FY27: BUILDING REVENUE ACROSS A GLOBAL PIPELINE

PROJECTS

Advance existing projects and convert near-term opportunities into commercial deployments and revenue-generating activities.

LICENCES

Convert the expanding Hazer-KBR global pipeline into technology licences and long-term recurring revenue opportunities.

GRAPHITE

Accelerate graphite commercialisation through product qualification, customer adoption and commercial supply and offtake agreements.

NEW MARKETS

Expand the Hazer Process into high-growth applications including data centres, sustainable aviation fuel, ammonia and other hard-to-abate sectors.

We enter FY27 with the technology proven, a global commercial platform in place and a growing pipeline of opportunities. Our focus now is conversion, building revenue through projects, technology licensing and graphite, while expanding into new markets for low-emissions hydrogen. With KBR's global reach and increasing engagement across multiple sectors, we are well positioned to turn this momentum into long-term commercial growth and shareholder value."
