Haranga Resources

STRATEGIC LAND ACQUISITION INCREASES MOTHER LODE FOOTPRINT

The adjacent surface and mineral rights acquisition extends and consolidates Haranga's footprint on the Mother Lode, underpinned by a high-grade gold resource, multi-million ounce potential, extensive existing infrastructure and key foundational mining permits. The purchase improves access and development efficiency, while providing greater optionality for future mine planning.

Key benefits of the land acquisition

- ✓ **Unencumbered exploration**: Of interpreted mineralisation at depth.
- ✓ **Improved access**: For drilling, development and potential future mining around Lincoln-Comet.
- ✓ **Stringbean Alley Decline**: The ability to efficiently extend the decline north towards Medean, South Spring Hill and Keystone.
- ✓ **Greater flexibility**: For planning future surface infrastructure and extending underground access.
- ✓ **Improved tailings transport and management options**: Including potential pipeline and/or dry-stack solutions.

HIGHLIGHTS

- Seduli Sutter Operations Corp (SSOC), an indirect wholly owned subsidiary of Haranga Resources has entered into a Purchase and Sale Agreement to acquire 100% of the surface and mineral rights to two properties totalling **60 acres (24.3ha).**
- The properties are **immediately adjacent** to Haranga's wholly-owned Lincoln Gold Project (Mineral Resource Estimate[1]: **402koz Au (2.45Mt @ 5.1g/t Au)**.
- The acquisition forms part of Haranga's broader growth strategy for Lincoln, as it assesses further consolidation opportunities across the Mother Lode.
- Preparations for a drilling programme commencing at XC11 for late August remain underway.

Haranga Resources Limited (ASX: HAR; FRA: 65E0) ("Haranga" or "the Company") is pleased to advise that it has entered into a Purchase and Sale Agreement ("PSA", or "Agreement") with California-based property developer Land Club Sutter Creek LLC ("Land Club") to acquire the surface rights and all mineral rights over two contiguous properties totaling 60 acres. The properties are immediately adjacent to Haranga's wholly-owned Lincoln Gold Project in the

Mother Lode region of California, USA. The purchase marks the first expansion of the Lincoln Gold Project footprint in approximately two decades.

Chairman, Mr. Michael Davy commented: *"After several months of planning and negotiation, we are very pleased to have executed this agreement to acquire these strategically located properties. Lincoln is already a compelling gold opportunity, hosting a JORC Mineral Resource of ~400,000oz and an exploration target, within a project that has produced over 3 million ounces historically and where mineralisation is known to repeat to depths up to 2,000m below surface.*

Haranga is in a commanding position within the Mother Lode gold belt, supported by extensive existing infrastructure, underground decline and key permits, including a Conditional Use Permit to mine. The Board considers this gives Lincoln multi-million ounce potential and a clear pathway to development, and this acquisition builds further on those considerable advantages. We continue to assess other consolidation opportunities across this highly prospective, high-grade gold district that could allow us to further leverage these advantages.

In parallel, we remain focused efficiently advancing our resource and development growth objectives at Lincoln. This acquisition represents another considered step in that process, and I look forward to providing shareholders with further updates as our work at Lincoln continues to progress."

Purchase and Sale Agreement

Following due diligence, the Company entered into a Purchase and Sale Agreement with Californian-based Property Developer Land Club Sutter Creek LLC to purchase 100% of the surface and all mineral rights to two contiguous properties ("Properties"):

- APN 040-010-006-000: 50.33 acres, and
- APN 040-010-004-000: 9.81 acres.

The Properties total approximately 60 acres (24.3ha) and are located immediately adjacent to the Lincoln Gold Project and near the String Bean Alley ("SBA") decline (refer Figures 1-3 and Appendix 1). Key terms of the PSA are in Appendix 2.

