About Mayfield Group Holdings

Mayfield Group Holdings Limited (ASX: MYG) designs, manufactures, and services the critical electrical infrastructure that underpins Australia's energy transition, data centre expansion, defence modernisation, mining and resources operations, and nation-building infrastructure.

While the world embraces new technologies, such as solar farms, data centres, electric vehicles, and AI computing, Mayfield builds the fundamental electrical infrastructure that enables them to operate. Our business is built on a simple truth: nothing happens without power, and power requires reliable, intelligent distribution systems. We don't just participate in Australia's progress; we provide the essential infrastructure foundation that enables it.

Operating from advanced manufacturing facilities in Adelaide (26,500m²), Perth (7,900m²) and Kalgoorlie, with service operations across all mainland state capitals, Mayfield delivers integrated solutions through its complementary business units: Mayfield Industries (modular electrical manufacturing), BE Switchcraft (commercial electrical solutions), SMEC Power & Technology (underground mining electrical infrastructure and kiosk substations), and Power Parameters (critical power equipment and testing), supported by ATI Australia's communications and control systems capabilities.

Our Australian manufacturing provides supply chain security and rapid response capabilities, positioning Mayfield as an experienced and trusted partner that delivers for major contractors, utilities, mining companies, infrastructure operators, and government entities.
