

Huntsville Hospital Health System signs five-year Salix® commercial agreement

First SAPHIRE Study participant converts to commercial customer
demonstrating Artrya's U.S. go-to-market strategy

Investor Conference Call at 12.00pm AEDT (9.00am AWST) on Wednesday, 7 October 2026

PERTH, Australia, 02 October 2026: Artrya Limited (ASX: AYA) (**Artrya** or the **Company**), a medical technology company commercialising its Salix® AI-powered cloud platform, for the real time, point of care assessment and management of coronary artery disease globally, is pleased to announce the signing of a five-year commercial agreement with Huntsville Hospital Health System (HH Health). The agreement marks the first conversion of a SAPHIRE Study participant into a commercial customer and represents an important milestone in Artrya's U.S. commercial strategy.

Key Points

- **First SAPHIRE commercial conversion – HH Health becomes Artrya's fourth U.S. commercial customer and the first SAPHIRE Study participant to enter into a commercial agreement for clinical use of Salix®**
- **Five-year commercial agreement with recurring and usage-based revenue model – minimum contracted value of US\$0.5M for Salix® Coronary Anatomy, with additional fee-per-scan revenue from Salix® Coronary Plaque, and Salix® Coronary Flow once FDA cleared**
- **Enterprise-scale deployment – Salix® will be integrated into applicable clinical workflows across HH Health's 15-hospital network, representing Artrya's largest U.S. customer deployment to date**
- **Validation of U.S. strategy – the first SAPHIRE-to-commercial conversion demonstrates the potential for Artrya's clinical research relationships to progress into long-term commercial adoption**

John Konstantopoulos, Co-Founder and CEO of Artrya, commented:

"The conversion of HH Health from a SAPHIRE Study participant into a commercial customer is an important milestone for Artrya's U.S. strategy.

A key objective of SAPHIRE is to establish deep clinical engagement with U.S. cardiovascular centres and create a pathway toward broader commercial adoption of Salix®. Huntsville becoming the first SAPHIRE participant to enter into a five-year commercial agreement demonstrates that strategy in action.

Importantly, this is a multi-module commercial relationship. The agreement establishes recurring SaaS revenue from Salix® Coronary Anatomy, with additional fee-per-scan revenue from Salix® Coronary Plaque and, following FDA clearance, Salix® Coronary Flow.

With HH Health joining Tanner Health, Northeast Georgia Health System and Cone Health, Artrya now has four U.S. commercial customers. Our focus is on successfully deploying Salix® across these customers while continuing to progress our SAPHIRE relationships and broader U.S. commercial activities."

First SAPHIRE partner conversion advances U.S. commercial strategy

The five-year agreement with HH Health marks Artrya's first commercial conversion from its SAPHIRE Study network and expands the Company's U.S. commercial customer base from three to four.

SAPHIRE forms part of Artrya's broader U.S. clinical and commercial strategy, establishing collaborations with leading and high-volume cardiovascular centres while providing participating organisations with direct exposure to the Salix®

platform. HH Health's progression from SAPPHIRE participant to commercial customer provides the first example of this strategy progressing from clinical research engagement to commercial adoption.

Under the agreement, Salix® Coronary Anatomy will generate recurring SaaS subscription revenue, with additional fee-per-scan revenue from CCTA assessments performed with Salix® Coronary Plaque and, following FDA clearance, Salix® Coronary Flow. The US\$0.5M minimum contracted value relates to Salix® Coronary Anatomy and does not include potential additional usage-based revenue from assessments with the Plaque and Flow modules.

Artrya will continue to progress its relationships with other SAPPHIRE participants alongside its broader U.S. commercial activities.

Enterprise-scale U.S. deployment

HH Health is Artrya's largest customer to date, and the agreement extends Artrya's relationship with HH Health beyond its SAPPHIRE research collaboration into routine clinical use across applicable clinical workflows within the broader health system.

HH Health joins Tanner Health, Northeast Georgia Health System and Cone Health as Artrya's fourth U.S. commercial customer and represents Artrya's largest U.S. customer deployment to date.

Material terms of the agreement

The full details of the Commercial Agreement are commercial in confidence, with the material points as follows:

- Commercial SaaS Licence Agreement for non-exclusive use of the Salix® Coronary Anatomy platform for clinical use
- Monthly subscription fee over the duration for use of the Salix® Coronary Anatomy platform
- Fee-per-scan revenue for Salix® Coronary Plaque, eligible for U.S. reimbursement under a Category I CPT code
- Fee-per-scan revenue for Salix® Coronary Flow, eligible for U.S. reimbursement under a Category I CPT code once FDA cleared
- 5-year term for the agreement with standard provisions for events of default
- 5-year term subject to customary termination provisions
- Customary terms include security and privacy protocols, support levels, software upgrades.

Investor Webinar

The Company's Co-Founder and CEO John Konstantopoulos, will host an Investor Webinar at **12.00pm AEDT (9.00am AWST)** on **Wednesday, 7 October 2026**, to discuss the HH Health announcement.