Discussion on Acquisition Benefits

The purchase of the Properties is anticipated to result in multiple benefits for Haranga as it undertakes its resource growth and development initiatives. These include improved access for further drilling, development and mining in the immediate vicinity of Lincoln-Comet, together with greater flexibility to efficiently extend the existing decline access north towards Medean, South Spring Hill, and Keystone deposits. These prospects have a combined production history of around 1.0Moz Au[3], and comprise part of the Company's resource inventory and current Exploration Target focus. The SBA decline is developed in the competent local greenstone host rock to the Motherlode mineralisation which persists at depth. Deep drilling during the Phase 1 drilling campaign also indicates the potential for west-dipping mineralisation at depth. The acquisition allows this interpreted

[3] Carlson, Denton W.; Clark, William B. (1954) Mines and Minerals of Amador County, California. In California Journal of Mines and Geology Vol. 50 No. 1. Department of Natural Resources, Division of Mines. p.149-285.

mineralisation to be explored unencumbered. The SBA decline remains a significant advantage and investment in the future of the Lincoln Gold Project operation, and the ability to efficiently and safely extend underground accesses at depth and to the northern extents of the Company's prospects is of significant benefit.

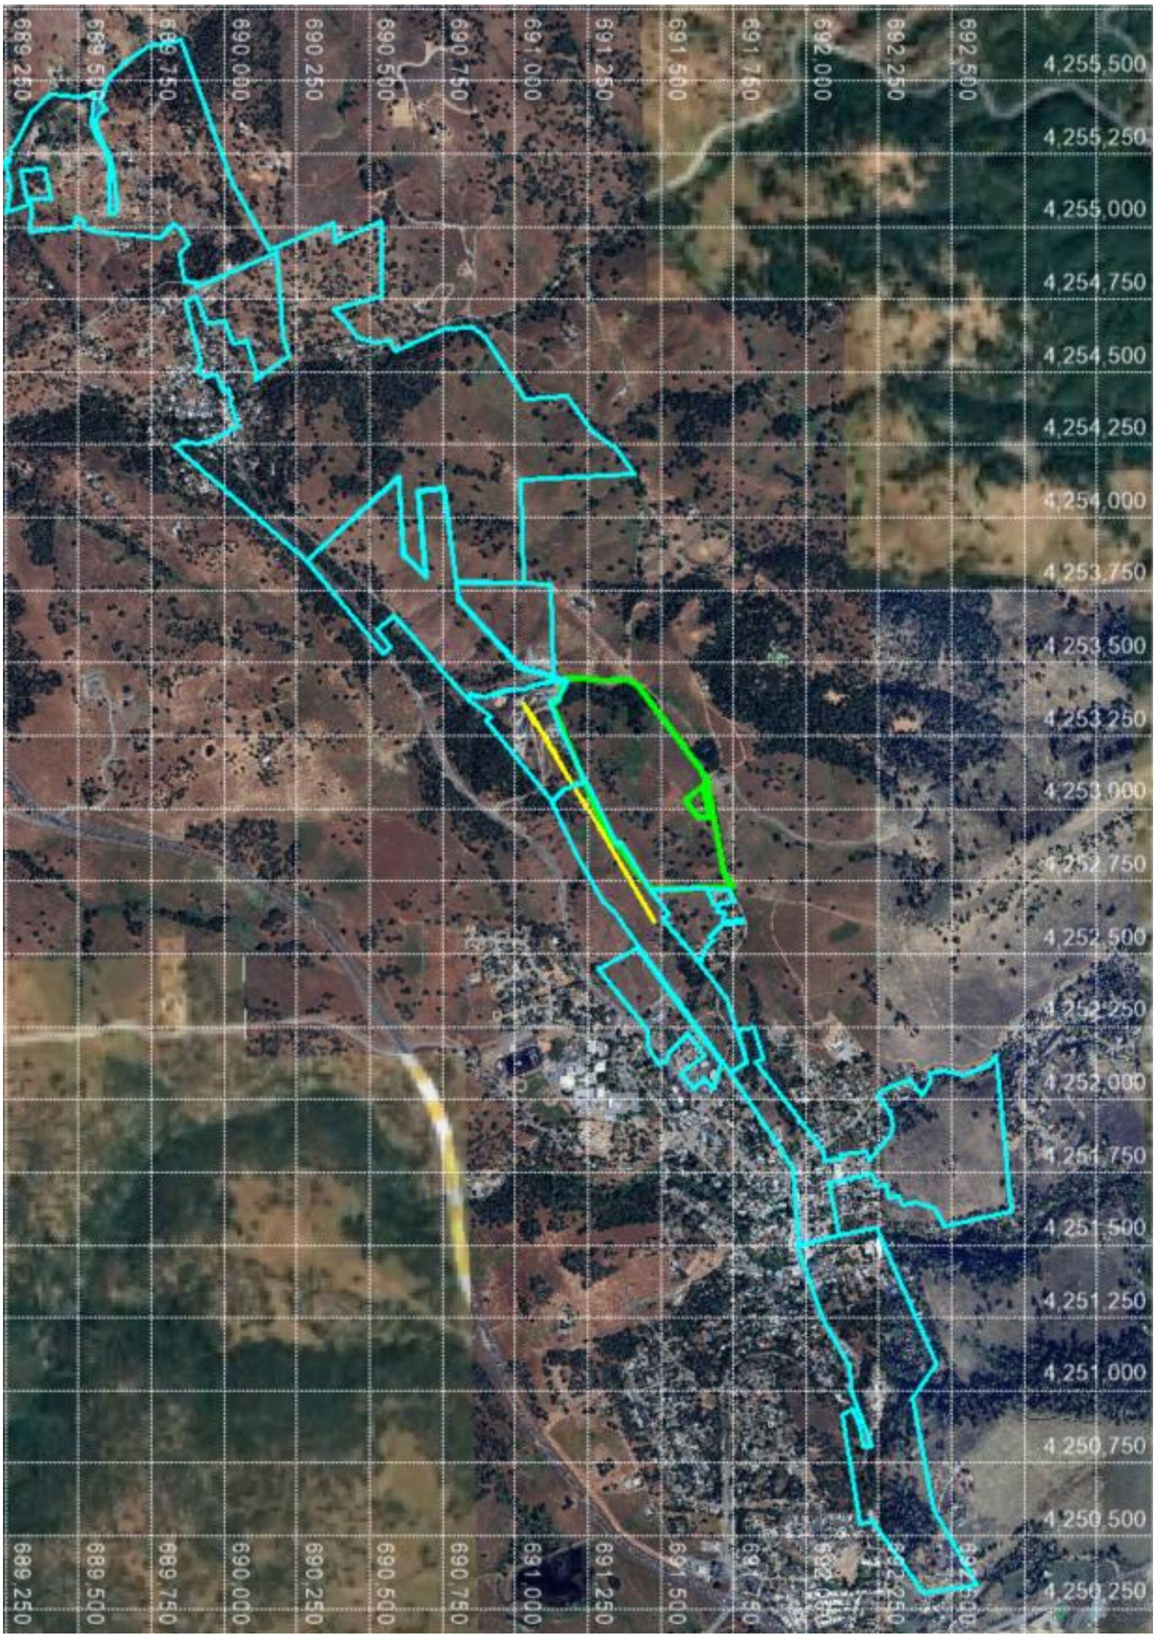

Figure 1: Location of LCSC properties (Green) in relation to all HAR mineral rights (Light Blue-owned/leased) on the Motherlode, totalling around 6km of strike. Location of String Bean Alley Decline highlighted in yellow. Coordinates UTM (WGS84) Zone 10. Refer to Figure 2 below for additional detail.

The Purchase also allows significant additional flexibility in surface footprint planning for a potential mining operation, particularly in respect of tailings transport and management. The Company is currently considering processing designs to enable benign waste classification of planned tailings, potentially to provide re-purposing of filter-pressed ("Dry Stack") product for commercial use, and the construction of a paste facility to return mined volumes underground where possible. However the likelihood of a portion of more conventional disposal of tailings remains, and the new properties allow possible disposal by pipeline slurry and decant return or dry stack via trucks on private access road to the proposed Surface Fill Unit (SFU) as per Figure 3.

