

CleanSpace Secures A\$1.9 million in New Orders from an Existing Global Mining Customer with Indonesian Operations

Key Points

- New order of approximately A\$1.9 million received from CleanSpace's Indonesian distributor, PT. Lasindo Jayabersama, for a global mining customer with Indonesian operations, for fulfilment across Q1 FY27.
- Represents the largest single order received from an industrial enterprise customer in CleanSpace's history.
- Builds on a prior order of A\$600,000 for the same customer in June 2026, which has already been fulfilled.
- Ongoing consumables orders are expected in future months, reflecting operating conditions at the customer's Indonesian mining operations.

10 August 2026. CleanSpace Holdings Limited (ASX: CSX, "CleanSpace" or the "Company"), an Australian company that designs, manufactures, and sells premium respiratory protection solutions for industrial markets, is pleased to announce it has received a new purchase order totalling approximately A\$1.9 million from an existing global mining customer with Indonesian operations, for fulfilment across the first quarter of FY27.

The new order builds on a prior order of A\$600,000 placed in June 2026, which has now been fulfilled in full, further demonstrating CleanSpace's manufacturing and supply chain capability to support large-scale deployment.

CleanSpace expects consistent and ongoing consumables orders from the customer, reflective of the underlying operating conditions at their mining operations in Indonesia.

An Established and Growing Customer Relationship

The customer is a globally recognised copper and gold mining operator with significant Indonesian operations and an established CleanSpace end user account. Orders are placed through PT. Lasindo Jayabersama, the customer's designated distribution partner in Indonesia, with whom CleanSpace has held a distribution agreement since 2024. CleanSpace has worked alongside the distributor throughout that period, supplying product and providing ongoing operator and maintenance training to the customer's sites.

A consistent record of on-time, in-full order fulfilment over that period demonstrates the Company's supply chain capability. The customer values the comfort and extended-wear performance of the CleanSpace ULTRA powered air purifying respirator ("PAPR") design across its workforce in demanding underground and open-pit conditions.

CST ULTRA – Data Insights a Key Differentiator

The order reflects the relevance of CleanSpace's product range for large-scale mining operations such as this. CST ULTRA continues to differentiate the Company's product offering through its unique ability to deliver enterprise-grade data insights – including fleet-wide usage analytics, filter-life and consumables monitoring, and compliance reporting – giving safety and operations teams greater visibility over respiratory protection programs at scale. The data capability complements core respiratory performance in the selection of a PAPR partner.

CleanSpace CEO, Gabrielle O'Carroll, commented: "This is the largest single order from an industrial enterprise customer in CleanSpace's history, and it reflects the confidence this customer has built in us over the past two years. They require the highest standard of respiratory protection, a supply partner with a proven delivery record, and the fleet-wide data insight that CST ULTRA provides. We are well positioned to support this customer as their Indonesian operations continue to grow."

ABOUT CLEANSPACE

CleanSpace is a Sydney-based designer and manufacturer of respiratory protection equipment for industrial and healthcare solutions, founded by a team of biomedical engineers with experience in respiratory medical devices. CleanSpace is passionate about continually improving health outcomes, safety and standards of care for people who need it most.

In the last 20 years, technology has driven unprecedented advances in protective equipment and transformed people's health. We have brought this to personal respiratory protection. The Company continues to invest in research and development programs resulting in differentiated design and approved products that provide compelling employer and user benefits. CleanSpace Respirators are a true game changer. Higher protection for frontline workers means better health outcomes for millions of people, now and into the future.
