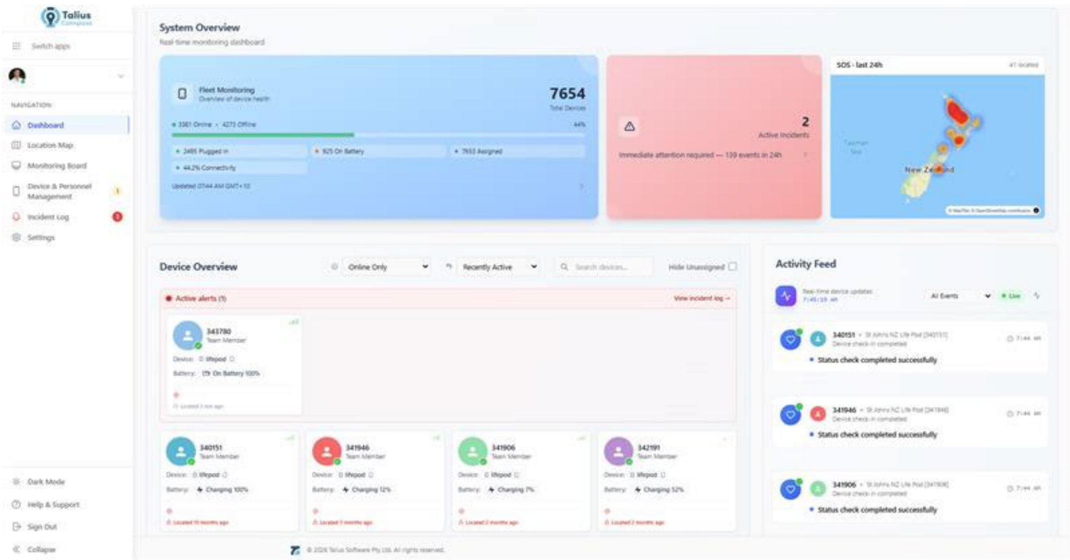
- **All HHSJ devices will now have access to Talius Compass, the Company's mobile duress alerting dashboard**



Talius Compass Dashboard Example

Talius Group Limited (Talius or **the Company) (ASX: TAL),** Australia's leading aged care data platform delivering real-time care workflows and automated compliance, is pleased to announce it has received purchase orders from **Hato Hone St John (HHSJ)** in New Zealand valued at approximately $850,000.

The Purchase Order comprises 4,000 additional Lifepod units together with 4,000 Emergency Personal Pendants (EPPs), representing a significant expansion of the Company's existing relationship with HHSJ. The Emergency Personal Pendants are scheduled for delivery during October 2026, while deliveries of the Lifepod units will commence in November 2026 and continue progressively over the following months.

This order follows the successful deployment of more than 3,000 Lifepod units with HHSJ and further strengthens one of the Company's largest enterprise customer relationships across the New Zealand healthcare sector.

The additional Lifepod deployment is expected to increase Talius' Annual Recurring Revenue (ARR) by approximately A$55,000, with recurring revenue commencing as devices are progressively activated.

Talius Compass

As part of the expanded deployment, all Hato Hone St John Lifepod devices will now have access to Talius Compass. Talius Compass is the Company's cloud-based safety and care management platform, transforming real-time data from connected devices into actionable insights for monitoring teams. The platform supports elderly and vulnerable people living independently by monitoring personal safety devices for SOS activations, falls and other emergencies, while also providing live location tracking and emergency monitoring for lone and remote workers. Through a single, map-based dashboard, Compass enables rapid incident response, improves operational visibility and supports safer, more proactive care delivery.

Strategic Rationale

This follow-on order demonstrates the strength of Talius' long-term relationship with HHSJ and the Company's ability to secure repeat orders from enterprise customers following successful deployments.

The addition of both Lifepods and Emergency Personal Pendants expands HHSJ utilisation of the Talius One Platform while further increasing Talius' recurring software revenue. The rollout of Talius Compass across all Lifepod devices further enhances the value delivered to HHSJ by providing a unified platform for monitoring, care management and operational oversight, reinforcing the Company's strategy of combining connected devices with intelligent software to improve care outcomes and operational efficiency.

Outlook

Delivery of the Emergency Personal Pendants is expected to be completed during October 2026, while Lifepod deliveries will be staged over the subsequent months. As devices are deployed and activated, Talius expects continued growth in its connected platform footprint with Hato Hone St John.

The Company continues to work closely with HHSJ on further opportunities to enhance connected care services and remains focused on converting additional enterprise opportunities across Australia and New Zealand.

Commenting on the contract, Pat Howard, Managing Director and CEO of Talius said:

"This expansion order is another strong endorsement of our partnership with Hato Hone St John and demonstrates the value of our enterprise customer strategy. Following the successful rollout of previous deployments, HHSJ has further expanded its investment in the Talius platform through this significant follow-on order.

Importantly, this order not only delivers immediate hardware revenue but also increases our Annual Recurring Revenue by approximately A$55,000 while extending the rollout of Talius Compass across the Hato Hone St John network. It demonstrates how enterprise customers continue to deepen their adoption of the Talius One Platform as they realise the benefits of connected care, intelligent software and data-driven care workflows."

The Company will provide further updates as the deployment progresses.

This announcement has been authorised by the Board of Directors of Talius Group Limited.

About Talius Group Limited (ASX: TAL)

Talius Group Limited (ASX: TAL) is a real-time healthcare data platform company delivering integrated care technology across Australia's aged care sector.

The Company's device-agnostic Talius One Platform combines real-time sensor data, CSIRO-validated analytics and automated compliance workflows in a single governed environment, delivering automated alerts, workflow integration and compliance reporting across home care, retirement living, residential aged care and hospital settings. Deployed by major aged care providers including Bolton Clarke, Uniting Care, Keyton and St John, the Platform supports proactive care delivery and operational efficiency across the care continuum.

As of FY25, Talius has 51,150+ active subscriptions and $3.3M in Annual Recurring Revenue (+12.7% YoY).

FORWARD LOOKING STATEMENTS

Certain statements contained in this ASX release, including information as to the future financial or operating performance of the Company and its projects, are forward looking statements. Such forward looking statements:

(a) are necessarily based upon several estimates and assumptions that, while considered reasonable by the Company, are inherently subject to significant technical, business, economic, competitive, political, and social uncertainties and contingencies;

(b) involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward looking statements; and

(c) may include, among other things, statements regarding estimates and assumptions in respect of prices, costs, results, and capital expenditure, and are or may be based on assumptions and estimates related to future technical, economic, market, political, social, and other conditions. The Company disclaims any intent or obligation to publicly update any forward-looking statements, whether because of new information, future events, or results or otherwise.

The words "believe", "expect", "contracted", "anticipate", "indicate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule", "planned" and similar expressions identify forward looking statements. All forward looking statements contained in this ASX release are qualified by the foregoing cautionary statements. Recipients are cautioned that forward looking statements are not guarantees of future performance and accordingly recipients are cautioned not to put undue reliance on forward looking statements due to the inherent uncertainty therein.