Under the current Conditional Use Permit ("CUP") access to Stringbean Alley (north of the office) and Old Amador Road (immediately east of the properties being purchased) is limited; and the ability to truck or pump tailings from an operation to the proposed SFU is now a vastly improved possibility on ground owned by the Company. This was previously a flaw in the two previous attempted processing iterations of the project Sutter Gold (2012-2013); and Seduli (2020-2021) whom attempted milling without viable life-of-mine tailings management outcomes.

The purchase also allows a possible expansion of Dry Stack facilities at the 'Sand Barn' (refer Appendix 1) to suit independent trucking of filtered benign product out the mine access road away from other mining and milling activities, and resolves a small historical issue with the current mine access road, which was constructed across a small portion of the larger property being purchased (refer Appendix 1).

The purchase marks the first expansion of the Lincoln Gold Project footprint in approximately two decades.

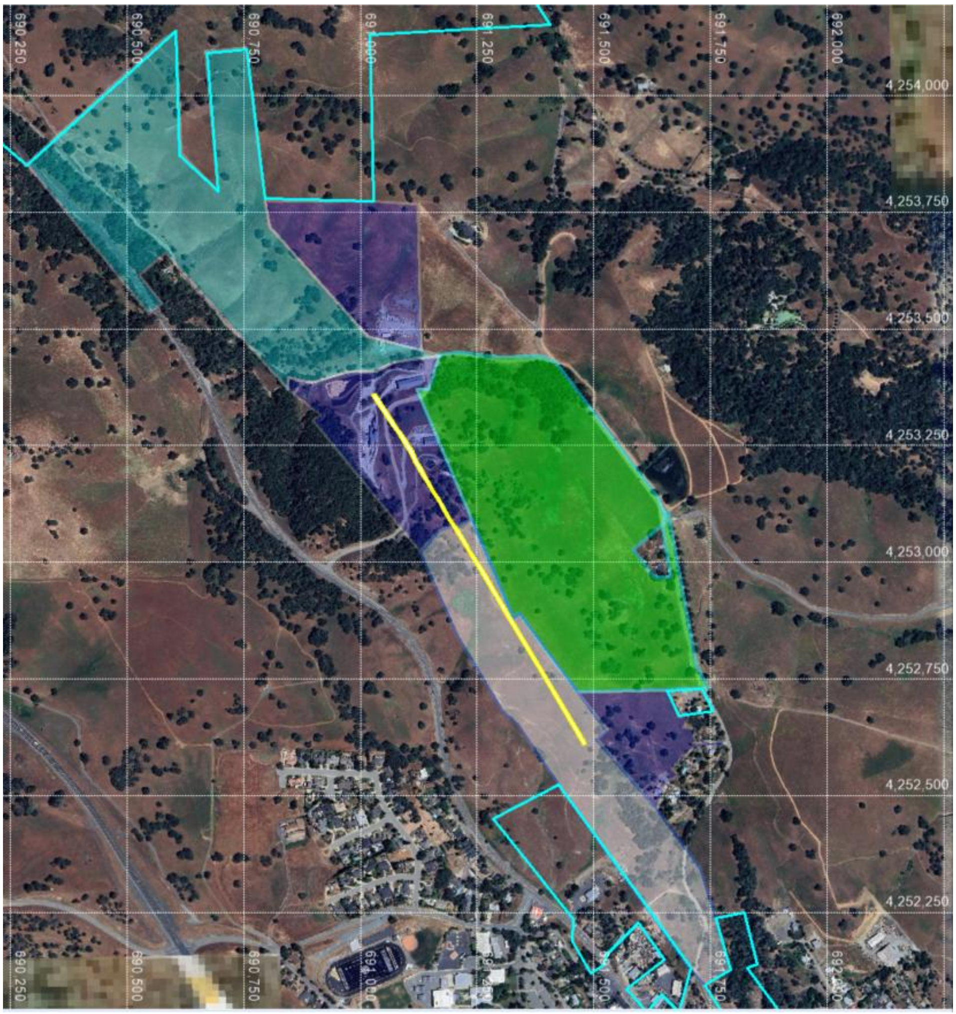

Figure 2: Location of LCSC properties (Green shaded) in relation to HAR 100% surface and mineral rights (Dark Blue shaded); HAR surface rights and leased mineral rights (Light Blue shaded); HAR surface lease and mineral lease (white shaded); and mineral rights (Light Blue unshaded). Location of String Bean Alley Decline highlighted in yellow. Coordinates UTM (WGS84) Zone 10.

Company Secretary

HARANGA RESOURCES LIMITED

APPENDIX 1 - LCSC Properties subject to PSA (provided by LCSC LLC, annotated by HAR)

APPENDIX 2 – Terms of Sale

Parties	Seduli Sutter Operations Corporation (Purchaser) and Land Club Sutter Creek LLC (Seller)
Purchase and Sale	Seller will sell the Properties to Purchaser, and Purchaser will purchase the Properties from Seller, for the Purchase Price.
Purchase Price	The purchase price for the Property will be USD$1,550,000 (the "Purchase Price"). The Purchase Price will be payable in cash as follows:
Deposit	Within three (3) days of the Parties' mutual execution of this Agreement, Purchaser will deposit into Escrow via wire transfer USD$150,000 (the "*Initial Deposit*"). The Deposit will become non-refundable immediately upon execution of this Agreement. If the closing of the transaction contemplated by this Agreement occurs (the "*Closing*") the Deposit will be applied to the Purchase Price at Closing.
