilling represents an unprecedented run rate of drill metres for the Company and is the opening phase of Tolu's 75,000+ metre near-mine drilling campaign. Assay results announced on 28 May 2026 and 29 July 2026 continue to validate the Company's revised geological model, with high-grade intersections across the Fundoot, Fundoot Splay, Gulbadi, Gufinis

and Zine structures, and mineralisation remaining open along strike and at depth. Numerous additional assay results remain pending across Fundoot, Gulbadi, Gufinis and Zine, providing strong near-term news flow ahead of the MRE.

Mineral Resource Estimate Update

Independent resource consultants (H&S Consultants and RSC Consulting) have been engaged to complete the updated MRE – the most comprehensive review of the Tolukuma resource ever undertaken, incorporating an updated three-dimensional geological model, assessment of up to 44 mineralised vein systems and integration of all historical and recent drilling into a single validated database. The updated MRE is expected in late August 2026 and will underpin the new mine plan, which is designed to grow the operation across the Southern Expansion Zone, Northern Expansion Zone and Central Mine Zone at TGM.

Pathway to Production – Q1 2027

Significant work on the Company's methodical restart of TGM continued during the quarter, with underground development recommenced, processing plant refurbishment substantially advanced and supporting infrastructure progressing strongly. The staged restart will target approximately 500 tonnes per day, and the Company remains confident of achieving first gold production by Q1 2027.

Dr Chris Muller, MD & CEO of Tolu Minerals Ltd, said:

"The June quarter marked a step-change for Tolu. The most intensive drilling program in Tolukuma's history is consistently proving our revised geological model, two new high-grade structures have been discovered within the immediate mine environment, and the updated Mineral Resource Estimate in late August will give shareholders a far more robust understanding of the scale and potential of Tolukuma as we advance confidently toward first production by Q1 2027."
