PATRIOT RESOURCES

ASX Announcement
7 August 2026

PATRIOT SECURES 'TASSA 5' TENEMENT, EXPANDING SILVER-GOLD PROJECT IN PERU

New ground extends Patriot's 100%-owned Tassa Project south, adjoining its 31.4Moz AgEq Mineral Resource.[1]

Highlights

- **Tassa Project expanded:** Patriot has added a new tenement via staking, **Tassa 5,** directly south of its 100%-owned Tassa Silver-Gold Project, immediately adjoining its existing 31.4Moz AgEq Maiden Inferred Mineral Resource[1].
- **Increased landholding:** Patriot's tenure increased from 1,200ha to 1,800ha within the silver-gold rich mineralised corridor controlled by the Tassa Fault.
- **System extends south:** Growing the interpreted strike length from approximately 2.9km to 3.1km supported by available historical data.
- **Favourable Jurisdiction:** Land packages surrounding Tassa taken by Majors (including Buenaventura, Teck, Barrick and Fresnillo**)**

Patriot Resources Limited (ASX: PAT) ("Patriot" or "the Company") is pleased to announce it has expanded **its landholding at the 100%-owned Tassa Silver-Gold Project in southern Peru via staking of a new tenement named "Tassa 5".** The new ground extends the Company's footprint directly along the southern trend of the high-grade system that hosts Tassa's 31.4Moz AgEq Maiden Inferred Mineral Resource (at 52.68g/t AgEq)[1], which remains open in all directions. Patriot expanded landholding now stands at 1,800 Ha giving Patriot a considerable footprint in Peru and further increasing our chances of extending the current Mineral Resource Estimate beyond initial tenure limits.

"Tassa 5 gives us the final piece of available highly prospective land in the vicinity , directly adjoining our existing project– directly along the trend of a system that's already open in every direction. Our focus remains working with the Tassa and Pachamayo communities to progress a community agreement to support a Phase 1 drilling program" **Dominic Duggan, CEO & Managing Director**

Permitting and Community Engagement

Peru's Ministry of Energy and Mines (MINEM) has confirmed that Tassa's Environmental Impact Declaration (DIA) remains valid and free of any observations. The Company continues direct Board-level engagement with the Tassa Community following meetings in June and July 2026. Patriot is now also engaging with the Pachamayo Community, who's community land overlaps the area of the new Tassa 5 mineral tenement.

Next Steps

Patriot will continue to conduct geological mapping and sampling as part of target generation and drill-hole refining across the broader Tassa project area to better support the planned Phase 1 drill program subject to our ongoing discussions with the Tassa community and reaching an agreement.

This announcement has been approved for release by the Board of Directors of Patriot Resources Limited.

Competent Person Statement

The technical information in this announcement relating to Exploration Results is based on, and fairly represents, information compiled by Eugene Gotora (Chief Geologist, Patriot Resources Limited), who is a member of the Australasian Institute of Mining and Metallurgy (MAusIMM). Mr Gotora has sufficient experience relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2012 edition of the JORC Code. Mr Gotora consents to the inclusion in this announcement of the matters based on the information in the form and context in which it appears.

Forward Looking Statement

Certain statements in this announcement relate to the future, including forward-looking statements relating to the Company and its business (including its projects). These forward-looking statements involve known and unknown risks, uncertainties, assumptions, and other important factors that could cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such statements. Although the Company believes that its expectations, estimates and forecast outcomes are based on reasonable assumptions, it can give no assurance that they will be achieved.