Balance of the Purchase Price	On or before Closing, Purchaser will deposit into Escrow, by wire transfer of immediately available funds, USD$450,000 adjusted for credits and any prorations and closing costs provided for herein, (plus the Reimbursable Seller Costs of around USD$33.7k) as defined below (the "*Closing Payment*").
Post Closing Payments	After the Closing, Purchaser shall make three separate payments (the "*Post Closing Payments*") plus 8.5% annual interest accruing starting on the Closing Date, comprising: i) the "First Post Closing Payment" being USD$450,000 due within 90 calendar days of Closing; and ii) the "Second Post Closing Payment" being USD$250,000 due within 180 calendar days after Closing; and iii) the "Third Post Closing Payment" being USD$250,000 due within 270 calendar days after Closing. The Purchaser may pay the Post Closing Payments sooner than the due date and shall have no pre-payment penalty applied.

Competent Person's and Compliance Statement

The information in this announcement that relates to Exploration Results is based on and fairly represents information and supporting documentation compiled by Mr Craig Hall (Chief Operating Officer for the Lincoln Gold Project) a Competent Person, who is a Member of the Australian Institute of Geoscientists (AIG member #1748). Mr Hall has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Hall is Joint Chief Operating Officer for Haranga Resources Limited and consents to the inclusion in this announcement of the Exploration Results in the form and context in which they appear.

The information in this announcement that is footnoted below (1-2) relates to exploration results, exploration targets and mineral resources that have been released previously on the ASX. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that, in the case of mineral resources estimates (including foreign estimates), all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's finding is presented have not been materially modified from the original market announcements.

Lincoln - Mineral Resource[1]

The Company confirms it is not aware of any new information or data that materially affects the information included in the Mineral Resource estimate and all material assumptions and technical parameters underpinning the estimate continue to apply and have not materially changed when referring to its resource announcement made on 25 May 2026[1]. The Company confirms that the form and context in which the Competent Person's finding is presented have not been materially modified from the original market announcements.

