ASX Release

Gawara Baya Wind Farm – Notice to Proceed

Symal Group Limited (**ASX: SYL**) ("the Company", "Group" or "Symal") is pleased to announce that the Gawara Baya Wind Farm ("GBWF") development has satisfied all outstanding conditions precedent and received a Notice to Proceed with works commencing immediately.

The head contract to Symal is now valued at $366 million, an increase of 19 million over the original contract value of $347 million, to account for final refinements to the scope of works. The associated works are expected to take approximately 24 months to complete. Symal first announced the award of the conditional contract on 21 February 2025.

Joe Bartolo, Symal's Group Managing Director, said:

"This project demonstrates the value of early contractor involvement. We've been working alongside the client for an extended period, understanding the site and what it takes to build here, and that work has made today possible.

Renewable energy is already a big part of what we do, and Gawara Baya adds to a track record we're incredibly proud of. It also strengthens our position in Queensland, a state we've said we want to continue growing in. It's the kind of project our team is built for, and we're ready to get moving."

About the project

Gawara Baya Wind Farm has the capacity to provide clean power to Australian homes, displacing approximately 1.3 million tonnes of carbon dioxide emissions every year.

The project is located on an active cattle property within Gugu Badhun Country in North Queensland, approximately 180km northwest of Townsville, in close proximity to the existing transmission infrastructure.

Symal's scope is the civil balance of plant (CBoP).

-ENDS-

This announcement was authorised for release to the ASX by the Group Managing Director.
