

Hyundai Motor America Appoints Connexion Mobility as Exclusive Supplier for Connected Car-Powered Dealer Lot Management Platform

Melbourne, Australia: Connexion Mobility Ltd ("Connexion" or "the Company") has signed an agreement with Hyundai Motor America ("HMA") as the exclusive supplier for the software design, development, and management capability supporting HMA's national launch of its Dealer Lot Management ("DLM") Platform in the United States.

Dealer Lot Management

The DLM Platform will enable Hyundai to extend connected car technology into dealership operations, helping retailers improve vehicle visibility, readiness, delivery preparation, and customer experience best practices.

The DLM Platform will leverage Connexion's expertise in designing, developing, and managing software in close collaboration with Hyundai's connected vehicle technology teams. Available as an optional purchase, the DLM Platform will provide Hyundai dealers with connected car-powered tools that help track vehicle status, improve inventory visibility, streamline vehicle preparation, and support a more seamless handoff from the dealership to the customer.

Launch

DLM is scheduled for national launch in the United States in early 2027.

"We are delighted to partner with Hyundai Motor America in support of its vision to bring the benefits of connected vehicle technology into the retail environment," said Aaryn Nania, Managing Director, Connexion. "I would like to thank the HMA and Connexion teams for their collaborative efforts in designing a platform that helps dealers make better use of vehicle connectivity throughout the ownership journey. Together, we are creating a solution that supports dealer operations, improves vehicle readiness, and enhances the customer experience from delivery onward. We look forward to bringing this vision to life across the Hyundai retail network in the United States."

"At Hyundai, we see connected car technology as an opportunity to improve not only the ownership experience, but also how vehicles move through the retail environment," said Manish Mehrotra, Chief Information Officer, Hyundai Motor North America. "Dealer Lot Management extends connectivity into dealership operations, helping dealers better understand vehicle status, improve readiness, and deliver a more consistent customer experience. Together with Connexion, we are developing a platform that brings the benefits of connectivity to every stage of the dealer-to-customer journey."