Lincoln - Mineral Resource Estimate

The resource as reported at 25 May 2026 is as follows:

Area	Classification	Volume (m^3)	Density (g/cm^3)	Tonnage	Grade (g/t Au)	Ounce Au
Lincoln-Comet	Indicated	165,000	2.6	429,000	6.6	91,000
Lincoln-Comet	Inferred	410,000	2.6	1,068,000	5.4	184,000
Lincoln-Comet	**Total**	**575,000**	**2.6**	**1,497,000**	**5.7**	**275,000**
Medean	Inferred	370,000	2.6	961,000	4.1	127,000
Medean	**Total**	**370,000**	**2.6**	**961,000**	**4.1**	**127,000**
Total		**945,000**	**2.6**	**2,459,000**	**5.1**	**402,000**

Table 1: Lincoln Gold Project MRE[1] Summary Table; 2026 Kriged Model, reported at 2.0 g/t cutoff. NB. All resources are reported depleted for mining voids.

Saraya - Mineral Resource[2]

The Company confirms it is not aware of any new information or data that materially affects the information included in the Mineral Resource estimate and all material assumptions and technical parameters underpinning the estimate continue to apply and have not materially changed when referring to its resource announcement made on 27 August 2024[2]. The Company confirms that the form and context in which the Competent Person's finding is presented have not been materially modified from the original market announcements.

Saraya - Mineral Resource Estimate

The resource as reported at 27 August 2024 is as follows:

Classification	Tonnage	Grade	Contained eU_3O_8	
	Mt	eU_3O_8 ppm	Mlbs	Tonnes
Indicated	4.1	740	6.7	3,038
Inferred	10.4	475	10.9	4,946
Total	14.5	550	17.6	7,984

Table 2: Saraya Mineral Resource Estimate[2] – 250ppm cutoff, Indicator Kriging

Forward-looking statements are statements that are not historical facts. Words such as "expect(s)", "feel(s)", "believe(s)", "will", "may", "anticipate(s)", "potential(s)" and similar expressions are intended to identify forward-looking statements. These statements include, but are not limited to statements regarding future production, resources or reserves and exploration results. All of such statements are subject to certain risks and uncertainties, many of which are difficult to predict and generally beyond the control of the Company, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: (i) those relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits and conclusions of economic evaluations, (ii) risks relating to possible variations in reserves, grade, planned mining dilution and ore loss, or recovery rates and changes in project parameters as plans continue to be refined, (iii) the potential for delays in exploration or development activities or the completion of feasibility studies, (iv) risks related to commodity price and foreign exchange rate fluctuations, (v) risks related to failure to obtain adequate financing on a timely basis and on acceptable terms or delays in obtaining governmental approvals or in the completion of development or construction activities, and (vi) other risks and uncertainties related to the Company's prospects, properties and business strategy. Investors are cautioned not to place undue reliance on these forward-looking statements that speak only as of the date hereof, and the Company does not undertake any obligation to revise and disseminate forward-looking statements to reflect events or circumstances after the date hereof, or to reflect the occurrence of or non-occurrence of any events.

About Haranga Resources

Haranga Resources is a gold exploration and development company with assets across California's legendary Mother Lode Gold Belt and Senegal's Kéniéba Inlier. In California, the Company has recently defined its maiden mineral resource of 2.46Mt @ 5.1 g/t Au for 402koz, at its high-grade Lincoln Gold Project, which benefits from significant existing infrastructure and is fully permitted for mining.

In Senegal, Haranga holds the highly prospective Ibel South Gold Project, which has returned high-grade near-surface gold mineralisation from drilling. In addition, Haranga holds the Saraya Uranium Project, previously owned by Uranium giant Orano (previously Areva) and which has in excess of 65,000m of historical drilling and a defined mineral resource of 14.5Mt @ 550ppm eU3O8 for 17.6 Mlbs contained eU3O8 Indicated and Inferred.

Haranga's collective expertise includes considerable experience running ASX-listed companies and financing, operating and developing mining and exploration projects in Africa, Australia, and other parts of the world.
