Market Release

03 August 2026

Market Update: Profit Guidance Exceeded

	Sales Revenue	PBT	PBT%
Guidance (Feb 26):	$340m	$34m	10%
Unaudited Expected:	$347.9m	$39.3m	11.3%

SKS Technologies Group Limited (ASX: SKS) expects to achieve an unaudited before-tax profit of $39.3 million, which represents a 15.6% increase on the $34 million market guidance. Supported by slightly higher revenue and continued operational discipline, the Group expects to achieve a before-tax profit margin of 11.3%, highlighting the strength and scalability of the business.

SKS Technologies Chief Executive Officer, Matthew Jinks, said, "The significant increase in profitability reflects the continued strength of our business and the disciplined execution of our strategy over recent years. It also highlights the focus across the Group on operational excellence, continuous improvement and delivering projects more efficiently and effectively. This commitment to raising standards across every aspect of the business continues to underpin our earnings growth and long-term value creation."

The Group's ongoing investment in systems, processes and high-calibre personnel has created a more scalable operating platform, enabling revenue growth to be converted into profit at an increasing rate. This operational leverage has contributed meaningfully to the higher before-tax profit outcome, demonstrating the strength of the business model and its ability to support sustained growth without a corresponding increase in overhead costs.

Further information will be available on 18 August 2026 when the company announces its full-year 2026 financial and operational results.
