Aurizon secures major Queensland coal haulage contract

Aurizon (ASX:AZJ) has secured a new long-term, performance-based contract with BMA, the BHP Mitsubishi Alliance for rail haulage of coal for BMA mine operations in Queensland.

The contract represents tonnes recontracted in the Bowen Basin servicing BMA's metallurgical coal mines of Goonyella Riverside, Broadmeadow, Peak Downs, Saraji and Caval Ridge.

The contract is effective from 1 July 2028 with annual volume flexibility provisions allowing for up to 37 million tonnes per annum. The contract is for a period of up to 12 years subject to agreed performance and extension arrangements, potentially extending Aurizon's contract with BMA to 2040.

The new contract will replace the existing 2015 contract held by Aurizon.

Aurizon Managing Director and Chief Executive Officer Andrew Harding said Aurizon was pleased to renew its long-term partnership with BMA.

"Close to a quarter of the coal tonnes we carry in Queensland is for BMA and BMA is a very valued customer," Mr Harding said.

"We were awarded this contract in a competitive environment and I believe our consistent, reliable service delivery was a significant contributing factor to our success.

"We have a proven track record of delivery for BMA and a long-standing relationship stretching back over a decade.

"We are honoured to be awarded this contract and our team will work extremely hard to continue to deliver for BMA and play our role in helping support Australia's vital mining sector."

Mr Harding said when combined with other customer recontracting, more than 60 million tonnes of annual coal haulage had been recontracted by Aurizon since July 2025, representing all customer contracts tendered over the period.
